Data in Many Forms ...

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered. Data are available on CD, diskette, computer print-out, microfiche and microfilm, and magnetic tape. Maps and other geographic reference materials are available for some types of data. Direct online access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable database and retrieval system.

How to Obtain More Information

Inquiries about this publication and related statistics or services should be directed to:

Client Services Unit,
Prices Division,

Statistics Canada, Ottawa, K1A 0T6 Telephone: (1-613-951-3350) or to the Statistics Canada reference centre in:

Halifax	(1-902-426-5331)	Regina	(1-306-780-5405)
Montréal	(1-514-283-5725)	Edmonton	(1-403-495-3027)
Ottawa	(1-613-951-8116)	Calgary	(1-403-292-6717)
Toronto	(1-416-973-6586)	Vancouver	(1-604-666-3691)
Winnipeg	(1-204-983-4020)		

Toll-free access is provided in all provinces and territories, **for users who reside outside the local dialing area** of any of the regional reference centres.

Newfoundland, Labrador, Nova Scotia, New Brunswick and Prince Edward Island	1-800-565-7192
Quebec	1-800-361-2831
Ontario	1-800-263-1136
Saskatchewan	1-800-667-7164
Manitoba	1-800-661-7828
Southern Alberta	1-800-882-5616
Alberta and Northwest Territories	1-800-563-7828
British Columbia and Yukon	1-800-663-1551
Telecommunications Device for the Hearing Impaired	**1-800-363-7629**
Toll-free Order-only Line (Canada and United States)	**1-800-267-6677**

How to Order Publications

This and other Statistics Canada publications may be purchased from local authorized agents and other community bookstores, through the local Statistics Canada offices, or by mail order to Marketing Division, Sales and Service, Statistics Canada, Ottawa, K1A 0T6.

(1-613-951-7277)
Facsimile number (1-613-951-1584)

Standards of Service to the Public

To maintain quality service to the public, Statistics Canada follows established standards covering statistical products and services, delivery of statistical information, cost-recovered services and service to respondents. To obtain a copy of these service standards, please contact your nearest Statistics Canada Regional Reference Centre.

Des données sous plusieurs formes ...

Statistique Canada diffuse les données sous formes diverses. Outre les publications, des totalisations habituelles et spéciales sont offertes. Les données sont disponibles sur disque compact, disquette, imprimé d'ordinateur, microfiche et microfilm, et bande magnétique. Des cartes et d'autres documents de référence géographiques sont disponibles pour certaines sortes de données. L'accès direct à des données agrégées est possible par le truchement de CANSIM, la base de données ordinolingue et le système d'extraction de Statistique Canada.

Comment obtenir d'autres renseignements

Toute demande de renseignements au sujet de cette publication ou de statistiques et services connexes doit être adressée à la:

Sous-section du service à la clientèle,
Division des prix,

Statistique Canada, Ottawa, K1A 0T6 téléphone: (1-613-951-3350) ou au centre de consultation de Statistique Canada à:

Halifax	(1-902-426-5331)	Regina	(1-306-780-5405)
Montréal	(1-514-283-5725)	Edmonton	(1-403-495-3027)
Ottawa	(1-613-951-8116)	Calgary	(1-403-292-6717)
Toronto	(1-416-973-6586)	Vancouver	(1-604-666-3691)
Winnipeg	(1-204-983-4020)		

Un service d'appel interurbain sans frais est offert, dans toutes les provinces et dans les territoires, **aux utilisateurs qui habitent à l'extérieur des zones de communication locale** des centres régionaux de consultation.

Note of Appreciation

Canada owes the success of its statistical system to a long-standing cooperation involving Statistics Canada, the citizens of Canada, its businesses, governments and other institutions. Accurate and timely statistical information could not be produced without their continued cooperation and goodwill.

Note de reconnaissance

Le succès du système statistique du Canada repose sur un partenariat bien établi entre Statistique Canada et la population, les entreprises, les administrations canadiennes et les autres organismes. Sans cette collaboration et cette bonne volonté, il serait impossible de produire des statistiques précises et actuelles.

Symbols

The following standard symbols are used in Statistics Canada publications:

.. figures not available.

... figures not appropriate or not applicable.

– nil or zero.

-- amount too small to be expressed.

p preliminary figures.

r revised figures.

x confidential to meet secrecy requirements of the Statistics Act.

Signes conventionnels

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada:

.. nombres non disponibles.

... n'ayant pas lieu de figurer.

– néant ou zéro.

-- nombres infimes.

p nombres provisoires.

r nombres rectifiés.

x confidentiel en vertu des dispositions de la Loi sur la statistique relatives au secret.

NOTE ON CANSIM

CANSIM® (Canadian Socio-Economic Information Management System) is Statistics Canada's computerized data bank and its supporting software. Most of the data appearing in this publication, as well as many other data series are available from CANSIM via terminal, on computer printouts, or in machine readable form. Historical and more timely data, not included in this publication, are available from CANSIM.

For further information write to Marketing Division, Statistics Canada, Ottawa, K1A 0T6 or call (613) 951-8200.

® Registered Trade Mark of Statistics Canada.

NOTE CONCERNANT CANSIM

Le CANSIM® (Système canadien d'information socio-économique) est le système de Statistique Canada qui se compose d'une banque de données informatisées et de son logiciel de soutien. La plupart des données présentées dans cette publication et beaucoup d'autres données contenues dans le CANSIM peuvent être extraites par l'intermédiaire d'un terminal, sous forme d'imprimés d'ordinateur ou sous forme lisible par machine. Des données historiques et des données plus actuelles qui n'apparaissent pas dans cette publication sont disponibles de CANSIM.

Pour plus de renseignements, écrivez à la Division du marketing, Statistique Canada, Ottawa, K1A 0T6 ou téléphonez à (613) 951-8200.

® Marque déposée de Statistique Canada.

Revision

Unless otherwise stated, price indexes in this publication are subject to revision for the most recent six months shown. Any revisions beyond these limits are so indicated.

The paper used in this publication meets the minimum requirements of American National Standard for Information Sciences – Permanence of Paper for Printed Library Materials, ANSI Z39.48 – 1984.

Révisions

Sauf avis contraire, les indices de prix contenus dans la présente publication sont susceptibles d'être révisés pour les six derniers mois indiqués. Toute révision portant sur une plus longue période est indiquée.

Le papier utilisé dans la présente publication répond aux exigences minimales de l'"American National Standard for Information Sciences" – "Permanence of Paper for Printed Library Materials", ANSI Z39.48 – 1984.

HIGHLIGHTS

Industrial Product Price Index

The 12-month change in industrial prices dropped to 8.4% in May, the third decline in the last four months. On a monthly basis, the overall level of industrial prices remained unchanged. A drop in the value of the U.S. dollar hit export prices. This, combined with price declines in lumber and industrial non-ferrous primary metal products offset the increases for newsprint and gasoline.

The depreciation of the U.S. dollar (1% between April 15 and May 15) meant manufacturers selling goods priced in US dollars received fewer Canadian dollars for their products. This accounted for most of the 0.7% decline in the price level of autos, trucks and other transport equipment. It also affected exporters of lumber, pulp, paper, and non-ferrous primary metal products. The movement in the U.S. dollar reduced May's change in industrial prices from +0.2% (excluding the exchange rate effect) to zero.

In May, lumber, sawmill, and other wood product prices fell a further 1.8%. Inventory levels outweighed the effect of any increase in residential construction as interest rates moved down in Canada and the United States. The decline in lumber prices affected all softwoods and was felt across the country. The exchange rate movement accounted for about a sixth of the decline in Canadian lumber prices.

The major industrial non-ferrous primary metal products all suffered declines in May: copper and copper alloy products, -6.2%; nickel products, -6.4%; refined zinc, -4.2%; aluminum products, -0:9%. Poor auto sales, low residential construction, sales from world metal inventories and ore discoveries, all contributed to these declines.

The most significant source of upward pressure on industrial prices in the Canadian economy remained the paper and allied products sector. May's 8.1% jump in newsprint prices accounted for virtually the entire increase in the price level of the paper and paper products category. Further price increases for newsprint, to take effect in the coming months, have already been announced by some Canadian producers. World demand for newsprint remains strong at a time when the industry is already operating at full capacity. An important element in this increase is rising incomes in Asia which are encouraging demand there for newsprint.

FAITS SAILLANTS

Indice des prix des produits industriels

La variation sur 12 mois des prix industriels a chuté à 8,4%, en mai, la troisième baisse des quatre derniers mois. Le niveau d'ensemble des prix industriels est demeuré inchangé sur base mensuelle. Une baisse de la valeur du dollar US a affecté le prix des exportations. Conjugué au fléchissement du prix du bois de construction et des métaux primaires non ferreux industriels, cela a neutralisé l'augmentation pour le papier journal et l'essence.

La dépréciation du dollar US (1% face à la devise canadienne entre le 15 avril et le 15 mai) a rapporté moins de dollars canadiens aux fabricants dont les prix s'expriment en dollars U.S.. Cela explique le gros du recul de 0,7% du prix des voitures, camions et autres équipment de transport. Ce repli a aussi désavantagé les exportateurs de bois de construction, de pâte de bois, de papier, et de produits métalliques non ferreux. L'appréciation du dollar canadien par rapport au dollar US a ramené la variation des prix industriels de +0,2% (abstraction faite de l'effet du taux de change) à zéro.

En mai, les sciages, produits de scierie et autres produits divers du bois ont connu une autre diminution de 1,8%. Les niveaux des stocks ont pesé plus lourd que l'effet de toute augmentation de la construction résidentielle qu'aurait pu favoriser un repli des taux d'intérêt au Canada et aux États-Unis. La diminution du prix du bois de construction a touché tous les bois résineux et a fait sentir ses effets dans tout le pays. Le mouvement du taux de change explique environ un sixième de la baisse du prix du bois de construction au Canada.

Les prix sont demeurés faibles pour tous les principaux produits métalliques primaires non ferreux industriels: les prix du cuivre et des produits d'alliage de cuivre, -6,2%; des produits du nickel, -6,4%; du zinc raffiné, -4,2%; des produits d'aluminium, -0,9%. La médiocrité des ventes d'automobiles, la faiblesse de la construction résidentielle, la réduction des stocks mondiaux de métaux et les découvertes de minerais sont autant de facteurs qui ont contribué à ces baisses.

C'est le secteur du papier et des produits connexes qui est à l'origine du plus important effet sur les prix industriels dans l'économie canadienne. En mai, un bond de 8,1% du prix du papier journal a expliqué la quasi-totalité du relèvement du niveau des prix dans la catégorie du papier et des produits en papier. Certains producteurs canadiens ont déjà annoncé d'autres hausses du prix du papier journal pour les mois à venir. La demande mondiale de papier journal demeure vigoureuse, au moment où l'industrie fonctionne déjà à pleine capacité. Un élément important de cette conjoncture est l'augmentation des revenus en Asie, qui favorise la demande de papier journal dans cette région.

Higher prices for gasoline (+3.8%) were the other main element supporting the industrial price level in Canada. This occurred despite the May decline in crude oil prices (-2%) after their 5% jump in April.

According to the U.S. producer price index, the May increase in newsprint prices in the U.S. was much lower (+4.3% vs +8.1%) than in Canada while the gasoline price increase was noticeably higher (+7.3% vs +3.8%).

In May, the 12-month change in the prices received by manufacturers of Canadian consumer goods rose to almost 3.5%. It had been about 3% since January. The 12-month change in goods prices paid by consumers continued increasing, jumping from 2.5% in April to 3% in May. During the first quarter, the operating profits of retailers jumped by over 50% as the gap between the 12-month change in prices at the consumer and manufacturer level narrowed. Only about half of what the consumer pays goes to manufacturers, the remainder is divided between retailers, wholesalers, indirect taxes, and transporters.

La hausse du prix de l'essence (+3,8%) a été l'autre principal élément soutenant le niveau des prix industriels au Canada. Elle est survenue malgré la baisse du prix du pétrole brut (-2%) en mai, après le bond de 5% qu'il a fait en avril.

Selon l'indice des prix à la production des États-Unis, l'augmentation du prix du papier journal dans ce pays en mai a été beaucoup plus modeste (+4,3% vs +8,1%) qu' au Canada, alors que l'augmentation du prix de l'essence a été nettement plus forte (+7,3% vs +3,8%).

En mai, la variation sur 12 mois du prix que les biens de consommation canadiens ont rapporté à leurs fabricants a augmenté de près de 3,5%. Elle avait été en l'ordre de 3% depuis janvier. La variation sur 12 mois des prix payés par les consommateurs a continué de s'accroître. Elle est passée de 2,5% en avril à 3% en mai. Au premier trimestre, le bénéfice d'exploitation des détaillants a fait un bond de plus de 50% alors que l'écart des niveaux de la variation sur 12 mois entre les consommateurs et les fabricants se résorbait. Les fabricants ne reçoivent qu'environ la moitié de ce que paient les consommateurs, le reste étant partagé entre les détaillants, les grossistes, les taxes indirectes et les transporteurs.

NOTE TO USERS

The Industrial Product Price Index (IPPI) reflects prices producers receive as goods leave their plants. It does not reflect what consumers pay. Unlike the Consumer Price Index (CPI), the IPPI excludes indirect taxes and the costs (transportation, wholesale, and retail costs) that occur from the time a good leaves a plant until the final user takes possession.

Canadian producers export many goods. They often quote their prices in foreign currencies, particularly for motor vehicles, pulp, paper, and wood products. A rise or fall in the value of the Canadian dollar against the U.S. dollar therefore affects the IPPI. A 1.0% change in the value of the Canadian dollar against the U.S. dollar has been estimated to change the IPPI by about 0.2%.

NOTES AUX UTILISATEURS

L'indice des prix des produits industriels (IPPI) retrace les prix que les producteurs reçoivent au moment où les produits franchissent les portes de l'usine. Il ne retrace pas ce que le consommateur paie. Contrairement à l'indice des prix à la consommation (IPC), l'IPPI exclut les impôts indirects et tous les coûts (coûts du transport et du commerce de gros et de détail) qui surviennent lorsque le produit part de l'usine jusqu'au moment où l'utilisateur final en prend possession.

Les producteurs canadiens exportent beaucoup de biens. Ils vont souvent indiquer leurs prix en devises étrangères, en particulier dans le cas des véhicules automobiles, des pâtes de bois, du papier et des produits du bois. Les fluctuations de la valeur du dollar canadien par rapport à la devise américaine se répercuteront par conséquent sur l'IPPI. Une variation de 1,0% de la valeur du dollar canadien par rapport au dollar américain devrait, selon les estimations, se traduire par une variation d'environ 0,2% de l'IPPI.

HIGHLIGHTS

Raw Materials Price Index

The 12-month change in raw material prices fell almost to 9% in May after being above 13% for the previous six months. Raw material prices declined in May (-1.1%), the main exception being wood, which continued upwards due to the ongoing demand for pulp and paper.

In May, the only major raw materials group to show an increase was wood. Wood prices led by the ongoing demand for pulp and paper increased more than 1% in May. Compared to 12 months earlier wood prices were up almost 17%. Wood price increases do not appear to be running out of steam. Even though lumber prices declined almost 2% in May, paper price increases (almost 40% compared to 12 months earlier) have provided the strength for higher wood prices.

Canadian mills have recently been running at almost full capacity. Any weakness in the North American market can be shifted overseas where the spot market price for newsprint is significantly higher than the domestic price. Therefore, even if there is some economic slowdown in the U.S. and Canada, wood prices appear to be strong for the near future.

Non-ferrous metal prices weakened again in May. Since January, metal prices have moved down almost 11%. As well, the 12-month change in metal prices has tumbled from a high of 55% last November to a low of 21% this May.

Copper led the decline in metal prices. Copper prices that had almost doubled over the 14- month period to January 1995, dropped close to 13% from January to this May. The slowing economy and the perception that high copper prices cannot be maintained pushed prices down.

Aluminum material prices which more than doubled over the same 14-month period to January 1995 drifted down 15% from January to May. Even though prices have fallen, western world aluminum supply has been reported as still running behind demand. In Canada, there may shortly be a restart of some currently idled primary smelting capacity.

Nickel prices were up more than 135% from October 1993 to January this year. Since January, nickel prices have declined 22%. Nickel inventories have been reported at a 12-week level with demand remaining relatively strong for stainless steel in Western Europe, Japan and Southeast Asia. The recent nickel copper-cobalt discovery at Volsey Bay, Labrador may have contributed to the recent weakening of nickel prices.

FAITS SAILLANTS

Indice des prix des matières brutes

La variation sur 12 mois du prix des matières brutes s'est abaissée à près de 9% en mai, après avoir été supérieure à 13% durant les six mois précédents. Le prix des matières brutes a régressé en mai (-1,1%), la principale exception étant le bois, dont le prix a continué d'avancer à la faveur de la demande soutenue de pâte et de papier.

En mai, le seul grand groupe de matières brutes à afficher une augmentation a été le bois. Le prix du bois, stimulé par la demande soutenue de pâte et de papier, a avancé de plus de 1% en mai. Il se situait à près de 17% de plus que 12 mois plus tôt. Les majorations du prix du bois ne semblent pas près de devoir s'essouffler. Malgré un recul de 2% du prix du bois d'oeuvre en mai, l'augmentation du prix du papier (près de 40% par rapport à 12 mois plus tôt) a donné la vigueur qui a propulsé le prix du bois.

Récemment, les scieries canadiennes fonctionnaient presque à pleine capacité. Toute faiblesse du marché nord-américain peut être reportée outre-mer, où le prix du marché libre pour le papier journal est nettement supérieur au prix national. Par conséquent, malgré un certain ralentissement de l'économie aux États-Unis et au Canada, le prix du bois semble se maintenir pour l'avenir immédiat.

Le prix des métaux non ferreux a encore faibli en mai. Depuis janvier, le prix des métaux a reculé de près de 11%. De même, la variation sur 12 mois du prix des métaux a dégringolé d'un sommet de 55% en novembre dernier à un creux de 21% en mai de cette année.

Le cuivre a été le premier responsable de la baisse du prix des métaux. Le prix du cuivre, qui avait presque doublé sur la période de 14 mois se terminant en janvier 1995, a chuté de près de 13% entre janvier et mai. Le ralentissement de l'économie et la perception selon laquelle le prix du cuivre ne peut se maintenir sont les causes du repli.

Le prix de l'aluminium, qui a plus que doublé sur la même période de 14 mois menant à janvier 1995, s'est effrité de 15% de janvier à mai. Malgré la chute du prix, l'offre d'aluminium dans le monde occidental n'a toujours pas rattrapé la demande. Au Canada, on pourrait assister sous peu à une reprise d'exploitation d'une partie de la capacité de première fusion actuellement inexploitée.

Le prix du nickel a avancé de plus de 135% entre octobre 1993 et janvier de cette année. Depuis janvier, le prix du nickel a baissé de 22%. Les stocks de nickel étaient à un niveau de 12 semaines, et la demande d'acier inoxydable est demeurée relativement vigoureuse en Europe de l'Ouest, au Japon et dans le Sud-Est asiatique. La récente découverte de nickel-cuivre-cobalt à Volsey Bay, au Labrador, a peut-être contribué à l'affaissement récent du prix du nickel.

Gold prices fell almost 3% in May. A strengthened U.S. dollar and expectations of lower interest rates led commodity funds away from precious metals to bonds and other paper assets. Silver stocks, at their lowest in six years saw prices increase almost 1% in May. Demand by jewelers and silverware makers compensated somewhat the decline in the use of silver for photographic film (new silver-less film).

Lead, zinc and platinum prices all declined in May. The slowing economy, in particular the sluggish automobile sector contributed to the weakening of these metal prices.

Crude oil prices after increasing nearly every month since December 1994 fell 2% in May. Prices were up 11% over the last 12 months. Higher gasoline inventory reports in May reduced somewhat the upward pressure on higher crude oil prices.

Cattle prices down again in May (-5%) have declined almost 13% since February. Higher hog prices in May (+6%) offset somewhat the overall drop in hog prices since February (-8%). The weakness in cattle prices has been attributed to the excess supply of available animals and of beef in cold storage. Hog prices strengthened in May, partly because fewer animals than usual were brought to market. This has caused meat packers to pay higher prices for remaining animals.

Vegetable product prices declined almost 1% in May as higher prices for grains (+6%) were more than offset by lower prices for oilseeds (-5.5%), unrefined sugar (-10%), rubber and coffee.

Wheat, barley and oats prices were up in May due to poor planting and growing conditions, both in Canada and the United States.

Oilseed prices in May were down more than 5%. Lower canola prices were partly offset by higher soybean prices. Canola prices have dropped 21% compared to 12 months earlier. This decline can be attributed to lower demand from Canadian and Japanese oilseed crushers. Soybean prices were up in May due to poor planting conditions, as well as from speculations that China might make a large purchase of soybean oil.

Le prix de l'or s'est replié de près de 3% en mai. Le raffermissement du dollar US et les prévisions de baisse des taux d'intérêt ont détourné les fonds de contrats de marchandises, jusqu'à là consacrés aux métaux précieux, vers les obligations et d'autres papiers financiers. Les stocks d'argent n'ont jamais été plus bas en six ans, et les prix ont monté de près de 1% en mai. La demande des bijoutiers et des fabricants d'argenterie a tempéré la diminution de l'utilisation de l'argent dans les films photographiques (nouveaux films sans haloïde d'argent).

Les prix du plomb, du zinc et du platine ont tous diminué en mai. Le ralentissement de l'économie, et en particulier la paresse du secteur automobile, ont contribué à l'affaiblissement du prix de ces métaux.

Après avoir augmenté presque chaque mois depuis décembre 1994, le prix du pétrole brut a chuté de 2% en mai. Il est de 11% plus élevé que 12 mois plus tôt. Les rapports faisant état d'augmentations des stocks d'essence en mai ont quelque peu tempéré l'effet d'entraînement du prix du pétrole brut.

Suite à une nouvelle baisse en mai (-5%), le prix des bovins accuse un recul de 13% depuis février. L'avance du prix des porcs en mai (+6%) a compensé dans une certaine mesure la baisse globale du prix du porc depuis février (-8%). La faiblesse du prix des bovins a été attribuée à une offre excédentaire d'animaux disponibles et de boeuf en entreposage frigorifique. Le prix du porc s'est raffermi en mai, en partie parce qu'il y a eu moins d'animaux que d'habitude mis sur le marché. Cela a obligé les abattoirs à payer plus cher les autres animaux.

Le prix des légumes s'est replié de presque 1% en mai, l'augmentation du prix des céréales (+6%) ayant été largement compensée par la diminution du prix des graines oléagineuses (-5,5%), du sucre non raffiné (-10%), du caoutchouc et du café.

Les prix du blé, de l'orge et de l'avoine ont augmenté en mai, à cause des mauvaises conditions de plantation et de croissance au Canada comme aux États-Unis.

Le prix des graines oléagineuses a diminué de plus de 5% en mai. Le fléchissement du prix du canola a été partiellement compensé par l'avance de celui du soja. Les prix du canola ont chuté de 21% par rapport à 12 mois plus tôt. Ce repli peut être attribué à une diminution de la demande des huiliers canadiens et japonais. Le prix des fèves de soja a subi une hausse en mai à cause des mauvaises conditions de plantation, ainsi que des conjectures selon lesquelles la Chine pourrait faire un important achat d'huile de soja.

NOTE TO USERS

The Raw Materials Price Index (RMPI) reflects the prices paid by Canadian manufacturers for key raw materials. Many of these prices are set in a world market. Also, unlike the Industrial Product Price Index, the RMPI includes goods that are not produced in Canada.

NOTE AUX UTILISATEURS

L'indice des prix des matières brutes est représentatif du prix que les fabricants canadiens paient pour les principales matières brutes. Un grand nombre de ces prix sont fixés sur les marchés mondiaux. De plus, contrairement à l'indice des prix des produits industriels, l'IPMB inclut des biens qui ne sont pas produits au Canada.

HIGHLIGHTS

Consulting Engineering Services Price Indexes

Based on preliminary data, prices of consulting engineering services sold in Canada and abroad increased 1.1% between 1993 and 1994 (Text Table IV). This increase reflected the recovery of domestic demand for engineering services following the last recession. Domestic prices rose 1.2% compared with a decrease of 0.6% for prices charged to foreign clients. Price increases for services in building, other industrial and environmental fields of specialization led the rise in domestic price index.

Prices of consulting engineering services have risen annually since 1989, although at a decreasing rate between 1989 and 1993. The annual increase in domestic prices for these services shrank steadily from a high of 3.6% between 1989 and 1990 to a low of 0.9% over the period 1992-93. Recession and fiscal restraint led to the deferral of capital construction expenditures, reducing the amount of new work available to consulting engineering firms in Canada.

A turnaround in demand for consulting engineering services contributed to the 1.2% increase in their domestic market price over the 1993-94 period. This was the first time since 1989 that the prices for these services accelerated. Rising prices for engineering services in the fields of buildings (+2.7%) , other industrial (+2.9%) and other environmental services (+3.6%) were largely responsible for the upward movement of the domestic price index. Power generation and transmission projects on the other hand declined 0.6%.

Higher prices for engineering services in Ontario (+1.3%) and British Columbia (+2.7%) accounted for over two-thirds of the increase in the domestic price index between 1993 and 1994 (Text Table V). Prices in the Atlantic market fell by 0.8%.

FAITS SAILLANTS

Indices des prix des services d'ingénierie conseil

D'après les données préliminaires, les prix des services d'ingénierie conseil vendus au Canada et à l'étranger ont augmenté de 1,1% entre 1993 et 1994 (Tableau explicatif IV). Cette augmentation est le reflet de la reprise de la demande intérieure pour les services d'ingénierie conseil après la dernière récession. Le prix des services pour le marché intérieur a augmenté de 1,2% par rapport à la baisse de 0,6% pour les clients étrangers. Ce sont surtout les augmentations de prix des services dans les domaines d'activité tel que le bâtiment, les autres services industriels et les autres services environnementaux qui ont fait augmenter l'indice de prix sur le marché intérieur.

Depuis 1989, le prix des services d'ingénierie conseil a augmenté tous les ans, mais à un rythme décroissant de 1989 à 1993 . L'augmentation annuelle de prix des services sur le marché intérieur a continuellement diminué partant de 3,6% de 1989 à 1990 jusqu'à 0,9% pour la période de 1992 à 1993. La récession et certaines contraintes fiscales ont reporté les dépenses d'investissements dans le secteur de la construction à plus tard ce qui a entrainé une baisse de la demande des services auprès des entreprises d'ingénierie conseil au Canada.

Pour la période de 1993 à 1994, une reprise de la demande des services d'ingénierie conseil a contribué à faire augmenter de 1,2% le prix des services sur le marché intérieur. C'est la première fois depuis 1989 que la hausse des prix de ces services va en s'accélérant. Ce sont surtout les hausses de prix des services pour les domaines d'activité tel que le bâtiment (+2,7%), les autres services industriels (+2,9%) et les autres services environnementaux (+3,6%) qui sont responsables de la montée de l'indice de prix sur le marché intérieur. Les projets dans le domaine d'activité de la production et du transport d'énergie électrique ont diminué par contre de 0,6%.

Entre 1993 et 1994, des prix plus élevés pour les services d'ingénierie conseil en Ontario (+1,3%) et en Colombie-Britannique (+2,7%) expliquent l'augmentation de plus du deux tiers de l'indice de prix sur le marché intérieur (Tableau explicatif V). Les prix du marché de la région de l'Atlantique ont chuté de 0,8%.

Indices de prix des services d'ingénierie conseil par marché régional (1992 = 100)

	Index / Indice		Percentage change / Variation proportionelle	Contribution to Percentage Change[1] / Contribution à la variation proportionelle[1]
	1993[r]	1994[p]	1993 to/à 1994	1993 to/à 1994
Total engineering, Canada Total ingénierie, Canada	**100.9**	**102.2**	**1.2**	**1.19**
Atlantic/Atlantique	99.7	99.0	-0.8	-0.06
Quebec/Québec	101.7	102.6	0.9	0.20
Ontario	100.7	102.0	1.3	0.44
Manitoba/Saskatchewan	101.4	102.2	0.8	0.07
Alberta	99.8	101.0	1.2	0.16
British Columbia/ Colombie-Britannique	101.5	104.3	2.7	0.38

[p] *Preliminary figures. Nombres provisoires.*
[r] *Revised figures. Nombres rectifiés .*
[1] *This shows the amount each regional index would move the total Canada index in the absence of changes in all other regional indexes. Ceci démontre le montant du mouvement que chaque indice régional aura sur l'indice total du Canada avec l'absence de changements aux autres indices régionaux.*

TABLE 1. Summary of Recent Price Movements

TABLEAU 1. Sommaire des récents mouvements des prix

		Indexes / Indices		Percentage change from / Variation en pourcentage		
		May 95 (1) / Mai 95 (1)	April 95 / Avril 95	April 95 / Avril 95	February 95 / Février 95	May 94 / Mai 94
2	**All commodities – Total – Tous les produits**	**127.7**	**127.7**	**0.0**	**0.4**	**8.4**
	Meat, fish & dairy products – Viande, poisson & prod. laitier	119.2	119.0	0.2	-0.8	1.3
	Fruits, veg., feed, misc. food prod. – Fruits, lég., alim. anim. & divers	124.1	124.1	0.0	0.3	2.1
	Beverages – Boissons	127.1	127.4	-0.2	-0.2	0.8
	Tobacco & tobacco products – Tabac & produits du tabac	172.3	169.2	1.8	3.2	4.9
	Rubber, leather, plastic fab. prod. – Prod. en caout., en cuir, mat. pla.	127.1	127.3	-0.2	0.8	9.4
	Textile products – Produits textiles	116.2	116.3	-0.1	-0.1	3.9
	Knitted products & clothing – Produits en tricot & vêtements	117.9	118.0	-0.1	0.4	2.1
	Lumber, sawmill, other wood prod. – Sciages, prod. de scierie & divers	152.0	154.8	-1.8	-5.5	-1.8
	Furniture & fixtures – Meubles & articles d'ameublement	124.1	123.7	0.3	0.5	3.2
	Paper & paper products – Papier & produits connexes	153.0	149.5	2.3	9.1	38.6
	Printing & publishing – Impression & édition	172.0	169.0	1.8	5.7	23.5
	Primary metal products – Produits métalliques primaires	133.6	135.9	-1.7	-4.4	17.7
	Metal fabricated products – Semi-produits métalliques	126.8	126.8	0.0	1.1	7.8
	Machinery & equipment – Machines & matériel	126.0	126.1	-0.1	0.2	3.5
	Autos, trucks, other transp. eqp. – Voitures, camions & autres	118.9	119.7	-0.7	-1.9	1.9
	Elec. & communications prod. – Appareils élect. & de télécom.	117.8	118.0	-0.2	0.2	3.0
	Non metallic mineral products – Produits minéraux non métallique	122.0	122.1	-0.1	0.7	5.3
	Petroleum & coal products – Produits du pétrole & du charbon	97.7	96.2	1.6	3.0	9.9
	Chemicals, chemical products – Produits chimiques	137.1	137.4	-0.2	1.9	12.7
	Misc. manufactured products – Produits manufacturiers divers	122.8	122.8	0.0	0.8	4.2
4	**Intermediate goods – Produits semi-finis**	**131.2**	**131.2**	**0.0**	**0.7**	**12.1**
	First-stage intermediate goods – Produits semi-finis de première étape	144.8	146.2	-1.0	0.3	26.5
	Second-stage intermediate goods – Produits semi-finis de deuxième étape	127.3	126.9	0.3	0.8	8.2
	All finished goods – Tous les produits finis	**122.3**	**122.3**	**0.0**	**-0.1**	**2.8**
	Finished foods & feeds – Aliments de consommation et alim. pour anim.	122.8	122.6	0.2	0.0	1.8
	Capital equipment – Matériel capitalisé	124.1	124.4	-0.2	-0.7	2.4
	All other finished goods – Tous autres produits finis	121.1	120.9	0.2	0.2	3.5
	All manufacturing industries(2) – Industries manufacturières(2):					
3	**Gross weighted (80 SIC)(2) – Pondération brute (80 CTI)(2)**	**127.7**	**127.7**	**0.0**	**0.4**	**8.4**
6	**Raw materials – Total – Ensemble des matières brutes**	**132.4**	**133.9**	**-1.1**	**0.2**	**8.9**
	Raw materials – Total – Excl. mineral fuels – Ensemble des matières brutes, sauf combustibles minéraux	**140.7**	**141.8**	**-0.8**	**-0.7**	**8.6**
	Vegetable products – Substances végétales	123.6	124.6	-0.8	-1.2	2.8
	Animals & animal products – Animaux & substances animales	108.4	109.2	-0.7	-2.9	-1.2
	Wood – Bois	233.6	230.5	1.3	6.2	16.5
	Ferrous material – Matières ferreuses	120.2	120.7	-0.4	-3.8	3.4
	Non-ferrous metals – Métaux non ferreux	136.8	143.4	-4.6	-6.9	20.6
	Non metallic minerals – Minéraux non métalliques	105.5	105.4	0.1	0.7	1.6
	Mineral fuels – Combustibles minéraux	114.6	116.9	-2.0	2.4	9.7

Note: Indexes for the most recent six months shown are subject to revision.
Nota: Les indices figurant pour les six mois les plus récents sont sujets à révision.

(1) These indexes are preliminary.
(1) Ces indices sont provisoires.

(2) The aggregation of indexes by commodities or by industries should produce the same grand total. When these totals occasionally differ due to rounding, the All Commodities Index shall be regarded as authoritative, and the All Manufacturing Industries is adjusted to match.
(2) L'agrégation des indices par produits ou par industries devrait résulter en un même grand total. Lorsque ces totaux diffèrent occasionnellement en raison de l'arrondissement, l'Indice total – Tous les produits devra être considéré comme celui qui fait autorité, et l'Indice total – Toutes les industries manufacturières sera posé égal.

TABLE 2. Industrial Product Price Indexes, by Commodity and Commodity Aggregations

TABLEAU 2. Indices des prix des produits industriels, par produits et agrégations de produits

Note: Indexes for the most recent six months shown are subject to revision.
Nota: Les indices figurant pour les six mois les plus récents sont sujets à révision.

(1) The bottom line in each series title block may contain, in order from left to right, the following: the CANSIM Databank code number (d nnnnnn), a numeric descriptor, a coverage measure, and a variability measure. The numeric descriptor is of the order ss-mm-nn-pppp-rr where
ss indicates the S-level commodity code (from 9 to 28)
mm indicates the M-level commodity code (from 14 to 43, 45 to 69)
nn indicates either a split of the M-level commodity, or 91, which indicates a special aggregation or 99, which indicates special details.
pppp indicates the PCG code (except for some special aggregations which include several PCGs).
rr indicates a split of a PCG.
The coverage measure for an elemental index is a symbol: E indicates a fully designed sample, S indicates an abbreviated sample, P indicates an indirect estimate. For a composite index the percentage of the coverage which is estimated from direct surveys (E + S) is given, occasionally these coverage measures are rounded to the nearest 5% to preserve confidentiality. The variability measure is given for some indexes to indicate the relative stability of the index estimate due to sampling. The most stable indexes are marked A, the least stable, D. For further information order Industrial Product Price Indexes 1981 = 100, Concepts and Methods (Catalogue 62-556).

(1) En lisant de gauche à droite, la ligne en-dessous de chaque titre des séries présente, en tout ou en partie, l'information suivante: le numéro de code "Databank" de CANSIM (D nnnnnn), un numéro d'identification numérique, une mesure du degré de couverture et une mesure de la variabilité. Le numéro d'identification numérique prend la forme générale ss-mm-nn-pppp-rr où:
ss indique le code du niveau S des produits (de 9 à 28)
mm indique le code du niveau M des produits (de 14 à 43, 45 à 69)
nn indique soit une composante du niveau M des produits, ou prend la valeur de 91 pour les agrégats spéciaux, ou de 99 pour les indices particuliers.
pppp indique le code GPP (sauf pour certains agrégats spéciaux qui comprennent plusieurs GPP)
rr indique une composante d'un GPP.
La mesure du degré de couverture pour les indices élémentaires est présentée à l'aide d'un symbole: E indique un échantillonnage exhaustif, S indique un échantillonage sommaire et P indique une estimation indirecte. Pour les indices composites, la donnée en pourcentage représente une estimation du degré de couverture par échantillonnage direct (E + S). Ces mesures du degré de couverture sont parfois arrondies au 5% le plus près afin d'assurer la confidentialité. La mesure de la variabilité, donnée pour un certain nombre d'indices, indique la stabilité relative de l'indice en tant qu'estimation basée sur un échantillon. Les indices les plus stables sont cotés A, les moins stables, D. Pour plus de renseignements, commandez le document de référence: Indices des prix des produits industriels 1981 = 100, concepts et méthodes (n° 62-556 au catalogue).

TABLE 3. Industrial Product Price Indexes, by Industry and Industry Groups(1)

Note: Indexes for the most recent six months shown are subject to revision.

Nota: Les indices figurant pour les six mois les plus récents sont sujets à révision.

(1) The aggregation of indexes by commodities or by industries should produce the same grand total. When these totals occasionally differ due to rounding, the All Commodities Index shall be regarded as authoritative, and the All Manufacturing Industries is adjusted to match.

(1) L'agrégation des indices par produits ou par industries devraient résulter en un même grand total. Lorsque ces totaux diffèrent occasionnellement en raison de l'arrondissement, l'indice total - tous les produits devra être considéré comme celui qui fait autorité, et l'indice total - toutes les industries manufacturières sera posé égal.

(2) The numeric code to the right of the CANSIM databank number on the last line of each series is the 1980 Standard Industrial Classification (SIC) code. An explanation of the percentage figures (coverage measure) shown to the right of the SIC can be found at the end of Table 2. These coverage measures are rounded to the nearest 5% to preserve confidentiality.

(2) Le code numérique à la droite du numéro Databank de CANSIM apparaissant à la ligne du bas de chaque série est le code de la Classification type des industries (CTI) de 1980. Une explication des données en pourcentage (mesure de degré de couverture) apparaissant à la droite du code CTI est disponible à la fin du tableau 2. Ces mesures de degré de couverture sont arrondies au 5% le plus près afin de préserver la confidentialité.

TABLE 4. Industrial Product Price Indexes, by Stage of Processing

TABLEAU 4. Indices des prix des produits industriels par étape de transformation

Nota: Les indices de 1989-93 ont été révisé et les indices de 1994 sont provisoires.

EXPLANATION OF METHODS USED AND ADDITIONAL SOURCES FOR INDUSTRIAL PRICE INDEXES

Industrial Product Price Indexes, 1986 = 100

The Industrial Product Price Indexes (IPPI) measure price changes for major commodities sold by Canadian manufacturers. Elemental indexes are calculated for 1314 Principal Commodity Group (PCG) outputs as defined in the 1986 Input/Output (I/O) table. Weights used to aggregate commodity indexes are taken from the output or "Make" matrix of the I/O system which provides an integrated set of commodity values for all manufacturing industries.

Directly surveyed commodities are supported by formal sampling procedures and a quality rating is presented for commodities and aggregations of commodities. Such indexes are derived from prices reported for the 15th of the month or the nearest prior business day for comparable transactions.

Selected indexes are published about four weeks after the reference month in the *Daily Bulletin* (Catalogue 11-001) following a pre-announced schedule of release dates. Simultaneously, all series are available from CANSIM or on request. Catalogue 62-011, *Industry Price Indexes,* is released about four weeks after the Daily Bulletin release. Each series is identified with a CANSIM D number and with a commodity (PCG) or industry (SIC) identifier. Each release of numbers is subject to revision for six months, i.e., when a July index is released, the index for the preceding January becomes final. Exceptions to this rule are announced.

Price Surveys

About 10,000 prices are collected monthly from about 3,500 producers for goods sold, which are valued at the boundary of the establishment, wherein the cost of taxes collected at that point and transportation provided by public carriers beyond that point are excluded. Prices are reported for finely specified transactions wherein both the good and terms of sale are identified. Such collections are instituted for important commodities. Expansions are made to the samples where price movement has a regional dimension or where there are important flows of goods to export markets.

Sampling for any directly surveyed elemental index is usually done by a formal probability sampling procedure, wherein important producers are "must take" respondents and a random selection is taken from the smaller producers. Such samples are redrawn on a regular cycle as dictated by changes in the market. A given elemental index is usually supported by 12 to 15 price quotes, although some are derived from as few as 8 quotes or as many as 30 quotes.

EXPLICATION DES MÉTHODES UTILISÉES ET SOURCES SUPPLÉMENTAIRES DES INDICES DES PRIX INDUSTRIELS

Indices des prix des produits industriels, 1986 = 100

Les indices des prix des produits industriels (IPPI) mesurent les variations des prix des principaux produits vendus par les fabricants canadiens. Les indices élémentaires sont calculés pour 1314 groupes principaux des produits (GPP) tels que définis dans les tableaux d'entrées-sorties de 1986. Les poids servant à agréger les indices des produits proviennent de la matrice des sorties ou de "production" des tableaux d'entrées-sorties. Cette matrice présente un ensemble intégré de valeurs pour les produits à l'intérieur de l'ensemble des industries manufacturières.

Les produits faisant directement l'objet d'un sondage sont basés sur des procédures d'échantillonnage formelles, et une cote de qualité est présentée pour les produits et les agrégats de produits. Ces indices sont calculés à partir des prix déclarés pour le 15 du mois, ou le jour ouvrable précédent le plus proche pour des transactions comparables.

Un certain nombre d'indices sont publiés environ quatre semaines après la fin du mois de référence dans le Quotidien (n° 11-001F au catalogue), selon un calendrier de publication préalablement établi. Simultanément, toutes les séries sont disponibles dans CANSIM ou sur demande. La publication n° 62-011 au catalogue, *Indices des prix de l'industrie,* paraît quatre semaines environ après le communiqué dans le *Quotidien.* Chaque série est identifiée par un numéro D de CANSIM et par un identificateur de produits (GPP) ou de branche d'activité (CTI). Les chiffres publiés pour les six derniers mois sont sujets à révision. Ainsi, lorsque l'indice de juillet est publié, l'indice pour le mois de janvier précédent devient final. Les exceptions à cette règle sont signalées.

Enquêtes des prix

Environ 10,000 prix sont recueillis chaque mois auprès d'environ 3,500 producteurs pour des biens vendus qui sont évalués à la limite de l'établissement, de sorte que les taxes prélevées à ce point et le coût du transport fourni par les transporteurs communs au-delà de ce point sont exclus. Les prix sont relevés pour des transactions à un niveau très détaillé, qui permet d'identifier le bien et les conditions de vente. De tels relevés sont institués pour les produits importants. Des élargissements sont apportés aux échantillons pour lesquels le mouvement des prix a une dimension régionale, ou pour lesquels il existe un important marché pour l'exportation.

L'échantillonnage pour tout indice élémentaire faisant directement l'objet d'un sondage se fait habituellement par une méthode d'échantillonnage probabiliste, selon laquelle les producteurs importants sont des répondants "obligatoires", tandis que l'on procède à une sélection aléatoire des producteurs moins importants. Ces échantillons sont reconstruits régulièrement, suivant l'évolution du marché. Un indice élémentaire donné repose habituellement sur 12 à 15 prix, bien que certains peuvent utiliser aussi peu que 8 prix, ou jusqu'à 30 prix.

About 700 of the 1314 PCGs in the manufacturing sector are accommodated by direct survey and these account for about 85% of the value of manufacturing output in 1986. The price movement for the remaining 600 PCGs is estimated indirectly from either directly priced PCGs or through borrowing price movement from other price series.

Environ 700 des 1314 GPP du secteur de la fabrication font l'objet d'une enquête directe, qui couvrent environ 85% de la valeur de la production manufacturière en 1986. Le mouvement des prix des 600 GPP restants est estimé indirectement à partir de GPP faisant directement l'objet d'un sondage, ou en empruntant le mouvement des prix d'autres séries de prix.

Weight Base

Commodity and industry weights are taken from the "Make" matrix of the 1986 Input/Output table which, in turn, is derived from 1986 values reported for the Census of Manufacturers and edited to conform to the 1980 Standard Industrial Classification. Within-commodity weights can change in December of each year to reflect major changes in production patterns.

Sources des poids

Les poids des produits et des branches d'activités proviennent de la matrice "production" du tableau d'entrées-sorties de 1986, laquelle à son tour est établie à partir des valeurs de 1986 déclarées pour le recensement des manufactures, et rectifiées afin d'être conforme à la Classification type des industries de 1980. Les poids internes des produits peuvent changer en décembre de chaque année afin d'appréhender les changements importants dans les schémas de la production.

Formula

Chained series of fixed weighted price indexes are calculated by a linking procedure whereby more recent varieties and changes to establishments are introduced systematically, as required, in December of each year. Weights from the commodity level through higher levels of aggregation are held constant.

The general formula used for the main aggregations describes the price movement of a specified group of commodities where w^i are the values of the output of each commodity:

Formule

Les séries en chaîne des indices de prix à pondération fixe sont calculées par une méthode de raccordement suivant laquelle les plus récentes variétés et les changements au niveau de l'univers des entreprises sont incorporés systématiquement, selon les besoins, en décembre de chaque année. Toutefois, les pondérations du niveau des produits jusqu'aux niveaux plus élevés d'agrégation sont maintenues constantes.

La formule générale servant au calcul des agrégations principales décrit les mouvements de prix d'un groupe donné de produits, dans laquelle w^i sont les valeurs de la production de chaque produit:

$$P_{t/o}^{(agg)} = \sum_i \frac{w^i}{\sum w^i} \cdot P_{t/o}^i$$

$P_{t/o}^{(agg)}$	denotes the composite price index movement between the base period o and time t for the defined aggregate;
w^i	is the transaction value of the element i in the base period;
$P_{t/o}^i$	is the price index for element i, meaning its price change from the base period to time t;
Σ_i	indicates summation over all elements i in the defined aggregate.

$P_{t/o}^{(agg)}$	dénote le mouvement de l'indice composite de prix entre la période de référence o et la période t pour l'agrégat défini;
w^i	est la valeur de transaction de l'élément i au cours de la période de référence;
$P_{t/o}^i$	est l'indice de prix de l'élément i, désignant sa variation de prix entre la période de référence et la période t;
Σ_i	signifie la sommation de tous les éléments i dans l'agrégat défini.

Historical Data

Historical series on the 1986 base for the Industry Price Indexes are available on CANSIM. The historical series are computed for the industry indexes classified under the 1980 Standard Industrial Classification (SIC) and for commodity indexes classified under the Principal Commodity Groups (PCG) classification. The historical series were obtained by linking together movements from the 1986-based Industrial Product Price Indexes (IPPI) series and the corresponding 1981-based Industrial Product Price Indexes (IPPI) series, using the year 1986 as the linking period. An explanatory note on the methods used to compute the historical series, as well as a set of concordance tables between both set of IPPI series are available to the public.

Reference Documents

62-558 Industry Price Indexes, 1986 = 100: Users' Guide, $40.00.

This publication describes briefly the economic content of the series and presents a short description of different aggregations produced. In the tables the weighting patterns for both commodities and commodity groupings are shown. Descriptions of the characteristics of the elemental indexes are provided. Comments on index use are also provided.

62-556 Industrial Product Price Indexes, 1981 = 100, Concepts and Methods, $25.00.

This publication describes the economic content of the series within the framework of the system of national accounts and describes how this affects price index methodology. Sampling and pricing methods are described, as are index calculation and aggregation procedures.

A glossary of terms is also provided.

For further details, please contact Prices Division, Statistics Canada, Ottawa, Ontario K1A 0T6, telephone 951-3350, facsimile (613)951-2848.

Données historiques

Les séries historiques sur la base 1986 pour les Indices des prix de l'industrie sont disponibles sur CANSIM. Les séries historiques sont calculées pour les indices des industries suivant la Classification type des industries (CTI) de 1980 et pour des indices des produits suivant la classification des Groupes principaux des produits (GPP). Les séries historiques furent obtenues en raccordant ensemble les mouvements des séries des indices des prix des produits industriels (IPPI) basées sur 1986 et des séries correspondantes des indices des prix des produits industriels (IPPI) basées sur 1981, l'année 1986 ayant servi de période de raccordement. Une note explicative sur les méthodes utilisées pour calculer les séries historiques de même qu'un ensemble de tableaux montrant les concordances entre les deux ensembles de séries IPPI sont disponibles au public.

Documents de référence

62-558 Indices des prix de l'industrie, 1986 = 100: Guide aux utilisateurs, 40,00 $.

Cette publication précise sommairement le contenu économique des séries dans un cadre général, de même qu'une brève description des différentes structures d'agrégation. Les tableaux contiennent les schémas de pondération à la fois pour les produits et les agrégats de produits. Y figurent également une description des caractéristiques des indices élémentaires. La publication contient des commentaires sur l'utilisation des indices.

62-556 Indices des prix des produits industriels, 1981 = 100, Concepts et méthodes, 25,00 $.

Cette publication précise le contenu économique des séries dans le cadre général du système des comptes nationaux, et son impact sur la méthodologie des indices de prix. Elle contient une description des méthodes d'échantillonnage et d'observation des prix, de même que des méthodes de calcul et d'agrégation des indices.

La publication contient également un glossaire.

RAW MATERIALS PRICE INDEXES (1986 = 100)

The Raw Materials Price Indexes (RMPI) measure price changes for the purchase of raw materials by Canadian industry. The term "raw material" refers either to a commodity that is sold for the first time after being extracted from nature, or a substitutable recycled product (e.g. metal scrap). For example wheat is considered as a raw material, but wheat flour is not, iron ore is but not pig iron, coal but not electricity. Approximately eighty commodities are priced in the index, grouped into seven major components.

The index and the major group indexes, on a 1986 time base, are published monthly in the Daily Bulletin approximately four weeks after the end of the reference month. They are also available at that time on CANSIM in matrix 2009.

These indexes are a continuation of the previously published Raw Materials Price Indexes, 1981 = 100. The new, 1986 = 100 indexes can be linked with their equivalents in the 1981 = 100 series using the link factors which were released in the July 1990 issue and repeated in the December issue of this publication.

The index covers purchases of domestically produced and imported goods by Canadian industry, generally for further processing, and does not cover exports or flows of raw materials directly to final demand (principally foodstuffs). For example, potatoes bought by food processing manufacturers (for the manufacture of potato chips, or frozen french fries) are included in the index, but those bought by consumers directly are not.

As a purchasers' price index, prices should include all charges purchasers incur to bring a commodity to the establishment gate. Thus transportation charges, taxes net paid and custom duties are all included. So also are the effects of subsidies, if any are paid to the purchaser.

While prices are ideally collected from the purchaser, there are several cases where other well known prices are used instead: for example, marketing board prices for eggs and milk, and stockyard prices for some livestock. In a few cases, where data for unprocessed materials are not available, prices are taken for a similar commodity at the next stage of processing as occured for some non-ferrous metals. A detailed description of the characteristics of prices for any commodity is available from Prices Division on request.

INDICES DES PRIX DES MATIÈRES BRUTES (1986 = 100)

Les indices des prix des matières brutes (IPMB) mesurent les variations des prix d'achat des matières brutes par les industries canadiennes. L'expression "matières brutes" désigne soit un produit vendu pour la première fois après son extraction de la nature, soit un produit substitut recyclé (tel les déchets de métaux). Ainsi, le blé est considéré comme une matière brute, mais non la farine de blé, le minerai de fer mais non la fonte en gueuses, le charbon mais non l'électricité. Les prix d'environ quatre-vingt produits, regroupés en sept composantes principales, sont recueillis aux fins de l'indice.

L'indice d'ensemble et les indices des composantes principales, ayant comme période de référence 1986, sont publiés mensuellement dans le Quotidien de Statistique Canada, environ quatre semaines après la fin du mois de référence. Ces indices sont également disponibles dans la matrice 2009 de CANSIM.

Ces indices constituent la suite des Indices des prix des matières brutes, 1981 = 100, précédemment publiés. Les nouvelles séries basées 1986 = 100 peuvent être raccordées à leurs séries équivalentes basées 1981 = 100 en utilisant les facteurs de raccordement. Ces derniers sont publiés dans le numéro de juillet 1990, et répétés dans le numéro de décembre de la présente publication.

L'indice couvre les achats par les industries canadiennes de biens produits au Canada et de biens importés, en vue d'une transformation subséquente. L'indice ne couvre cependant pas les exportations, ni les matières brutes qui se rendent directement à la demande finale (principalement les denrées alimentaires). Par exemple, les pommes de terre achetées par les fabricants de produits alimentaires (pour la production de croustilles ou de pommes de terre congelées) sont pris en compte dans l'indice, alors que celles directement achetées par les consommateurs ne le sont pas.

Comme il s'agit d'un indice des prix d'achat, les prix devraient comprendre tous les frais supportés par l'acheteur pour faire parvenir le produit à la porte de l'établissement. Les frais de transport, les taxes nettes payées et les droits de douane, de même que les effets de toute subvention versée à l'acheteur, sont donc incorporés aux prix.

Bien qu'idéalement, les prix sont directement recueillis auprès des acheteurs, il existe en pratique un certain nombre de cas où des prix provenant d'autres sources bien connues sont utilisés: par exemple, les prix des offices de commercialisation des oeufs et du lait, les prix des parcs à bestiaux. Dans un certain nombre de cas où les données pour les matières non transformées ne sont pas disponibles, les prix sont prélevés pour un produit semblable à l'étape suivante de transformation. Tel est le cas notamment pour certains métaux non ferreux. La Division des prix fera parvenir sur demande une description détaillée des caractéristiques des prix d'un produit donné.

Prices collected each month are those in effect on the 15th of the month or the nearest prior business day. In a few cases, prices used are averages for the week which includes the 15th. Prices are reported directly to Statistics Canada or are taken from trade publications or from publications of other government departments.

Weights were derived from the 1986 Input/Output tables which provide values at purchasers prices of commodities purchased as intermediate inputs.

Indexes for aggregates of individual raw materials are calculated according to the following formula:

Les prix recueillis chaque mois sont ceux en vigueur le 15 du mois ou le jour ouvrable qui le précède immédiatement. Dans certains cas, les prix relevés représentent la moyenne des prix de la semaine englobant le 15 du mois. Les prix sont soit déclarés directement à Statistique Canada, soit tirés de revues spécialisées ou de publications d'autres organismes gouvernementaux.

Les pondérations furent dérivées des tableaux d'entrées-sorties de 1986, qui fournissent les valeurs aux prix d'achat des produits acquis à titre d'entrées intermédiaires.

Les indices pour les agrégats de matières brutes individuelles sont dégagés à l'aide de la formule suivante:

$$P_{t/o}^{(agg)} = \sum_i \frac{w^i}{\sum w^i} \cdot P_{t/o}^i$$

$P_{t/o}^{(agg)}$	denotes the composite price index movement between the base period o and time t for the defined aggregate;
w^i	is the transaction value of the element i in 1986;
$P_{t/o}^i$	is the price index for element i, meaning its price change from the base period o to time t;
Σ_i	indicates summation over all elements i in the defined aggregate.

$P_{t/o}^{(agg)}$	dénote le mouvement de l'indice composite de prix entre la période de référence o et la période courante t pour l'agrégat spécifié;
w^i	est la valeur de transaction de l'élément i en 1986;
$P_{t/o}^i$	est l'indice de prix de l'élément i, c'est-à-dire son changement de prix de la période de référence o à la période courante t;
Σ_i	indique la sommation sur tous les éléments i faisant partie de l'agrégat spécifié.

Within individual commodity indexes, the prices are weighted according to their market share in a recent year. In a few instances, where data are not available, the price quotations are equally weighted.

À l'intérieur des indices individuels des produits, les prix sont pondérés selon leurs parts du marché pour une année récente. Dans quelques cas où les données ne sont pas disponibles, les cotes de prix ont des pondérations équivalentes.

ELECTRIC POWER SELLING PRICE INDEXES (NON-RESIDENTIAL), 1986 = 100

Electric Power Selling Price Indexes are published on a regional and provincial basis for two broad industrial customer categories of sales; for bills less than 5000 KW and for sales of 5000 KW or more. Prices are reported by electric utilities for non-interruptible power contracts with manufacturing, service, and other Canadian industrial customers. Monthly prices are collected from all major generating and distributing utilities three times a year. The resulting indexes are released with other monthly Industry Price Indexes for April, August and December of each year. The indexes have 1986 as a time reference base and the weights used are 1986 company revenues from sales of electricity, as collected by Prices Division.

The formula used to calculate the Electric Power Selling Price Indexes is a fixed weighted index formulation, which is the same as that described for the Industrial Product Price Indexes, 1986 = 100, technical notes presented above. The indexes are available on CANSIM in matrix 2020. Indexes for the current year and the previous year are subject to revision.

These indexes are a continuation of the previously published Electricity Selling Price Indexes, 1981 = 100. The new, 1986 = 100 indexes can be linked with their equivalents in the 1981 = 100 series using the link factors which were released in the July 1990 issue and repeated in the December issue of this publication.

For further details, please contact Prices Division, Statistics Canada, Ottawa, Ontario K1A 0T6, telephone 951-3350, facsimile (613)951-2848.

INDICES DES PRIX DE VENTE DE L'ÉNERGIE ÉLECTRIQUE (NON RÉSIDENTIELLE), 1986 = 100

Les indices des prix de vente de l'énergie électrique sont publiés, par région et par province, pour deux grandes catégories de clients industriels, soit les factures de moins de 5000 kW et les factures de 5000 kW et plus. Les prix sont déclarés par les services publics d'électricité pour des contrats d'énergie non susceptible d'être interrompue, conclus avec des manufacturiers, des services et d'autres clients industriels canadiens. Les prix mensuels sont relevés trois fois par année auprès de tous les grands services de production et de distribution d'énergie. Les indices établis, accompagnant d'autres indices mensuels des prix de l'industrie, sont diffusés chaque année aux mois d'avril, d'août et de décembre. Les indices ont comme période de référence 1986, et les pondérations sont fondées sur les recettes au titre des ventes qu'ont touchées les entreprises en 1986, telles que recueillies par la Division des prix.

Le calcul des indices des prix de vente de l'énergie électrique se fait à l'aide d'une formule d'indice à pondération fixe, identique à celle décrite ci-dessus dans les notes techniques des Indices des prix des produits industriels, 1986 = 100. Les indices sont disponibles par l'entremise de CANSIM sur la matrice 2020. Les indices de la présente année et de l'année précédente sont sujets à révision.

Ces indices constituent la suite des indices des prix de vente de l'énergie électrique, 1981 = 100, précédemment publiés. Les nouvelles séries basées 1986 = 100 peuvent être raccordées à leurs séries équivalentes basées 1981 = 100 en utilisant les facteurs de raccordement. Ces derniers sont publiés dans le numéro de juillet 1990 et répétés dans le numéro de décembre de la présente publication.

Pour plus de renseignements, veuillez contacter la Division des prix, Statistique Canada, Ottawa, Ontario K1A 0T6, téléphone 951-3350, télécopieur (613)951-2848.

CONSULTING ENGINEERING SERVICES PRICE INDEXES (CEPI) (1992 = 100)

The consulting engineering services price indexes (CEPI) measure the change in the prices of services provided by consulting engineers. These services encompass advisory and design work as well as, construction or project management. They are provided for many types of projects (fields of specialization), and to both Canadian and foreign clients. Separate price indexes are published for 10 fields of specialization in tables 7 and 8. These fields of specialization are similar to those identified in the Survey of Consulting Engineers (Catalogue 63-234). Indexes for domestic, regional, and foreign markets are also published.

These indexes, dating from 1989, are the first to cover the activities of consulting engineers. They are based on annual wage and financial data collected from a sample of consulting engineering firms in Canada. These data are used to calculate total price indexes (column A) which are the product of wage rate, realized net multiplier and hours of labour indexes. The composition of the total price index reflects how firms structure their service contracts. Wage rate and realized net multiplier indexes are published separately in columns B and C. These provide information on the source of change in the prices of consulting engineering services.

Each respondent reports the average annual change in wage rates paid to those working on consulting engineering contracts. These data are used to compile wage rate indexes which measure changes in the wage component of contracts over time. These indexes do not measure changes in average wage rates. Respondents also provide realized net multipliers for each field and market combination for which they charge different mark-ups. The realised net multiplier indexes measure changes in the profitability of consulting engineering activities in each market and field of specialization. Multipliers that apply to more than one field of specialization or region are used as observations for each. These multipliers are calculated by dividing total fee income from engineering contracts at fiscal year-end by the salaries billed for in these contracts. An index based on the productivity of labour in related industries is used to measure the change in labour hours charged to contracts. This index is calculated at an aggregated level and is applied to indexes for all regions and specialisations.

The smallest market identified for consulting engineering services is for a field of specialization in a given region. Six regional markets have been identified for Canada: Atlantic provinces, Québec, Ontario, Manitoba/Saskatchewan, Alberta, and British Columbia. Indexes for regional markets are calculated

INDICES DE PRIX DES SERVICES D'INGÉNIERIE CONSEIL (IPIC) (1992 = 100)

Les indices de prix des services d'ingénierie conseil (IPIC) mesurent les variations de prix des services fournis par les ingénieurs-conseils. Ces services comprennent des services de consultation technique et de conception ainsi que des services de gestion de travaux de construction et de projets. Ils sont offerts pour une variété de projets (domaines d'activité) et pour les clients canadiens et étrangers. Différents indices de prix sont publiés dans les tableaux 7 et 8 pour 10 domaines d'activité Ces domaines d'activité correspondent à ceux qui font l'objet de l'Enquête auprès des ingénieurs-conseils(Catalogue 63-234). Des indices de prix sont aussi publiés pour les marchés intérieur, régional et pour l'étranger.

Ces indices, qui remontent à 1989, sont les premiers à couvrir les différentes activités des ingénieurs-conseils. Ils sont calculés à partir des taux de rémunération et des données financières recueillis annuellement auprès de répondants d'entreprises échantillonnées au Canada. Ces données sont utilisées dans le calcul d'indices d'ensemble (colonne A) produit à partir du taux de rémunération, des multiplicateurs nets réèls et d'un indice des heures travaillées. La composition des indices d'ensemble de prix reflète la structure des contrats de service utilisé par les entreprises. Les indices du taux de rémunération ainsi que les indices des multiplicateurs nets réèls sont publiés séparément dans les colonnes B et C. Ces séries fournissent des renseignements supplémentaires sur l'origine du changement des indices de prix de l'ingénierie conseil.

Chaque répondant fournit la variation moyenne annuelle du taux de rémunération qui serait versé à la main-d'oeuvre liés directement aux projets des services d'ingénieurs-conseils. Ces données sont utilisées dans le calcul d'un indice qui mesure à travers le temps les variations du taux de rémunération, composante importante des contrats. Ces indices ne sont pas une mesure de la variation du taux moyen de rémunération. Les répondants fournissent également leurs multiplicateurs nets réèl pour chaque domaine d'activité et pour leur différent marché pour lesquels la majoration peut varier. L'indice du multiplicateur net réèl mesure les variations du taux de rentabilité des contrats de service d'ingénieurs-conseils pour les différents marchés et les domaines d'activité. Les multiplicateurs utilisés pour plus d'un domaine d'activité ou pour plus d'une région, servent de rapport d'observation pour chacun. Ces multiplicateurs sont calculés en divisant tous les honoraires perçus des projets de service d'ingénieurs-conseils à la fin de leur exercice financier, par les coûts de salaire de la main-d'oeuvre liés directement aux projets. Un indice de productivité du travail provenant d'industries semblables est utilisé pour mesurer la variation du nombre d'heures travaillées qui sont facturées aux différents contrats. Cet indice est calculé à un niveau agrégé et est appliqué aux indices par régions et pour les domaines d'activités.

L'indice le plus détaillé pour les services d'ingénierie conseil est celui du domaine d'activité pour une région donnée. On a défini six marchés régionaux au Canada : les provinces de l'Atlantique, le Québec, l'Ontario, le Manitoba/Saskatchewan, l'Alberta et la Colombie-Britannique. Les indices des marchés régionaux sont calculés pour les bâtiments, les transports, les

for buildings, transportation, municipal services, and other environmental services. Price indexes for industrial services are calculated at the Canada level only. Industrial service price indexes differ by regional market because the mix of industrial projects varies from region to region.

At the most detailed level, price indexes are calculated as unweighted geometric averages of the data received from respondents. These indexes are aggregated to more general indexes using fixed weights. The weights are based on fee income by field of specialization from the Survey of Consulting Engineers (Catalogue 63-234), distributed by region using data from the Survey on Capital and Repair Expenditures (Catalogue 61-223). These weights are revised for every second reference year so that the indexes reflect changes in the relative importance of consulting engineering activities in each field and region over time.

Indexes are published annually, about 6 months after the end of each calendar year. They are available on CANSIM in matrices 2047, 2048 and 2049, or from Prices Division. Indexes for the latest year are subject to revision.

For data, please contact Prices Division, Statistics Canada, Ottawa, Ontario, K1A 0T6, telephone (613)951-3350, fax (613)951-2848. For further information on concepts and methods, contact Jennifer Winters (613)-951-3373.

services municipaux et les autres services environnementaux. Les indices pour chaque domaine d'activité industriel sont calculés seulement pour le Canada. Les indices de prix des services industriels diffèrent en raison de la variété des projets des domaines d'activité industriels d'une région à l'autre.

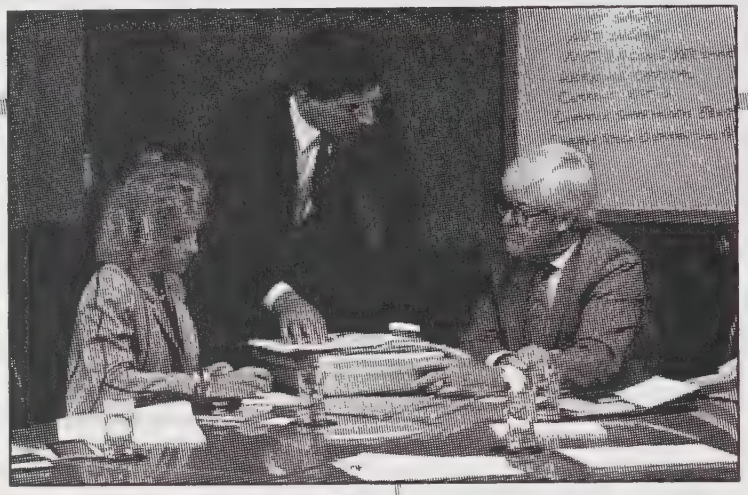

Au niveau le plus détaillé, les indices sont calculés en tant que moyennes géométriques non pondérées des chiffres fournis par les répondants. Ces indices sont groupés sous forme d'indices plus généraux à pondération fixe. Les pondérations proviennent des honoraires pour chaque domaine d'activité de l'Enquête auprès des ingénieurs-conseils (Catalogue 63-234) et distribué par région utilisant le Relevé des dépenses d'immobilisations et réparations (Catalogue 61-223). Ces pondérations seront révisées tous les deux ans afin de s'assurer que les indices reflètent bien la variation en importance des différentes régions et des domaines d'activité des ingénieurs-conseils.

Les indices sont publiés chaque année, environ six mois après la fin de l'année civile. Ils sont disponibles par l'entremise de CANSIM sur les matrices 2047, 2048 et 2049 ou auprès de la Division des prix. Les indices de la dernière année font l'objet d'une révision.

Pour obtenir les données, communiquer avec la Division des prix, Statistique Canada, Ottawa Ontario, K1A 0T6, téléphone (613)951-3350, télécopieur (613)951-2848. Pour plus de renseignements sur les concepts et les méthodes, communiquer avec Jennifer Winters (613)951-3373.

Hire our team of researchers for $56 a year

Notre équipe de chercheurs est à votre service pour 56 $ par année

Subscribing to ***Perspectives on Labour and Income*** is like having a complete research department at your disposal. Solid facts. Unbiased analysis. Reliable statistics.

But ***Perspectives*** is more than just facts and figures. It offers authoritative insights into complex labour and income issues, analyzing the statistics to bring you simple, clear summaries of labour market and income trends.

Our team of experts brings you the latest labour and income data. Each quarterly issue provides:

- topical articles on current labour and income trends
- more than 50 key labour and income indicators
- a review of ongoing research
- information on new surveys

As a special bonus, twice a year you will also receive ***The Labour Market Review***, giving you timely analysis on labour market performance over the previous six months or year.

And all for only $56!

Thousands of Canadian professionals turn to ***Perspectives*** to discover emerging trends in labour and income and to stay up to date on the latest research findings. As a subscriber, you will get the inside story.

We know you'll find ***Perspectives*** indispensable. GUARANTEED. If you aren't convinced after reading the first issue, we'll give you a FULL REFUND on all outstanding issues. Order your subscription to ***Perspectives*** today (Cat. No. 75-0010XPE).

ORDER NOW!

For only $56 (plus $3.92 GST) you will receive the latest labour and income research (4 issues per year). Subscription rates are US$68 for U.S. customers and US$80 for customers in other countries. Fax your VISA or MasterCard order to: **(613) 951-1584.** Call toll free: **1-800-267-6677.** Or mail to: Statistics Canada, Marketing Division, Sales and Service, 120 Parkdale Ave., Ottawa, Ontario K1A 0T6. Or contact your nearest Statistics Canada Reference Centre listed in this publication.

S'abonner à ***L'emploi et le revenu en perspective***, c'est disposer d'une division entière de chercheurs à votre service. Des faits solides. Des analyses objectives. Des statistiques fiables.

La publication n'a pas que des faits et des chiffres. Elle offre également des analyses de fond sur des questions complexes touchant l'emploi et le revenu, de façon à fournir des indications claires et précises sur les tendances actuelles du marché du travail et des revenus.

Notre équipe de spécialistes met à votre disposition des données récentes sur l'emploi et le revenu. Dans chacun des numéros trimestriels, vous trouverez :

- des articles de fond sur l'emploi et le revenu
- plus de 50 indicateurs clés de l'emploi et du revenu
- un aperçu de la recherche en cours
- de l'information sur les nouvelles enquêtes

En prime, vous recevrez le ***Bilan du marché du travail*** deux fois l'an. Vous disposerez ainsi d'une analyse à jour de la situation du marché du travail pour les six derniers mois ou la dernière année.

Tout cela pour 56 $ seulement!

Des milliers de professionnels au Canada consultent ***Perspective*** pour connaître les tendances de l'emploi et du revenu, ainsi que les plus récents résultats de recherche. Votre abonnement vous permettra de connaître tous les faits.

Nous savons que ***L'emploi et le revenu en perspective*** deviendra pour vous un outil indispensable. C'EST GARANTI. Si vous n'êtes pas satisfait après avoir lu le premier numéro, nous vous REMBOURSERONS le montant payé pour les numéros à venir. Abonnez-vous à ***Perspective*** (n° 75-0010XPF au cat.) dès aujourd'hui.

ABONNEZ-VOUS DÈS MAINTENANT!

Pour 56 $ seulement (TPS de 3,92 $ en sus), vous recevrez les plus récentes recherches sur l'emploi et le revenu (quatre numéros par année). L'abonnement est de 68 $ US aux États-Unis et de 80 $ US dans les autres pays. Faites parvenir votre commande par télécopieur (VISA ou MasterCard) au **(613) 951-1584**, par téléphone (sans frais) au **1-800-267-6677**, par courrier à Statistique Canada, Division du marketing, Vente et service, 120, avenue Parkdale, Ottawa (Ontario) K1A 0T6. Ou communiquez avec le Centre de consultation de Statistique Canada le plus près. (Voir la liste dans la présente publication).

SERVICES INDICATORS

For and About Businesses Serving the Business of Canada...

At last, current data and expert analysis on this VITAL sector in one publication!

The services sector now dominates the industrial economies of the world. Telecommunications, banking, advertising, computers, real estate, engineering and insurance represent an eclectic range of services on which all other economic sectors rely.

Despite their critical economic role, however, it has been hard to find out what's happening in these industries. Extensive and time-consuming efforts have, at best, provided a collection of diverse bits and pieces of information ... an incomplete basis for informed understanding and effective action.

Now, instead of this fragmented picture, ***Services Indicators*** brings you a cohesive whole. An innovative quarterly from Statistics Canada, this publication **breaks new ground**, providing timely updates on performance and developments in:

- *Communications*
- *Finance, Insurance and Real Estate*
- *Business Services*

Services Indicators brings together analytical tables, charts, graphs and commentary in a stimulating and inviting format. From a wide range of key financial indicators including profits, equity, revenues, assets and liabilities, to trends and analysis of employment, salaries and output – PLUS a probing feature article in every issue, ***Services Indicators*** gives you the complete picture **for the first time**!

Finally, anyone with a vested interest in the services economy can go to ***Services Indicators*** for **current** information on these industries ... both at-a-glance and in more detail than has ever been available before – all in one unique publication.

If **your** business is serving business in Canada, or if you are involved in financing, supplying, assessing or actually using these services, ***Services Indicators*** is a turning point – an opportunity to forge into the future armed with the most current insights and knowledge.

Order YOUR subscription to ***Services Indicators*** today!

Services Indicators (catalogue no. 63-0160XPB) is $112 (plus 7% GST) in Canada, US$135 in the United States and US$157 in other countries.

To order, write to Statistics Canada, Marketing Division, Sales and Service, 120 Parkdale Avenue, Ottawa, Ontario K1A 0T6 or contact the nearest Statistics Canada Regional Reference Centre listed in this publication.

If more convenient, fax your order to **1-613-951-1584** or call **1-800-267-6677** toll-free in Canada and the United States [**1-613-951-7277** elsewhere] and charge to your VISA or MasterCard.

INDICATEURS DES SERVICES

Au sujet des entreprises au service des affaires du Canada et à leur intention...

Enfin regroupées en une publication, des données courantes et des analyses éclairées sur ce secteur ESSENTIEL!

Le secteur des services domine à l'heure actuelle les économies industrielles du monde. Les télécommunications, les opérations bancaires, la publicité, l'informatique, l'immobilier, le génie et l'assurance représentent une gamme éclectique de services sur lesquels reposent tous les autres secteurs économiques.

En dépit de leur rôle critique sur le plan économique, il est toutefois difficile de savoir ce qui se passe dans ces branches d'activité. Des efforts considérables et fastidieux ont permis, au mieux, de rassembler une collection de renseignements fragmentaires divers... qui ne favorisent pas la compréhension avisée et la prise de mesures efficaces.

Remplacez **maintenant** ce tableau fragmentaire par l'image cohérente que vous offre ***Indicateurs des services***. Cette publication trimestrielle innovatrice de Statistique Canada **pénètre dans un domaine inexploré**, fournissant des aperçus opportuns du rendement et des progrès dans les domaines suivants :

- *Communications*
- *Finance, assurance et immobilier*
- *Services aux entreprises*

Indicateurs des services rassemble des tableaux analytiques, des diagrammes, des graphiques et des observations en un mode de présentation stimulant et attrayant. En puisant à même une vaste gamme d'indicateurs financiers importants, allant notamment des profits, des capitaux propres, des recettes, de l'actif et du passif aux tendances et analyses de l'emploi, des salaires et de l'extrant – à laquelle s'ajoute un article de fond exploratif dans chaque numéro, ***Indicateurs des services*** brosse **pour la première fois** un tableau complet!

Enfin, quiconque s'intéresse au secteur des services peut consulter ***Indicateurs des services*** pour trouver des renseignements **courants** sur ces branches d'activité... tant sous une forme sommaire qu'à un niveau de détail n'ayant jamais encore été offert – et ce, dans une même publication.

Si vous êtes de ceux qui fournissent des services aux entreprises canadiennes, ou si vous financez, fournissez ou évaluez ces services ou y avez en fait recours, ***Indicateurs des services*** représente un tournant – une chance de s'aventurer dans l'avenir en étant armé des réflexions et connaissances les plus actuelles.

Commandez dès aujourd'hui VOTRE abonnement à ***Indicateurs des services***!

Indicateurs des services (n° 63-0160XPB au catalogue) coûte 112 $ (plus 7 % de TPS) au Canada, 135 $ US aux États-Unis et 157 $ US dans les autres pays.

Pour commander, écrivez à Statistique Canada, Division du marketing, Vente et service, 120, avenue Parkdale, Ottawa (Ontario) K1A 0T6, ou communiquez avec le Centre régional de consultation de Statistique Canada le plus près (voir la liste qui figure dans la présente publication).

Si vous préférez, vous pouvez télécopier votre commande en composant le **1-613-951-1584** ou téléphoner sans frais du Canada et des États-Unis au **1-800-267-6677** [ou d'ailleurs, au **1-613-951-7277**] et porter les frais à votre compte VISA ou MasterCard.

✔ Identify Emerging Trends

✔ Define New Markets

✔ Pinpoint Profit Opportunities

To safeguard your place in tomorrow's marketplace, you have to be able to anticipate trends today. To do that, you're going to need some insight into the purchasing trends in the Canadian marketplace.

With a complete profile of Canadian consumers, plus an indepth analysis of Canadian industries, the ***Market Research Handbook*** gives you the most thorough coverage of purchasing trends. This valued bestseller can lead you to new markets by giving you details on:

- how much money Canadians are earning and what they're spending on cars, rent, home entertainment and household appliances;
- the level of sales in retail chain and department stores;
- what goods are being traded between Canada, U.S., and other countries;
- census data such as: age/sex, schooling, households, unemployment, interprovincial and international migration

...and much, much more!

With over 600 pages, the ***Handbook*** includes more than 200 statistical tables that give you instant access to provincial and national market data. Featured are important economic indicators such as the **Gross Domestic Product**, **Labour Force Productivity**, **Private and Public Investment** and the **Consumer Price Index**.

Order your copy of the ***Market Research Handbook*** (Catalogue #63-2240XPB) today for only $110 in Canada plus $7.70 GST, US$132 in the United States, and US$154 in other countries.

CALL TOLL-FREE 1-800-267-6677 **OR FAX** (613)951-1584 and use your VISA or MasterCard. **OR MAIL** your order to: Statistics Canada, Marketing Division, Sales and Service, 120 Parkdale Avenue, Ottawa, Ontario, K1A 0T6, or contact the nearest Statistics Canada Regional Office listed in this publication.

✔ Dégagez les nouvelles tendances

✔ Définissez les nouveaux marchés

✔ Déterminez les possibilités de profit

Pour maintenir votre place sur le marché de demain, vous devez être en mesure de prévoir les tendances aujourd'hui. Pour ce faire, vous devrez comprendre les habitudes d'achat sur le marché canadien.

Renfermant un profil complet des consommateurs canadiens ainsi qu'une analyse approfondie des industries canadiennes, le ***Recueil statistique des études de marché*** brosse un tableau exhaustif des habitudes d'achat. Ce précieux best-seller peut vous faire découvrir de nouveaux marchés en vous fournissant les détails suivants :

- les revenus des Canadiens et leurs dépenses pour la voiture, le loyer, les appareils de divertissement et les appareils ménagers;
- le niveau des ventes dans les magasins de détail à succursales et les grands magasins;
- les biens échangés entre le Canada, les É.-U. et d'autres pays;
- les données du recensement telles que l'âge, le sexe, le niveau de scolarité, les ménages, le chômage, la migration interprovinciale et internationale

...et bien plus encore!

Le ***Recueil***, contenant plus de 600 pages et au delà de 200 tableaux statistiques, vous permettra d'accéder instantanément aux données provinciales et nationales sur le marché. Il traite d'indicateurs économiques importants tels que le **produit intérieur brut**, la **productivité de la population active**, les **investissements privés et publics** et l'**Indice des prix à la consommation**.

Procurez-vous votre exemplaire du ***Recueil statistique des études de marché*** (nº 63-2240XPB au catalogue) dès aujourd'hui pour seulement 110 $ au Canada plus 7,70 $ de TPS, 132 $ US aux États-Unis et 154 $ US dans les autres pays. Commandez votre exemplaire **PAR TÉLÉPHONE EN COMPOSANT SANS FRAIS** le 1-800-267-6677 **OU PAR TÉLÉCOPIEUR** au (613) 951-1584 et utilisez votre carte VISA ou MasterCard, **OU PAR LA POSTE** à l'adresse suivante : Statistique Canada, Division du marketing, Vente et service, 120, av. Parkdale, Ottawa (Ontario) K1A 0T6, ou communiquez avec le bureau régional de Statistique Canada le plus près dont la liste figure dans la présente publication.

Data in Many Forms . . .

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered. Data are available on CD, diskette, computer printout, microfiche and microfilm, and magnetic tape. Maps and other geographic reference materials are available for some types of data. Direct online access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable database and retrieval system.

How to Obtain More Information

Inquiries about this publication and related statistics or services should be directed to:

Client Services Unit,
Prices Division,

Statistics Canada, Ottawa, K1A 0T6 (Telephone: 1-613-951-3350) or to the Statistics Canada reference centre in:

Standards of Service to the Public

To maintain quality service to the public, Statistics Canada follows established standards covering statistical products and services, delivery of statistical information, cost-recovered services and services to respondents. To obtain a copy of these service standards, please contact your nearest Statistics Canada Regional Reference Centre.

Des données sous plusieurs formes . . .

Statistique Canada diffuse les données sous formes diverses. Outre les publications, des totalisations habituelles et spéciales sont offertes. Les données sont disponibles sur disque compact, disquette, imprimé d'ordinateur, microfiche et microfilm, et bande magnétique. Des cartes et d'autres documents de référence géographiques sont disponibles pour certaines sortes de données. L'accès direct à des données agrégées est possible par le truchement de CANSIM, la base de données ordinolingue et le système d'extraction de Statistique Canada.

Note of Appreciation

Canada owes the success of its statistical system to a long-standing cooperation involving Statistics Canada, the citizens of Canada, its businesses, governments and other institutions. Accurate and timely statistical information could not be produced without their continued cooperation and goodwill.

Note de reconnaissance

Le succès du système statistique du Canada repose sur un partenariat bien établi entre Statistique Canada et la population, les entreprises, les administrations canadiennes et les autres organismes. Sans cette collaboration et cette bonne volonté, il serait impossible de produire des statistiques précises et actuelles.

Symbols

The following standard symbols are used in Statistics Canada publications:

NOTE ON CANSIM

CANSIM® (Canadian Socio-Economic Information Management System) is Statistics Canada's computerized data bank and its supporting software. Most of the data appearing in this publication, as well as many other data series are available from CANSIM via terminal, on computer printouts, or in machine readable form. Historical and more timely data, not included in this publication, are available from CANSIM.

For further information write to Marketing Division, Statistics Canada, Ottawa, K1A 0T6 or call (613) 951-8200.

® Registered Trade Mark of Statistics Canada.

Revision

Unless otherwise stated, price indexes in this publication are subject to revision for the most recent six months shown. Any revisions beyond these limits are so indicated.

The paper used in this publication meets the minimum requirements of American National Standard for Information Sciences – Permanence of Paper for Printed Library Materials, ANSI Z39.48 – 1984.
♾

Signes conventionnels

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada:

.. nombres non disponibles.

... n'ayant pas lieu de figurer.

– néant ou zéro.

-- nombres infimes.

p nombres provisoires.

r nombres rectifiés.

x confidentiel en vertu des dispositions de la Loi sur la statistique relatives au secret.

NOTE CONCERNANT CANSIM

Le CANSIM® (Système canadien d'information socio-économique) est le système de Statistique Canada qui se compose d'une banque de données informatisées et de son logiciel de soutien. La plupart des données présentées dans cette publication et beaucoup d'autres données contenues dans le CANSIM peuvent être extraites par l'intermédiaire d'un terminal, sous forme d'imprimés d'ordinateur ou sous forme lisible par machine. Des données historiques et des données plus actuelles qui n'apparaissent pas dans cette publication sont disponibles de CANSIM.

Pour plus de renseignements, écrivez à la Division du marketing, Statistique Canada, Ottawa, K1A 0T6 ou téléphonez à (613) 951-8200.

® Marque déposée de Statistique Canada.

Révisions

Sauf avis contraire, les indices de prix contenus dans la présente publication sont susceptibles d'être révisés pour les six derniers mois indiqués. Toute révision portant sur une plus longue période est indiquée.

Le papier utilisé dans la présente publication répond aux exigences minimales de l'"American National Standard for Information Sciences" – "Permanence of Paper for Printed Library Materials", ANSI Z39.48 – 1984.

HIGHLIGHTS

Industrial Product Price Index

The 12-month change in industrial prices dropped to 8.3% in June, the fourth decline in the last five months. On a monthly basis, the overall level of industrial prices rose 0.7%, pushed up by higher pulp prices and a decline in the dollar. The continuing decline in lumber prices partly offset increases in prices of paper and allied products, ethylene, and motor vehicles.

The most significant source of upward pressure on industrial prices in the Canadian economy remained the paper and allied products sector. June's 7.6% jump in pulp prices accounted for just under two-thirds of the increase in paper and allied products prices. Pulp prices rose similarly in both the domestic and export markets. A further 2.3% increase in newsprint prices supported the strong increases in pulp prices. There are continuing reports of additional planned increases in newsprint prices. Concerned by dramatic newsprint price increases, publishers are working with paper manufacturers to find ways to smooth out cyclical price fluctuations.

The depreciation of the Canadian dollar against the U.S. dollar (-1.3% between May 15 and June 15) meant manufacturers selling goods priced in U.S. dollars received more Canadian dollars for their products. This accounted for most of the 0.8% increase in transportation equipment prices. It also affected exporters of lumber, pulp, paper, and non-ferrous primary metal products. If the effect of the U.S. dollar's rise were excluded, the monthly change in industrial prices would have been 0.4%.

In June, lumber, sawmill, and other wood product prices fell a further 2.4%. Prices were down 16% since February. In June, sizeable inventory levels outweighed the effect of the beginning of a possible turnaround in residential construction, as interest rates moved down in Canada and the United States. Mills continued to accept lower prices to ensure sales. The decline in lumber prices was felt across the country and affected all softwoods, except western red cedar.

The 2.3% increase in chemicals and chemical product prices was predominantly accounted for by a sizeable increase in ethylene prices. Ethylene prices rose for a fourth consecutive month. Over the last 12 months, prices of olefins (which are dominated by ethylene) soared by 53%, and were a major contributor to an overall 14% increase in chemical prices.

FAITS SAILLANTS

Indice des prix des produits industriels

La variation sur 12 mois des prix industriels tombe à 8,3% en juin. C'est sa quatrième baisse en cinq mois. D'un mois à l'autre, le niveau d'ensemble des prix industriels augmente de 0,7%, sous l'effet d'une progression du prix de la pâte de bois et d'un recul du dollar. La poursuite du repli du prix des sciages a partiellement neutralisé les hausses dans les prix du papier et des produits connexes, de l'éthylène et des véhicules automobiles.

Le secteur du papier et des produits connexes reste la principale cause de la pression à la hausse sur les prix industriels dans l'économie canadienne. Le bond de 7,6% du prix de la pâte de bois en juin explique tout près des deux tiers de l'augmentation du prix du papier et des produits connexes. L'accroissement du prix de la pâte de bois a été similaire sur le marché intérieur et sur les marchés d'exportation. Une majoration de 2,3% du prix du papier journal a appuyé les fortes augmentations du prix de la pâte de bois. Selon plusieurs sources, de nouvelles augmentations du prix du papier journal sont à prévoir. Inquiets de la flambée du prix du papier journal, les éditeurs cherchent avec les producteurs de papier des moyens d'aplanir les fluctuations cycliques de prix.

Le recul du dollar canadien par rapport au dollar US (-1,3% entre le 15 mai et le 15 juin) signifie que les fabricants vendant leurs biens en dollars US ont touché davantage, en dollars canadiens, pour leurs produits. Ceci explique le gros de l'augmentation de 0,8% du prix du matériel de transport. Ce recul a aussi avantagé les exportateurs de sciages, de pâte de bois, de papier, et de produits métalliques primaires non ferreux. Sans l'effet de la hausse du dollar US, la variation mensuelle dans les prix industriels aurait été de 0,4%.

En juin, le prix des sciages, des produits de scierie et des autres produits du bois a chuté d'encore 2,4%, et se situait à 16% de moins qu'en février. Les niveaux importants de stocks ont neutralisé l'effet d'un revirement possible dans la construction résidentielle à la faveur d'une diminution des taux d'intérêt au Canada et aux États-Unis. Les usines ont continué d'accepter des prix réduits pour s'assurer des ventes. La diminution du prix des sciages a été ressentie dans tout le pays et a touché tous les bois résineux, sauf le cèdre de l'Ouest.

L'augmentation de 2,3% du prix des produits chimiques s'explique surtout par une augmentation considérable du prix de l'éthylène, la quatrième en quatre mois. Au cours des 12 derniers mois, les prix des oléfines (dominées par l'éthylène) ont monté en flèche de 53% et étaient un important facteur de l'augmentation globale de 14% du prix des produits chimiques.

Most of the increase in transportation equipment prices stemmed from the lower Canadian dollar's effect on prices for motor vehicles quoted in U.S. dollars. Despite the low automobile sales levels, automakers did not major adjustments to their incentive programs in June-perhaps due to a belief that car owners must soon replace their aging vehicles.

In June, manufacturers and consumers both saw the 12-month change in consumer goods prices decline slightly. The 12-month change in goods prices paid by consumers dropped from 3% in May to 2.6% in June. For manufacturers, the 12-month change in the prices received for Canadian consumer goods dropped from somewhat over 3.5% to about 3%. About half of what the consumer pays goes to manufacturers, the remainder is divided between retailers, wholesalers, indirect taxes, and transporters.

Relatively weak North American demand for cars and houses was an important factor behind the continuing decline in the 12-month change in industrial product prices. However, strong demand for paper and allied products continued to support the overall industrial product price level. Industrial product prices, like gross domestic product, remain dependent on international prosperity.

Le gros de l'augmentation du prix du matériel de transport est la conséquence de l'effet du recul du dollar canadien sur les prix des véhicules automobiles cités en dollars US. Malgré le faible niveau des ventes d'automobiles, les constructeurs n'ont rien fait en juin pour apporter des rajustements majeurs à leurs programmes d'incitation, croyant peut-être que les automobilistes remplaceront bientôt leurs véhicules vieillissants.

En juin, les fabricants et les consommateurs ont l'un et l'autre observé un léger repli de la variation sur 12 mois du prix des biens de consommation. La variation sur 12 mois du prix que les consommateurs ont payé pour leurs biens est passée de 3% en mai à 2,6% en juin. Pour les fabricants, la variation sur 12 mois des prix reçus pour les biens de consommation canadiens est tombée d'un peu plus de 3,5% à environ 3%. À peu près la moitié de ce que paient les consommateurs va au fabricant, et le reste est divisé entre les détaillants, les grossistes, les impôts indirects et les transporteurs.

La faiblesse relative de la demande nord-américaine de voitures et de maisons a été un important facteur du recul continu de la variation sur 12 mois des prix des produits industriels. Cependant, une vigoureuse demande de papier et de produits connexes a continué d'appuyer le niveau d'ensemble des prix des produits industriels. Les prix des produits industriels, comme le Produit intérieur brut du Canada, demeurent tributaires de la prospérité internationale.

NOTE TO USERS

The Industrial Product Price Index (IPPI) reflects prices producers receive as goods leave their plants. It does not reflect what consumers pay. Unlike the Consumer Price Index (CPI), the IPPI excludes indirect taxes and the costs (transportation, wholesale, and retail costs) that occur from the time a good leaves a plant until the final user takes possession.

Canadian producers export many goods. They often quote their prices in foreign currencies, particularly for motor vehicles, pulp, paper, and wood products. A rise or fall in the value of the Canadian dollar against the U.S. dollar therefore affects the IPPI. A 1.0% change in the value of the Canadian dollar against the U.S. dollar has been estimated to change the IPPI by about 0.2%.

NOTES AUX UTILISATEURS

L'indice des prix des produits industriels (IPPI) retrace les prix que les producteurs reçoivent au moment où les produits franchissent les portes de l'usine. Il ne retrace pas ce que le consommateur paie. Contrairement à l'indice des prix à la consommation (IPC), l'IPPI exclut les impôts indirects et tous les coûts (coûts du transport et du commerce de gros et de détail) qui surviennent lorsque le produit part de l'usine jusqu'au moment où l'utilisateur final en prend possession.

Les producteurs canadiens exportent beaucoup de biens. Ils vont souvent indiquer leurs prix en devises étrangères, en particulier dans le cas des véhicules automobiles, des pâtes de bois, du papier et des produits du bois. Les fluctuations de la valeur du dollar canadien par rapport à la devise américaine se répercuteront par conséquent sur l'IPPI. Une variation de 1,0% de la valeur du dollar canadien par rapport au dollar américain devrait, selon les estimations, se traduire par une variation d'environ 0,2% de l'IPPI.

HIGHLIGHTS

Raw Materials Price Index

The cost of crude oil fell significantly in June, pulling raw material prices down 0.2%. The 12-month change in raw material prices dropped to 6.9%, its lowest level in 13 months. The monthly drop in June was almost entirely caused by a 5.8% fall in crude oil prices, which more than offset higher prices for metals, grains, cattle and hogs. If mineral fuels had been excluded, the monthly change in raw material prices in June would have been almost 2%.

After rising more than 14% in the first 4 months of 1995, crude oil prices dropped 8% overall in May and June. Contributing to lower prices were sales of oil stockpiled during a Brazilian oil workers strike, and new talks of a move by OPEC to preserve market share. Compared with June 1994, crude oil prices were down more than 2%.

June metal prices almost erased the May decline by moving up more than 4%. The major contributors were copper (+11%), gold (+2%), nickel (+7%) and tin (+17%). Lower prices for aluminum materials (-2%) partly offset the overall increase for metals. Copper prices should remain strong, as global demand appears healthy and inventories remain low. Nickel prices strengthened in June (+7%). Nickel prices have been sustained by strong demand for stainless steel in Europe and Southeast Asia and by an inventory buildup over the summer. The stainless steel industry uses about 60% of the world's supply of nickel. Tin prices moved up 17%, partly due to supply restrictions emanating from China.

Animal and animal product prices rose 2% in June. Cattle prices recovered somewhat (+4%) from recent price declines-down 14% since February. Hog prices increased 8%, comparable to the February 1995 high. Higher cattle and hog prices may reflect the summer barbecue season.

Vegetable product prices increased 2% in June. Grain prices, led by wheat (+7%) rose due to tight world supplies and poor growing and harvesting conditions. Global wheat stocks are at their lowest level since 1977-78. More than 70% of Canadian wheat is exported. Canadian bakeries are facing higher flour mill costs for the first time in almost three years, which some analysts say may raise the price of a loaf of bread by five to 10 cents. Overall, higher prices for grains (+6%) and canola and sugar were largely offset by lower rubber and coffee prices.

FAITS SAILLANTS

Indice des prix des matières brutes

Le coût du pétrole brut a dégringolé en juin, provoquant un repli de 0,2% du prix des matières brutes. La variation sur 12 mois du prix des matières brutes est tombée à 6,9%, son plus bas niveau en 13 mois. La baisse mensuelle en juin est presque entièrement attribuable à une chute de 5,8% du prix du pétrole brut, qui a facilement épongé l'augmentation du prix des métaux, des céréales, des bovins et des porcs. Sans les combustibles minéraux, la variation mensuelle du prix des matières brutes en juin aurait été de près de 2%.

Après une progression de plus de 14% dans les quatre premiers mois de 1995, le prix du pétrole brut est tombé de 8%, au total, en mai et juin. La vente des stocks de pétrole accumulés pendant une grève des travailleurs du pétrole au Brésil et les rumeurs d'une nouvelle initiative de l'OPEP pour préserver sa part de marché ont contribué à la baisse de prix. Par rapport à juin 1994, le prix du pétrole brut a fléchi de plus de 2%.

Le prix des métaux en juin a presque effacé le recul de mai avec une progression de plus de 4%. Le cuivre (+11%), l'or (+2%), le nickel (+7%) et l'étain (+17%) sont les métaux qui ont le plus contribué à cette avance. La diminution du prix des matièriaux d'aluminium (-2%) a partiellement modéré l'augmentation globale pour les métaux. Le prix du cuivre devrait demeurer vigoureux, car la demande mondiale semble bonne et les stocks demeurent faibles. Le prix du nickel s'est raffermi en juin (+7%). Le prix du nickel a été soutenu par une vigoureuse demande d'acier inoxydable en Europe et dans le Sud-Est asiatique et par une accumulation de stocks pour l'été. L'industrie de l'acier inoxydable consomme environ 60% de l'approvisionnement mondial de nickel. Le prix de l'étain a avancé de 17%, en partie sous l'effet des restrictions d'offre émanant de la Chine.

Le prix des animaux et des substances animales a monté de 2% en juin. Il y a eu une légère reprise (+4%) du prix des bovins par rapport aux récents reculs (diminution de 14% depuis février). Le prix des porcs a augmenté 8%, atteignant un niveau comparable au sommet de février 1995. La hausse du prix des bovins et des porcs est peut-être le reflet de la saison estivale des barbecues.

Le prix des substances végétales a augmenté de 2% en juin. Celui des céréales, et surtout du blé (+7%), a progressé à la faveur du resserrement des approvisionnements mondiaux et des mauvaises conditions de croissance et de récolte. Les stocks mondiaux de blé en sont à leur plus bas niveau depuis 1977-1978. Plus de 70% du blé canadien est exporté. Les boulangeries canadiennes font face, pour la première fois en près de trois ans, à une augmentation des coûts de mouture, qui, selon certains analystes, pourrait faire monter le prix d'un pain de 5 à 10 cents. Dans l'ensemble, la montée du prix des céréales (+6%) et du canola et du sucre a été largement neutralisée par la baisse du prix du caoutchouc et du café.

Wood prices edged up 0.2% in June. Compared with 12 months earlier, wood prices were up almost 17%. Lumber prices declined again in June, down almost 16% since February. The strength for higher wood prices comes from the global demand for printing and writing papers. This demand will probably remain strong, fueled by emerging markets (such as South-east Asia) and additional print media ads (due to the buoyant worldwide advertising recovery).

Le prix du bois a fait un léger gain de 0,2% en juin. Il dépassait de près de 17% le niveau de 12 mois plus tôt. Le prix du bois d'oeuvre, qui a diminué encore une fois en juin, se trouve à près de 16% plus bas qu'en février. Le principal facteur de la hausse du prix du bois est la demande mondiale de papier d'imprimerie et de papier à écrire. Cette demande conservera probablement sa vigueur en raison des besoins des nouveaux marchés (comme le Sud-Est asiatique) et de la multiplication des annonces dans les médias imprimés (en raison d'une vigoureuse reprise de la publicité dans le monde).

NOTE TO USERS

The Raw Materials Price Index (RMPI) reflects the prices paid by Canadian manufacturers for key raw materials. Many of these prices are set in a world market. Also, unlike the Industrial Product Price Index, the RMPI includes goods that are not produced in Canada.

NOTE AUX UTILISATEURS

L'indice des prix des matières brutes est représentatif du prix que les fabricants canadiens paient pour les principales matières brutes. Un grand nombre de ces prix sont fixés sur les marchés mondiaux. De plus, contrairement à l'indice des prix des produits industriels, l'IPMB inclut des biens qui ne sont pas produits au Canada.

Nota: Les indices figurant pour les six mois les plus récents sont sujets à révision.

(1) These indexes are preliminary.
(1) Ces indices sont provisoires.
(2) The aggregation of indexes by commodities or by industries should produce the same grand total. When these totals occasionally differ due to rounding, the All Commodities Index shall be regarded as authoritative, and the All Manufacturing Industries is adjusted to match.
(2) L'agrégation des indices par produits ou par industries devrait résulter en un même grand total. Lorsque ces totaux diffèrent occasionnellement en raison de l'arrondissement, l'Indice total – Tous les produits devra être considéré comme celui qui fait autorité, et l'Indice total – Toutes les industries manufacturières sera posé égal.

Note: Indexes for the most recent six months shown are subject to revision.
Nota: Les indices figurant pour les six mois les plus récents sont sujets à révision.

(1) The bottom line in each series title block may contain, in order from left to right, the following: the CANSIM Databank code number (d nnnnnn), a numeric descriptor, a coverage measure, and a variability measure. The numeric descriptor is of the order ss-mm-nn-pppp-rr where
ss indicates the S-level commodity code (from 9 to 28)
mm indicates the M-level commodity code (from 14 to 43, 45 to 69)
nn indicates either a split of the M-level commodity, or 91, which indicates a special aggregation or 99, which indicates special details.
pppp indicates the PCG code (except for some special aggregations which include several PCGs).
rr indicates a split of a PCG.
The coverage measure for an elemental index is a symbol: E indicates a fully designed sample, S indicates an abbreviated sample, P indicates an indirect estimate. For a composite index the percentage of the coverage which is estimated from direct surveys (E + S) is given, occasionally these coverage measures are rounded to the nearest 5% to preserve confidentiality. The variability measure is given for some indexes to indicate the relative stability of the index estimate due to sampling. The most stable indexes are marked A, the least stable, D. For further information order Industrial Product Price Indexes 1981 = 100, Concepts and Methods (Catalogue 62-556).

(1) En lisant de gauche à droite, la ligne en-dessous de chaque titre des séries présente, en tout ou en partie, l'information suivante: le numéro de code "Databank" de CANSIM (D nnnnnn), un numéro d'identification numérique, une mesure du degré de couverture et une mesure de la variabilité. Le numéro d'identification numérique prend la forme générale ss-mm-nn-pppp-rr où:
ss indique le code du niveau S des produits (de 9 à 28)
mm indique le code du niveau M des produits (de 14 à 43, 45 à 69)
nn indique soit une composante du niveau M des produits, ou prend la valeur de 91 pour les agrégats spéciaux, ou de 99 pour les indices particuliers.
pppp indique le code GPP (sauf pour certains agrégats spéciaux qui comprennent plusieurs GPP)
rr indique une composante d'un GPP.
La mesure du degré de couverture pour les indices élémentaires est présentée à l'aide d'un symbole: E indique un échantillonnage exhaustif, S indique un échantillonage sommaire et P indique une estimation indirecte. Pour les indices composites, la donnée en pourcentage représente une estimation du degré de couverture par échantillonnage direct (E + S). Ces mesures du degré de couverture sont parfois arrondies au 5% le plus près afin d'assurer la confidentialité. La mesure de la variabilité, donnée pour un certain nombre d'indices, indique la stabilité relative de l'indice en tant qu'estimation basée sur un échantillon. Les indices les plus stables sont cotés A, les moins stables, D. Pour plus de renseignements, commandez le document de référence: Indices des prix des produits industriels 1981 = 100, concepts et méthodes (n° 62-556 au catalogue).

TABLE 3. Industrial Product Price Indexes, by Industry and Industry Groups(1)

TABLEAU 3. Indices des prix des produits industriels, par industries et groupes d'industries(1)

1986 = 100

				Month – Mois											Annual average – Moyenne annuelle

Note: Indexes for the most recent six months shown are subject to revision.

Nota: Les indices figurant pour les six mois les plus récents sont sujets à révision.

(1) The aggregation of indexes by commodities or by industries should produce the same grand total. When these totals occasionally differ due to rounding, the All Commodities Index shall be regarded as authoritative, and the All Manufacturing Industries is adjusted to match.

(1) L'agrégation des indices par produits ou par industries devraient résulter en un même grand total. Lorsque ces totaux diffèrent occasionnellement en raison de l'arrondissement, l'indice total - tous les produits devra être considéré comme celui qui fait autorité, et l'indice total - toutes les industries manufacturières sera posé égal.

(2) The numeric code to the right of the CANSIM databank number on the last line of each series is the 1980 Standard Industrial Classification (SIC) code. An explanation of the percentage figures (coverage measure) shown to the right of the SIC can be found at the end of Table 2. These coverage measures are rounded to the nearest 5% to preserve confidentiality.

(2) Le code numérique à la droite du numéro Databank de CANSIM apparaissant à la ligne du bas de chaque série est le code de la Classification type des industries (CTI) de 1980. Une explication des données en pourcentage (mesure de degré de couverture) apparaissant à la droite du code CTI est disponible à la fin du tableau 2. Ces mesures de degré de couverture sont arrondies au 5% le plus près afin de préserver la confidentialité.

TABLE 4. Industrial Product Price Indexes, by Stage of Processing

EXPLANATION OF METHODS USED AND ADDITIONAL SOURCES FOR INDUSTRIAL PRICE INDEXES

Industrial Product Price Indexes, 1986 = 100

The Industrial Product Price Indexes (IPPI) measure price changes for major commodities sold by Canadian manufacturers. Elemental indexes are calculated for 1314 Principal Commodity Group (PCG) outputs as defined in the 1986 Input/Output (I/O) table. Weights used to aggregate commodity indexes are taken from the output or "Make" matrix of the I/O system which provides an integrated set of commodity values for all manufacturing industries.

Directly surveyed commodities are supported by formal sampling procedures and a quality rating is presented for commodities and aggregations of commodities. Such indexes are derived from prices reported for the 15th of the month or the nearest prior business day for comparable transactions.

Selected indexes are published about four weeks after the reference month in the *Daily Bulletin* (Catalogue 11-001) following a pre-announced schedule of release dates. Simultaneously, all series are available from CANSIM or on request. Catalogue 62-011, *Industry Price Indexes,* is released about four weeks after the Daily Bulletin release. Each series is identified with a CANSIM D number and with a commodity (PCG) or industry (SIC) identifier. Each release of numbers is subject to revision for six months, i.e., when a July index is released, the index for the preceding January becomes final. Exceptions to this rule are announced.

Price Surveys

About 10,000 prices are collected monthly from about 3,500 producers for goods sold, which are valued at the boundary of the establishment, wherein the cost of taxes collected at that point and transportation provided by public carriers beyond that point are excluded. Prices are reported for finely specified transactions wherein both the good and terms of sale are identified. Such collections are instituted for important commodities. Expansions are made to the samples where price movement has a regional dimension or where there are important flows of goods to export markets.

Sampling for any directly surveyed elemental index is usually done by a formal probability sampling procedure, wherein important producers are "must take" respondents and a random selection is taken from the smaller producers. Such samples are redrawn on a regular cycle as dictated by changes in the market. A given elemental index is usually supported by 12 to 15 price quotes, although some are derived from as few as 8 quotes or as many as 30 quotes.

EXPLICATION DES MÉTHODES UTILISÉES ET SOURCES SUPPLÉMENTAIRES DES INDICES DES PRIX INDUSTRIELS

Indices des prix des produits industriels, 1986 = 100

Les indices des prix des produits industriels (IPPI) mesurent les variations des prix des principaux produits vendus par les fabricants canadiens. Les indices élémentaires sont calculés pour 1314 groupes principaux des produits (GPP) tels que définis dans les tableaux d'entrées-sorties de 1986. Les poids servant à agréger les indices des produits proviennent de la matrice des sorties ou de "production" des tableaux d'entrées-sorties. Cette matrice présente un ensemble intégré de valeurs pour les produits à l'intérieur de l'ensemble des industries manufacturières.

Les produits faisant directement l'objet d'un sondage sont basés sur des procédures d'échantillonnage formelles, et une cote de qualité est présentée pour les produits et les agrégats de produits. Ces indices sont calculés à partir des prix déclarés pour le 15 du mois, ou le jour ouvrable précédent le plus proche pour des transactions comparables.

Un certain nombre d'indices sont publiés environ quatre semaines après la fin du mois de référence dans le Quotidien (n° 11-001F au catalogue), selon un calendrier de publication préalablement établi. Simultanément, toutes les séries sont disponibles dans CANSIM ou sur demande. La publication n° 62-011 au catalogue, *Indices des prix de l'industrie,* paraît quatre semaines environ après le communiqué dans le *Quotidien.* Chaque série est identifiée par un numéro D de CANSIM et par un identificateur de produits (GPP) ou de branche d'activité (CTI). Les chiffres publiés pour les six derniers mois sont sujets à révision. Ainsi, lorsque l'indice de juillet est publié, l'indice pour le mois de janvier précédent devient final. Les exceptions à cette règle sont signalées.

Enquêtes des prix

Environ 10,000 prix sont recueillis chaque mois auprès d'environ 3,500 producteurs pour des biens vendus qui sont évalués à la limite de l'établissement, de sorte que les taxes prélevées à ce point et le coût du transport fourni par les transporteurs communs au-delà de ce point sont exclus. Les prix sont relevés pour des transactions à un niveau très détaillé, qui permet d'identifier le bien et les conditions de vente. De tels relevés sont institués pour les produits importants. Des élargissements sont apportés aux échantillons pour lesquels le mouvement des prix a une dimension régionale, ou pour lesquels il existe un important marché pour l'exportation.

L'échantillonnage pour tout indice élémentaire faisant directement l'objet d'un sondage se fait habituellement par une méthode d'échantillonnage probabiliste, selon laquelle les producteurs importants sont des répondants "obligatoires", tandis que l'on procède à une sélection aléatoire des producteurs moins importants. Ces échantillons sont reconstruits régulièrement, suivant l'évolution du marché. Un indice élémentaire donné repose habituellement sur 12 à 15 prix, bien que certains peuvent utiliser aussi peu que 8 prix, ou jusqu'à 30 prix.

About 700 of the 1314 PCGs in the manufacturing sector are accommodated by direct survey and these account for about 85% of the value of manufacturing output in 1986. The price movement for the remaining 600 PCGs is estimated indirectly from either directly priced PCGs or through borrowing price movement from other price series.

Environ 700 des 1314 GPP du secteur de la fabrication font l'objet d'une enquête directe, qui couvrent environ 85% de la valeur de la production manufacturière en 1986. Le mouvement des prix des 600 GPP restants est estimé indirectement à partir de GPP faisant directement l'objet d'un sondage, ou en empruntant le mouvement des prix d'autres séries de prix.

Weight Base

Commodity and industry weights are taken from the "Make" matrix of the 1986 Input/Output table which, in turn, is derived from 1986 values reported for the Census of Manufacturers and edited to conform to the 1980 Standard Industrial Classification. Within-commodity weights can change in December of each year to reflect major changes in production patterns.

Sources des poids

Les poids des produits et des branches d'activités proviennent de la matrice "production" du tableau d'entrées-sorties de 1986, laquelle à son tour est établie à partir des valeurs de 1986 déclarées pour le recensement des manufactures, et rectifiées afin d'être conforme à la Classification type des industries de 1980. Les poids internes des produits peuvent changer en décembre de chaque année afin d'appréhender les changements importants dans les schémas de la production.

Formula

Chained series of fixed weighted price indexes are calculated by a linking procedure whereby more recent varieties and changes to establishments are introduced systematically, as required, in December of each year. Weights from the commodity level through higher levels of aggregation are held constant.

The general formula used for the main aggregations describes the price movement of a specified group of commodities where w^i are the values of the output of each commodity:

Formule

Les séries en chaîne des indices de prix à pondération fixe sont calculées par une méthode de raccordement suivant laquelle les plus récentes variétés et les changements au niveau de l'univers des entreprises sont incorporés systématiquement, selon les besoins, en décembre de chaque année. Toutefois, les pondérations du niveau des produits jusqu'aux niveaux plus élevés d'agrégation sont maintenues constantes.

La formule générale servant au calcul des agrégations principales décrit les mouvements de prix d'un groupe donné de produits, dans laquelle w^i sont les valeurs de la production de chaque produit:

$$P_{t/o}^{(agg)} = \sum_i \frac{w^i}{\sum w^i} \cdot P_{t/o}^{i}$$

$P_{t/o}^{(agg)}$	denotes the composite price index movement between the base period o and time t for the defined aggregate;
w^i	is the transaction value of the element i in the base period;
$P_{t/o}^{i}$	is the price index for element i, meaning its price change from the base period to time t;
$\sum_i$	indicates summation over all elements i in the defined aggregate.

$P_{t/o}^{(agg)}$	dénote le mouvement de l'indice composite de prix entre la période de référence o et la période t pour l'agrégat défini;
w^i	est la valeur de transaction de l'élément i au cours de la période de référence;
$P_{t/o}^{i}$	est l'indice de prix de l'élément i, désignant sa variation de prix entre la période de référence et la période t;
$\sum_i$	signifie la sommation de tous les éléments i dans l'agrégat défini.

Historical Data

Historical series on the 1986 base for the Industry Price Indexes are available on CANSIM. The historical series are computed for the industry indexes classified under the 1980 Standard Industrial Classification (SIC) and for commodity indexes classified under the Principal Commodity Groups (PCG) classification. The historical series were obtained by linking together movements from the 1986-based Industrial Product Price Indexes (IPPI) series and the corresponding 1981-based Industrial Product Price Indexes (IPPI) series, using the year 1986 as the linking period. An explanatory note on the methods used to compute the historical series, as well as a set of concordance tables between both set of IPPI series are available to the public.

Reference Documents

62-558 Industry Price Indexes, 1986 = 100: Users' Guide, $40.00.

This publication describes briefly the economic content of the series and presents a short description of different aggregations produced. In the tables the weighting patterns for both commodities and commodity groupings are shown. Descriptions of the characteristics of the elemental indexes are provided. Comments on index use are also provided.

62-556 Industrial Product Price Indexes, 1981 = 100, Concepts and Methods, $25.00.

This publication describes the economic content of the series within the framework of the system of national accounts and describes how this affects price index methodology. Sampling and pricing methods are described, as are index calculation and aggregation procedures.

A glossary of terms is also provided.

For further details, please contact Prices Division, Statistics Canada, Ottawa, Ontario K1A 0T6, telephone 951-3350, facsimile (613)951-2848.

Données historiques

Les séries historiques sur la base 1986 pour les Indices des prix de l'industrie sont disponibles sur CANSIM. Les séries historiques sont calculées pour les indices des industries suivant la Classification type des industries (CTI) de 1980 et pour des indices des produits suivant la classification des Groupes principaux des produits (GPP). Les séries historiques furent obtenues en raccordant ensemble les mouvements des séries des indices des prix des produits industriels (IPPI) basées sur 1986 et des séries correspondantes des indices des prix des produits industriels (IPPI) basées sur 1981, l'année 1986 ayant servi de période de raccordement. Une note explicative sur les méthodes utilisées pour calculer les séries historiques de même qu'un ensemble de tableaux montrant les concordances entre les deux ensembles de séries IPPI sont disponibles au public.

Documents de référence

62-558 Indices des prix de l'industrie, 1986 = 100: Guide aux utilisateurs, 40,00 $.

Cette publication précise sommairement le contenu économique des séries dans un cadre général, de même qu'une brève description des différentes structures d'agrégation. Les tableaux contiennent les schémas de pondération à la fois pour les produits et les agrégats de produits. Y figurent également une description des caractéristiques des indices élémentaires. La publication contient des commentaires sur l'utilisation des indices.

62-556 Indices des prix des produits industriels, 1981 = 100, Concepts et méthodes, 25,00 $.

Cette publication précise le contenu économique des séries dans le cadre général du système des comptes nationaux, et son impact sur la méthodologie des indices de prix. Elle contient une description des méthodes d'échantillonnage et d'observation des prix, de même que des méthodes de calcul et d'agrégation des indices.

La publication contient également un glossaire.

RAW MATERIALS PRICE INDEXES (1986 = 100)

The Raw Materials Price Indexes (RMPI) measure price changes for the purchase of raw materials by Canadian industry. The term "raw material" refers either to a commodity that is sold for the first time after being extracted from nature, or a substitutable recycled product (e.g. metal scrap). For example wheat is considered as a raw material, but wheat flour is not, iron ore is but not pig iron, coal but not electricity. Approximately eighty commodities are priced in the index, grouped into seven major components.

The index and the major group indexes, on a 1986 time base, are published monthly in the Daily Bulletin approximately four weeks after the end of the reference month. They are also available at that time on CANSIM in matrix 2009.

These indexes are a continuation of the previously published Raw Materials Price Indexes, 1981 = 100. The new, 1986 = 100 indexes can be linked with their equivalents in the 1981 = 100 series using the link factors which were released in the July 1990 issue and repeated in the December issue of this publication.

The index covers purchases of domestically produced and imported goods by Canadian industry, generally for further processing, and does not cover exports or flows of raw materials directly to final demand (principally foodstuffs). For example, potatoes bought by food processing manufacturers (for the manufacture of potato chips, or frozen french fries) are included in the index, but those bought by consumers directly are not.

As a purchasers' price index, prices should include all charges purchasers incur to bring a commodity to the establishment gate. Thus transportation charges, taxes net paid and custom duties are all included. So also are the effects of subsidies, if any are paid to the purchaser.

While prices are ideally collected from the purchaser, there are several cases where other well known prices are used instead: for example, marketing board prices for eggs and milk, and stockyard prices for some livestock. In a few cases, where data for unprocessed materials are not available, prices are taken for a similar commodity at the next stage of processing as occured for some non-ferrous metals. A detailed description of the characteristics of prices for any commodity is available from Prices Division on request.

INDICES DES PRIX DES MATIÈRES BRUTES (1986 = 100)

Les indices des prix des matières brutes (IPMB) mesurent les variations des prix d'achat des matières brutes par les industries canadiennes. L'expression "matières brutes" désigne soit un produit vendu pour la première fois après son extraction de la nature, soit un produit substitut recyclé (tel les déchets de métaux). Ainsi, le blé est considéré comme une matière brute, mais non la farine de blé, le minerai de fer mais non la fonte en gueuses, le charbon mais non l'électricité. Les prix d'environ quatre-vingt produits, regroupés en sept composantes principales, sont recueillis aux fins de l'indice.

L'indice d'ensemble et les indices des composantes principales, ayant comme période de référence 1986, sont publiés mensuellement dans le Quotidien de Statistique Canada, environ quatre semaines après la fin du mois de référence. Ces indices sont également disponibles dans la matrice 2009 de CANSIM.

Ces indices constituent la suite des Indices des prix des matières brutes, 1981 = 100, précédemment publiés. Les nouvelles séries basées 1986 = 100 peuvent être raccordées à leurs séries équivalentes basées 1981 = 100 en utilisant les facteurs de raccordement. Ces derniers sont publiés dans le numéro de juillet 1990, et répétés dans le numéro de décembre de la présente publication.

L'indice couvre les achats par les industries canadiennes de biens produits au Canada et de biens importés, en vue d'une transformation subséquente. L'indice ne couvre cependant pas les exportations, ni les matières brutes qui se rendent directement à la demande finale (principalement les denrées alimentaires). Par exemple, les pommes de terre achetées par les fabricants de produits alimentaires (pour la production de croustilles ou de pommes de terre congelées) sont pris en compte dans l'indice, alors que celles directement achetées par les consommateurs ne le sont pas.

Comme il s'agit d'un indice des prix d'achat, les prix devraient comprendre tous les frais supportés par l'acheteur pour faire parvenir le produit à la porte de l'établissement. Les frais de transport, les taxes nettes payées et les droits de douane, de même que les effets de toute subvention versée à l'acheteur, sont donc incorporés aux prix.

Bien qu'idéalement, les prix sont directement recueillis auprès des acheteurs, il existe en pratique un certain nombre de cas où des prix provenant d'autres sources bien connues sont utilisés: par exemple, les prix des offices de commercialisation des oeufs et du lait, les prix des parcs à bestiaux. Dans un certain nombre de cas où les données pour les matières non transformées ne sont pas disponibles, les prix sont prélevés pour un produit semblable à l'étape suivante de transformation. Tel est le cas notamment pour certains métaux non ferreux. La Division des prix fera parvenir sur demande une description détaillée des caractéristiques des prix d'un produit donné.

Prices collected each month are those in effect on the 15th of the month or the nearest prior business day. In a few cases, prices used are averages for the week which includes the 15th. Prices are reported directly to Statistics Canada or are taken from trade publications or from publications of other government departments.

Weights were derived from the 1986 Input/Output tables which provide values at purchasers prices of commodities purchased as intermediate inputs.

Indexes for aggregates of individual raw materials are calculated according to the following formula:

Les prix recueillis chaque mois sont ceux en vigueur le 15 du mois ou le jour ouvrable qui le précède immédiatement. Dans certains cas, les prix relevés représentent la moyenne des prix de la semaine englobant le 15 du mois. Les prix sont soit déclarés directement à Statistique Canada, soit tirés de revues spécialisées ou de publications d'autres organismes gouvernementaux.

Les pondérations furent dérivées des tableaux d'entrées-sorties de 1986, qui fournissent les valeurs aux prix d'achat des produits acquis à titre d'entrées intermédiaires.

Les indices pour les agrégats de matières brutes individuelles sont dégagés à l'aide de la formule suivante:

$$P_{t/o}^{(agg)} = \sum_i \frac{w^i}{\sum w^i} \cdot P_{t/o}^{i}$$

$P_{t/o}^{(agg)}$	denotes the composite price index movement between the base period o and time t for the defined aggregate;
w^i	is the transaction value of the element i in 1986;
$P_{t/o}^{i}$	is the price index for element i, meaning its price change from the base period o to time t;
Σ_i	indicates summation over all elements i in the defined aggregate.

$P_{t/o}^{(agg)}$	dénote le mouvement de l'indice composite de prix entre la période de référence o et la période courante t pour l'agrégat spécifié;
w^i	est la valeur de transaction de l'élément i en 1986;
$P_{t/o}^{i}$	est l'indice de prix de l'élément i, c'est-à-dire son changement de prix de la période de référence o à la période courante t;
Σ_i	indique la sommation sur tous les éléments i faisant partie de l'agrégat spécifié.

Within individual commodity indexes, the prices are weighted according to their market share in a recent year. In a few instances, where data are not available, the price quotations are equally weighted.

À l'intérieur des indices individuels des produits, les prix sont pondérés selon leurs parts du marché pour une année récente. Dans quelques cas où les données ne sont pas disponibles, les cotes de prix ont des pondérations équivalentes.

ELECTRIC POWER SELLING PRICE INDEXES (NON-RESIDENTIAL), 1986 = 100

Electric Power Selling Price Indexes are published on a regional and provincial basis for two broad industrial customer categories of sales; for bills less than 5000 KW and for sales of 5000 KW or more. Prices are reported by electric utilities for non-interruptible power contracts with manufacturing, service, and other Canadian industrial customers. Monthly prices are collected from all major generating and distributing utilities three times a year. The resulting indexes are released with other monthly Industry Price Indexes for April, August and December of each year. The indexes have 1986 as a time reference base and the weights used are 1986 company revenues from sales of electricity, as collected by Prices Division.

The formula used to calculate the Electric Power Selling Price Indexes is a fixed weighted index formulation, which is the same as that described for the Industrial Product Price Indexes, 1986 = 100, technical notes presented above. The indexes are available on CANSIM in matrix 2020. Indexes for the current year and the previous year are subject to revision.

These indexes are a continuation of the previously published Electricity Selling Price Indexes, 1981 = 100. The new, 1986 = 100 indexes can be linked with their equivalents in the 1981 = 100 series using the link factors which were released in the July 1990 issue and repeated in the December issue of this publication.

For further details, please contact Prices Division, Statistics Canada, Ottawa, Ontario K1A 0T6, telephone 951-3350, facsimile (613)951-2848.

INDICES DES PRIX DE VENTE DE L'ÉNERGIE ÉLECTRIQUE (NON RÉSIDENTIELLE), 1986 = 100

Les indices des prix de vente de l'énergie électrique sont publiés, par région et par province, pour deux grandes catégories de clients industriels, soit les factures de moins de 5000 kW et les factures de 5000 kW et plus. Les prix sont déclarés par les services publics d'électricité pour des contrats d'énergie non susceptible d'être interrompue, conclus avec des manufacturiers, des services et d'autres clients industriels canadiens. Les prix mensuels sont relevés trois fois par année auprès de tous les grands services de production et de distribution d'énergie. Les indices établis, accompagnant d'autres indices mensuels des prix de l'industrie, sont diffusés chaque année aux mois d'avril, d'août et de décembre. Les indices ont comme période de référence 1986, et les pondérations sont fondées sur les recettes au titre des ventes qu'ont touchées les entreprises en 1986, telles que recueillies par la Division des prix.

Le calcul des indices des prix de vente de l'énergie électrique se fait à l'aide d'une formule d'indice à pondération fixe, identique à celle décrite ci-dessus dans les notes techniques des Indices des prix des produits industriels, 1986 = 100. Les indices sont disponibles par l'entremise de CANSIM sur la matrice 2020. Les indices de la présente année et de l'année précédente sont sujets à révision.

Ces indices constituent la suite des indices des prix de vente de l'énergie électrique, 1981 = 100, précédemment publiés. Les nouvelles séries basées 1986 = 100 peuvent être raccordées à leurs séries équivalentes basées 1981 = 100 en utilisant les facteurs de raccordement. Ces derniers sont publiés dans le numéro de juillet 1990 et répétés dans le numéro de décembre de la présente publication.

Pour plus de renseignements, veuillez contacter la Division des prix, Statistique Canada, Ottawa, Ontario K1A 0T6, téléphone 951-3350, télécopieur (613)951-2848.

CONSULTING ENGINEERS' OUTPUT PRICE INDEXES (1992 = 100)

The consulting engineers' output price indexes (CEPI) measure the price changes of the services provided by consulting engineers. These services, which include advisory work, design work and supervision of its implementation, and project management, are provided for a variety of projects, and in different parts of the country. The data published in Tables 7 and 8 include indexes (column A in the tables) for 13 different fields of specialization, corresponding to those in the Survey of Consulting Engineers. For some fields of specialization indexes for different regions of the country are provided. An index for foreign projects is also given.

Indexes are published annually, approximately three months after the end of each calendar year. They are available at that time on CANSIM in matrices 2047, 2048 and 2049, or from Prices Division. Indexes for the latest year are subject to revision.

These indexes, dating from 1989, are the first to cover these activities. They are based on information from a sample of consulting engineering firms in Canada. The overall indexes are calculated by combining indexes for three separate measures : wage and salary rates, realized net multipliers (or fee-to-direct salary ratios),and output per unit of labour input (or labour productivity). Indexes are published for the changes in wage and salary rates, and in realized net multipliers, in columns B and C, respectively.

Respondents provide wage and salary movements, as they determine rates, usually annually. For each respondent this is the average of changes in the rate that would be paid to someone of certain abilities with a certain level of experience. It is not the change in average wages and salaries paid, because that would change with the mix of employees and experience. Respondents provide information on their realized net multipliers annually at the end of their financial year. Each respondent provides individual multipliers for each segment of activity for which the mark-up may differ. This may be as detailed as a specialization in one region, but the same multiplier may apply to more than one specialization or more than one region. In those cases the report is used as an observation in each of the areas covered. As the multipliers are realized figures, after the year is over, they reflect what was actually earned as a ratio of direct salaries, rather than what might have been intended. Productivity adjustments are calculated at a more aggregative level and applied evenly to all regions and specialities.

INDICES DE PRIX DES SORTIES DES SERVICES D'INGÉNIEURS-CONSEILS (1992 = 100)

Les indices de prix des sorties des services d'ingénieurs-conseils (IPIC) mesurent les variations de prix des services fournis par les ingénieurs-conseils. Ces services, qui comprennent des services de consultation, des travaux de conception et la surveillance de leur mise en oeuvre et des services de gestion de projets, sont offerts pour une variété d'activités et dans différentes régions du pays. Les données publiées aux tableaux 7 et 8 comprend les indices (colonne A dans les tableaux) de 13 différents domaines de spécialisation correspondant à ceux qui font l'objet de l'Enquête auprès des ingénieurs-conseils. Dans certains domaines de spécialisation, les indices sont établis pour différentes régions du pays. On trouve également un indice des projets réalisés à l'étranger.

Les indices sont publiés chaque année, environ trois mois après la fin de l'année civile. On peut alors les extraire de la base CANSIM dans les matrices 2047, 2048 et 2049 ou les obtenir auprès de la Division des prix. Les indices de la dernière année font l'objet d'une révision.

Ces indices, qui remontent à 1989, sont les premiers à couvrir de telles activités. Ils sont fondés sur des renseignements obtenus auprès d'un échantillon des entreprises d'ingénieurs-conseils du Canada. Les indices d'ensemble sont calculés en groupant les indices établis selon trois différentes mesures : les taux de salaires et de traitements, les multiplicateurs nets réels (ou les ratios des honoraires aux traitements directs) et la production par unité de main-d'oeuvre (ou productivité du travail). Les indices présentent, dans les colonnes B et C respectivement, les variations des salaires et des traitements, ainsi que des multiplicateurs nets réels.

Les répondants fournissent, chaque année habituellement, les données sur les mouvements des salaires et des traitements, car ces mouvements déterminent les taux. Pour chaque répondant, il s'agit de la variation moyenne du taux de rémunération qui serait versé à une personne possédant certaines compétences et une certaine expérience. Il ne s'agit pas de la variation des salaires et des traitements moyens versés, car ces derniers varient en fonction de la composition et de l'expérience des employés. Chaque année, à la fin de leur exercice, les répondants fournissent les données sur leurs multiplicateurs nets réels. Chaque répondant fournit ses multiplicateurs propres pour chaque segment d'activité pour lequel la majoration peut varier. Les renseignements fournis peuvent être aussi détaillés qu'une spécialisation dans une région donnée; cependant, on peut appliquer le même multiplicateur à plus d'une spécialisation ou d'une région. Dans ces cas, le rapport sert de rapport d'observation pour chacune des régions étudiées. Comme les multiplicateurs sont réels, ils représentent, à la fin de l'année, la rémunération réelle en ratio des traitements directs plutôt que la rémunération prévue. Les ajustements de la productivité sont calculés à un niveau plus agrégatif et appliqués équitablement à toutes les régions et spécialisations.

The finest market identified is for a field of specialization in a region. Six regions in Canada are identified: Atlantic provinces, Quebec, Ontario, Manitoba/Saskatchewan, Alberta, and British Columbia. Regional indexes are calculated for buildings, transportation, municipal services, and other environmental services. Canada indexes only are calculated for individual industrial specialities. However, the index for all industrial services differs from region to region because of the different mix of industrial projects.

The indexes at the finest level of detail are calculated as unweighted geometric averages of the returns from individual respondents. These indexes are aggregated to more general indexes using fixed weights. For combining regional indexes within a field of specialization the geographical distributions from the Survey of Capital Expenditures, 1989, 1990 and 1991 were used. For combining indexes for fields of specialization weights were taken from the Survey of Consulting Engineers for 1989 and 1991.

For further information: Please contact Prices Division, Statistics Canada, Ottawa, Ontario K1A 0T6. For data only please, contact the Information Unit in Prices Division at 613-951-3350, (fax: 613-951-2848), or any regional office, whose addresses and phone numbers are on the inside front cover of this book. For further information on concepts and methods, contact Bernard Lupien (613-951-9605).

L'indice le plus détaillé est celui du domaine de spécialisation dans une région donnée. Il existe six régions au Canada : les provinces de l'Atlantique, le Québec, l'Ontario, le Manitoba/ Saskatchewan, l'Alberta et la Colombie-Britannique. Les indices des régions sont calculés pour les bâtiments, les transports, les services municipaux et d'autres services environnementaux. Les indices pour le Canada seulement sont calculés pour chaque spécialisation industrielle. Cependant, l'indice de l'ensemble des services aux entreprises diffère d'une région à l'autre en raison de la variété des projets des entreprises.

Les indices les plus détaillés sont calculés en tant que moyennes géométriques non pondérées des chiffres fournis par les répondants. Ces indices sont groupés sous forme d'indices plus généraux à pondération fixe. Pour grouper les indices régionaux d'un même domaine de spécialisation, on se fonde sur la répartition géographique de l'Enquête sur les dépenses d'immobilisations de 1989, de 1990 et de 1991. Pour grouper les indices des domaines de spécialisation, on se sert des poids appliqués dans le cadre de l'Enquête auprès des ingénieurs-conseils de 1989 et de 1991.

Pour plus de renseignements, communiquer avec la Division des prix, Statistique Canada, Ottawa (Ontario) K1A 0T6. Pour obtenir des données seulement, communiquer avec l'Unité de l'information de la Division des prix au numéro 613-951-3350 (téléc. : 613-951-2848) ou avec les bureaux régionaux dont les coordonnées figurent au dos du plat supérieur de la présente publication. Pour plus de renseignements sur les concepts et les méthodes, communiquer avec Bernard Lupien (613-951-9605).

Are you getting your information on the Canadian economy "first-hand"?

Chances are, you spend hours reading several newspapers and a handful of magazines trying to get the whole economic picture -- only to spend even more time weeding out fiction from fact! Wouldn't it be a great deal more convenient (and much more effective) to go straight to the source?

Join the thousands of successful Canadian decision-makers who turn to Statistic Canada's *Canadian Economic Observer* for their monthly briefing. Loaded with first-hand information, collectively published nowhere else, CEO is a quick, concise and panoramic overview of the Canadian economy. Its reliability and completeness are without equal.

A single source

Consultations with our many readers – financial analysts, planners, economists and business leaders – have contributed to CEO's present, widely-acclaimed, two-part format. The **Analysis Section** includes thought-provoking commentary on current economic conditions, issues, trends and developments. The **Statistical Summary** contains the complete range of hard numbers on critical economic indicators: markets, prices, trade, demographics, unemployment and more.

More practical, straightforward and user-friendly than ever before, the ***Canadian Economic Observer*** gives you more than 150 pages of in-depth information in one indispensable source.

Why purchase CEO?

As a subscriber, you'll be directly connected to Statistics Canada's economic analysts – names and phone numbers are listed with articles and features. You'll also receive a copy of CEO's annual **Historical Statistical Supplement** – at no additional cost.

So why wait for others to publish Statistics Canada's data second-hand when you can have it straight from the source? Order your subscription to the ***Canadian Economic Observer*** today.

The ***Canadian Economic Observer*** (catalogue no. 10-2300XPB) is $220 annually in Canada, US$260 in the United States and US$310 in other countries. Highlights of the ***Canadian Composite Leading Indicator*** (catalogue no. 11F0008XFE) are available by fax – the same day of release – for $70 annually in Canada and US$70 in the United States.

To order, write to: Statistics Canada, Marketing Division, Sales and Service, 120 Parkdale Avenue, Ottawa, Ontario, K1A 0T6 or contact the nearest Statistics Canada Reference Centre listed in this publication. If more convenient, fax your order to 1-613-951-1584 or call toll-free 1-800-267-6677 and use your VISA or MasterCard.

Recevez-vous directement vos informations sur l'économie canadienne?

Il est probable que vous passez des heures à lire plusieurs journaux et un paquet de revues pour essayer d'avoir une vue complète de la situation économique, et ensuite passer encore plus de temps à séparer le réel de ce qui ne l'est pas. Ne serait-il pas plus pratique (et beaucoup plus efficace) de remonter directement à la source?

Joignez-vous aux milliers de décideurs canadiens gagnants qui lisent *L'Observateur économique canadien* pour leur séance de rapport mensuelle. Rempli de renseignements disponibles nulle part ailleurs, L'OEC permet d'avoir une vue générale rapide et concise de l'économie canadienne. Il est inégalé par sa fiabilité et son exhaustivité.

Une seule source

Les consultations que nous avons eues avec nos nombreux lecteurs, des analystes financiers, des planificateurs, des économistes et des chefs d'entreprise, nous ont permis de présenter L'OEC dans son format actuel en deux parties, qui a été bien accueilli. La **section de l'analyse** contient des commentaires qui donnent à réfléchir sur la conjoncture économique, ses problèmes, ses tendances et ses développements. L'**aperçu statistique** contient l'ensemble complet des chiffres réels pour les indicateurs économiques essentiels : les marchés, les prix, le commerce, la démographie, le chômage, et bien d'autres encore.

Plus pratique, plus simple, plus facile à utiliser qu'auparavant, ***L'Observateur économique canadien*** vous offre plus de 150 pages de renseignements poussés sous une seule couverture.

Pourquoi acheter L'OEC?

En tant qu'abonné à L'OEC, vous êtes directement relié aux analystes économiques de Statistique Canada : des noms et des numéros de téléphone sont cités dans les articles et les rubriques. Vous recevrez également un exemplaire du **Supplément statistique historique** annuel à titre gracieux.

Pourquoi devez-vous donc attendre que d'autres publient les données de Statistique Canada qu'ils ont reprises alors que vous pouvez les obtenir directement à la source? Abonnez-vous à ***L'Observateur économique canadien*** dès aujourd'hui.

Le prix de l'abonnement annuel à ***L'Observateur économique canadien*** (n° 10-2300XPB au catalogue) est de 220 $ au Canada, de 260 $ US aux États-Unis et de 310 $ US dans les autres pays. Les faits saillants de l'***Indicateur composite avancé*** (n° 11F0008XFF au catalogue) sont offerts par télécopieur – le jour même de leur parution – pour 70 $ par année au Canada et 70 $ US aux États-Unis.

Pour commander, écrivez à : Statistique Canada, Division du marketing, Vente et service, 120, av. Parkdale, Ottawa (Ontario) K1A 0T6, ou adressez-vous au Centre de consultation de Statistique Canada le plus proche de chez vous et dont la liste figure dans cette publication. Si vous le préférez, vous pouvez envoyer votre commande par télécopieur au 1-613-951-1584, ou téléphoner sans frais au 1-800-267-6677 et utiliser votre carte VISA ou MasterCard.

SERVICES INDICATORS

For and About Businesses Serving the Business of Canada...

At last, current data and expert analysis on this VITAL sector in one publication!

The services sector now dominates the industrial economies of the world. Telecommunications, banking, advertising, computers, real estate, engineering and insurance represent an eclectic range of services on which all other economic sectors rely.

Despite their critical economic role, however, it has been hard to find out what's happening in these industries. Extensive and time-consuming efforts have, at best, provided a collection of diverse bits and pieces of information ... an incomplete basis for informed understanding and effective action.

Now, instead of this fragmented picture, ***Services Indicators*** brings you a cohesive whole. An innovative quarterly from Statistics Canada, this publication **breaks new ground**, providing timely updates on performance and developments in:

- *Communications*
- *Finance, Insurance and Real Estate*
- *Business Services*

Services Indicators brings together analytical tables, charts, graphs and commentary in a stimulating and inviting format. From a wide range of key financial indicators including profits, equity, revenues, assets and liabilities, to trends and analysis of employment, salaries and output – PLUS a probing feature article in every issue, ***Services Indicators*** gives you the complete picture **for the first time**!

Finally, anyone with a vested interest in the services economy can go to ***Services Indicators*** for **current** information on these industries ... both at-a-glance and in more detail than has ever been available before – all in one unique publication.

If **your** business is serving business in Canada, or if you are involved in financing, supplying, assessing or actually using these services, ***Services Indicators*** is a turning point – an opportunity to forge into the future armed with the most current insights and knowledge.

Order YOUR subscription to ***Services Indicators*** today!

Services Indicators (catalogue no. 63-0160XPB) is $112 (plus 7% GST) in Canada, US$135 in the United States and US$157 in other countries.

To order, write to Statistics Canada, Marketing Division, Sales and Service, 120 Parkdale Avenue, Ottawa, Ontario K1A 0T6 or contact the nearest Statistics Canada Regional Reference Centre listed in this publication.

If more convenient, fax your order to **1-613-951-1584** or call **1-800-267-6677** toll-free in Canada and the United States [**1-613-951-7277** elsewhere] and charge to your VISA or MasterCard.

INDICATEURS DES SERVICES

Au sujet des entreprises au service des affaires du Canada et à leur intention...

Enfin regroupées en une publication, des données courantes et des analyses éclairées sur ce secteur ESSENTIEL!

Le secteur des services domine à l'heure actuelle les économies industrielles du monde. Les télécommunications, les opérations bancaires, la publicité, l'informatique, l'immobilier, le génie et l'assurance représentent une gamme éclectique de services sur lesquels reposent tous les autres secteurs économiques.

En dépit de leur rôle critique sur le plan économique, il est toutefois difficile de savoir ce qui se passe dans ces branches d'activité. Des efforts considérables et fastidieux ont permis, au mieux, de rassembler une collection de renseignements fragmentaires divers... qui ne favorisent pas la compréhension avisée et la prise de mesures efficaces.

Remplacez **maintenant** ce tableau fragmentaire par l'image cohérente que vous offre ***Indicateurs des services***. Cette publication trimestrielle innovatrice de Statistique Canada **pénètre dans un domaine inexploré**, fournissant des aperçus opportuns du rendement et des progrès dans les domaines suivants :

- *Communications*
- *Finance, assurance et immobilier*
- *Services aux entreprises*

Indicateurs des services rassemble des tableaux analytiques, des diagrammes, des graphiques et des observations en un mode de présentation stimulant et attrayant. En puisant à même une vaste gamme d'indicateurs financiers importants, allant notamment des profits, des capitaux propres, des recettes, de l'actif et du passif aux tendances et analyses de l'emploi, des salaires et de l'extrant – à laquelle s'ajoute un article de fond exploratif dans chaque numéro, ***Indicateurs des services*** brosse **pour la première fois** un tableau complet!

Enfin, quiconque s'intéresse au secteur des services peut consulter ***Indicateurs des services*** pour trouver des renseignements **courants** sur ces branches d'activité... tant sous une forme sommaire qu'à un niveau de détail n'ayant jamais encore été offert – et ce, dans une même publication.

Si vous êtes de ceux qui fournissent des services aux entreprises canadiennes, ou si vous financez, fournissez ou évaluez ces services ou y avez en fait recours, ***Indicateurs des services*** représente un tournant – une chance de s'aventurer dans l'avenir en étant armé des réflexions et connaissances les plus actuelles.

Commandez dès aujourd'hui VOTRE abonnement à ***Indicateurs des services***!

Indicateurs des services (n° 63-0160XPB au catalogue) coûte 112 $ (plus 7 % de TPS) au Canada, 135 $ US aux États-Unis et 157 $ US dans les autres pays.

Pour commander, écrivez à Statistique Canada, Division du marketing, Vente et service, 120, avenue Parkdale, Ottawa (Ontario) K1A 0T6, ou communiquez avec le Centre régional de consultation de Statistique Canada le plus près (voir la liste qui figure dans la présente publication).

Si vous préférez, vous pouvez télécopier votre commande en composant le **1-613-951-1584** ou téléphoner sans frais du Canada et des États-Unis au **1-800-267-6677** [ou d'ailleurs, au **1-613-951-7277**] et porter les frais à votre compte VISA ou MasterCard.

✔ Identify Emerging Trends

✔ Define New Markets

✔ Pinpoint Profit Opportunities

To safeguard your place in tomorrow's marketplace, you have to be able to anticipate trends today. To do that, you're going to need some insight into the purchasing trends in the Canadian marketplace.

With a complete profile of Canadian consumers, plus an indepth analysis of Canadian industries, the ***Market Research Handbook*** gives you the most thorough coverage of purchasing trends. This valued bestseller can lead you to new markets by giving you details on:

- how much money Canadians are earning and what they're spending on cars, rent, home entertainment and household appliances;
- the level of sales in retail chain and department stores;
- what goods are being traded between Canada, U.S., and other countries;
- census data such as: age/sex, schooling, households, unemployment, interprovincial and international migration

...and much, much more!

With over 600 pages, the ***Handbook*** includes more than 200 statistical tables that give you instant access to provincial and national market data. Featured are important economic indicators such as the **Gross Domestic Product**, **Labour Force Productivity**, **Private and Public Investment** and the **Consumer Price Index**.

Order your copy of the ***Market Research Handbook*** (Catalogue #63-2240XPB) today for only $110 in Canada plus $7.70 GST, US$132 in the United States, and US$154 in other countries.

CALL TOLL-FREE 1-800-267-6677 **OR FAX** (613)951-1584 and use your VISA or MasterCard. **OR MAIL** your order to: Statistics Canada, Marketing Division, Sales and Service, 120 Parkdale Avenue, Ottawa, Ontario, K1A 0T6, or contact the nearest Statistics Canada Regional Office listed in this publication.

✔ Dégagez les nouvelles tendances

✔ Définissez les nouveaux marchés

✔ Déterminez les possibilités de profit

Pour maintenir votre place sur le marché de demain, vous devez être en mesure de prévoir les tendances aujourd'hui. Pour ce faire, vous devrez comprendre les habitudes d'achat sur le marché canadien.

Renfermant un profil complet des consommateurs canadiens ainsi qu'une analyse approfondie des industries canadiennes, le ***Recueil statistique des études de marché*** brosse un tableau exhaustif des habitudes d'achat. Ce précieux best-seller peut vous faire découvrir de nouveaux marchés en vous fournissant les détails suivants :

- les revenus des Canadiens et leurs dépenses pour la voiture, le loyer, les appareils de divertissement et les appareils ménagers;
- le niveau des ventes dans les magasins de détail à succursales et les grands magasins;
- les biens échangés entre le Canada, les É.-U. et d'autres pays;
- les données du recensement telles que l'âge, le sexe, le niveau de scolarité, les ménages, le chômage, la migration interprovinciale et internationale

...et bien plus encore!

Le ***Recueil***, contenant plus de 600 pages et au delà de 200 tableaux statistiques, vous permettra d'accéder instantanément aux données provinciales et nationales sur le marché. Il traite d'indicateurs économiques importants tels que le **produit intérieur brut**, la **productivité de la population active**, les **investissements privés et publics** et l'**Indice des prix à la consommation**.

Procurez-vous votre exemplaire du ***Recueil statistique des études de marché*** (n° 63-2240XPB au catalogue) dès aujourd'hui pour seulement 110 $ au Canada plus 7,70 $ de TPS, 132 $ US aux États-Unis et 154 $ US dans les autres pays. Commandez votre exemplaire **PAR TÉLÉPHONE EN COMPOSANT SANS FRAIS** le 1-800-267-6677 **OU PAR TÉLÉCOPIEUR** au (613) 951-1584 et utilisez votre carte VISA ou MasterCard, **OU PAR LA POSTE** à l'adresse suivante : Statistique Canada, Division du marketing, Vente et service, 120, av. Parkdale, Ottawa (Ontario) K1A 0T6, ou communiquez avec le bureau régional de Statistique Canada le plus près dont la liste figure dans la présente publication.

Data in Many Forms . . .

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered. Data are available on CD, diskette, computer print-out, microfiche and microfilm, and magnetic tape. Maps and other geographic reference materials are available for some types of data. Direct online access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable database and retrieval system.

Standards of Service to the Public

To maintain quality service to the public, Statistics Canada follows established standards covering statistical products and services, delivery of statistical information, cost-recovered services and services to respondents. To obtain a copy of these service standards, please contact your nearest Statistics Canada Regional Reference Centre.

Des données sous plusieurs formes . . .

Statistique Canada diffuse les données sous formes diverses. Outre les publications, des totalisations habituelles et spéciales sont offertes. Les données sont disponibles sur disque compact, disquette, imprimé d'ordinateur, microfiche et microfilm, et bande magnétique. Des cartes et d'autres documents de référence géographiques sont disponibles pour certaines sortes de données. L'accès direct à des données agrégées est possible par le truchement de CANSIM, la base de données ordinolingue et le système d'extraction de Statistique Canada.

Comment obtenir d'autres renseignements

Toute demande de renseignements au sujet de cette publication ou de statistiques et services connexes doit être adressée à la:

Sous-section du service à la clientèle,
Division des prix,

Statistique Canada, Ottawa, K1A 0T6 (téléphone: 1-613-951-3350) ou au centre de consultation de Statistique Canada à:

Note of Appreciation

Canada owes the success of its statistical system to a long-standing cooperation involving Statistics Canada, the citizens of Canada, its businesses, governments and other institutions. Accurate and timely statistical information could not be produced without their continued cooperation and goodwill.

Note de reconnaissance

Le succès du système statistique du Canada repose sur un partenariat bien établi entre Statistique Canada et la population, les entreprises, les administrations canadiennes et les autres organismes. Sans cette collaboration et cette bonne volonté, il serait impossible de produire des statistiques précises et actuelles.

Symbols

The following standard symbols are used in Statistics Canada publications:

.. figures not available.

... figures not appropriate or not applicable.

– nil or zero.

-- amount too small to be expressed.

p preliminary figures.

r revised figures.

x confidential to meet secrecy requirements of the Statistics Act.

Signes conventionnels

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada:

.. nombres non disponibles.

... n'ayant pas lieu de figurer.

– néant ou zéro.

-- nombres infimes.

p nombres provisoires.

r nombres rectifiés.

x confidentiel en vertu des dispositions de la Loi sur la statistique relatives au secret.

NOTE ON CANSIM

CANSIM® (Canadian Socio-Economic Information Management System) is Statistics Canada's computerized data bank and its supporting software. Most of the data appearing in this publication, as well as many other data series are available from CANSIM via terminal, on computer printouts, or in machine readable form. Historical and more timely data, not included in this publication, are available from CANSIM.

For further information write to Marketing Division, Statistics Canada, Ottawa, K1A 0T6 or call (613) 951-8200.

® Registered Trade Mark of Statistics Canada.

NOTE CONCERNANT CANSIM

Le CANSIM® (Système canadien d'information socio-économique) est le système de Statistique Canada qui se compose d'une banque de données informatisées et de son logiciel de soutien. La plupart des données présentées dans cette publication et beaucoup d'autres données contenues dans le CANSIM peuvent être extraites par l'intermédiaire d'un terminal, sous forme d'imprimés d'ordinateur ou sous forme lisible par machine. Des données historiques et des données plus actuelles qui n'apparaissent pas dans cette publication sont disponibles de CANSIM.

Pour plus de renseignements, écrivez à la Division du marketing, Statistique Canada, Ottawa, K1A 0T6 ou téléphonez à (613) 951-8200.

® Marque déposée de Statistique Canada.

Revision

Unless otherwise stated, price indexes in this publication are subject to revision for the most recent six months shown. Any revisions beyond these limits are so indicated.

The paper used in this publication meets the minimum requirements of American National Standard for Information Sciences – Permanence of Paper for Printed Library Materials, ANSI Z39.48 – 1984.
♾

Révisions

Sauf avis contraire, les indices de prix contenus dans la présente publication sont susceptibles d'être révisés pour les six derniers mois indiqués. Toute révision portant sur une plus longue période est indiquée.

Le papier utilisé dans la présente publication répond aux exigences minimales de l'"American National Standard for Information Sciences" – "Permanence of Paper for Printed Library Materials", ANSI Z39.48 – 1984.

HIGHLIGHTS

Industrial Product Price Index

In July, the 12-month change in industrial prices continued to slow for a fourth consecutive month. As the overall level of industrial prices edged down 0.1% from its June level, the 12-month change dropped to 7.8%. The 12-month change in industrial prices peaked at 10.3% in January. Since then, with the exception of March, it has slowed. Primary metal and petroleum product prices, together with the slow increase in the value of the Canadian dollar against the United States dollar, accounted for most of this decline. Increases in the 12-month price change for paper and allied products and for printing and publishing partly offset those movements.

On a monthly basis, the overall level of industrial prices edged down 0.1%. Pushing the price level down were petroleum products and ethylene, changes in buyer incentive programs for cars and vans, and a rise in the Canadian dollar. Price increases for pulp, paper, and lumber partly offset the decline.

The most significant source of upward pressure on industrial prices in July came from softwood lumber (+5.1%), pulp (+1.8%) and newsprint (+1.9%). Much of the rise in softwood lumber prices was due to spruce, pine and fir in Central Canada and on the Prairies. Pulp and newsprint prices continued to increase in July. Further price increases for newsprint are projected. However, North American daily newspapers have noticeably reduced their consumption of newsprint since 1994. The demand for newsprint from Southeast Asia is also reported to be slowing.

The appreciation of the Canadian dollar against the U.S. dollar (1.3% between June 15 and July 15) meant manufacturers selling goods priced in U.S. dollars received fewer Canadian dollars for their products. This affected exporters of motor vehicles, lumber, pulp, paper, and non-ferrous primary metal products. If the effect of the Canadian dollar's rise were excluded, the monthly change in industrial prices would have been a little under 0.2%.

More attractive buyer incentive programs resulted in automobile prices edging down in Canada. Prices for gasoline and fuel oils declined for a second consecutive month. Petroleum product prices followed the downward trend in crude oil prices which had began in May. Much of the 3.5% drop in chemical and chemical product prices was the result of a sharp decline in the price of ethylene.

FAITS SAILLANTS

Indice des prix des produits industriels

En juillet, la variation sur douze mois des prix industriels continue de ralentir pour un quatrième mois de suite. Le niveau général des prix industriels se replie de 0,1% par rapport à son niveau de juin et la variation sur douze mois tombe pour cette raison à 7,8%. La variation sur douze mois des prix industriels était passée par un sommet de 10,3% en janvier. Depuis, à l'exception de mars, elle s'est ralentie. La plus grande partie de cette diminution s'explique par les prix des métaux de première transformation et des produits du pétrole ainsi que la lente appréciation du dollar canadien par rapport à la devise américaine. La hausse des variations de prix sur douze mois pour le papier et produits connexes ainsi que pour l'impression et l'édition compense en partie ces fluctuations.

Sur base mensuelle, le niveau général des prix industriels se replie de 0,1%. La baisse des prix s'explique par les cours des produits du pétrole et de l'éthylène, par des changements dans les programmes promotionnels pour les voitures et les fourgonnettes et par l'appréciation du dollar canadien. La hausse du prix de la pâte de bois, du papier et du bois de construction compense en partie cette baisse.

La cause principale de la pression à la hausse sur les prix industriels en juillet sont le bois de résineux (+ 5,1%), la pâte de bois (+1,8%) et le papier journal (+ 1,9%). La plus grande partie de l'accroissement du prix du bois de résineux est attribuable à celui de l'épinette, du pin et du sapin du Canada central et des Prairies. Le prix de la pâte de bois et du papier journal continuent d'augmenter en juillet. On s'attend à d'autres hausses de prix pour le papier journal. Toutefois, les quotidiens d'Amérique du Nord ont sensiblement réduit leur consommation de papier journal depuis 1994. La demande de papier journal en Asie du Sud-Est ralentirait elle aussi.

La hausse du dollar canadien par rapport au dollar US (1,3% entre le 15 juin et le 15 juillet) signifie que les fabricants qui vendent des produits dont le prix est exprimé en dollars US reçoivent un montant en dollars canadiens moins élevé. Cette situation touche les exportateurs de véhicules automobiles, de bois, de pâte de bois, de papier et de produits métalliques primaires non ferreux. Si l'on exclut l'effet de la réévaluation du dollar canadien, la variation mensuelle des prix industriels aurait été d'un peu moins de 0,2%.

Des programmes promotionnels plus attrayants ont entraîné une baisse du prix véhicules automobiles au Canada. Le prix de l'essence et celui des mazouts baisse pour le deuxième mois consécutif. Le prix des produits du pétrole suit la tendance à la baisse du prix du pétrole brut qui s'était dégagée en mai. La plus grande partie de la chute de 3,5% du prix des produits chimiques est due àune forte baisse du prix de l'éthylène.

According to the most recent available figures, the 12-month increase in Canadian industrial prices has dropped to second place amongst the members of the G7 group of industrialized nations. Italy now leads with a 12-month change of 9.0% posted for May. Nevertheless, the 12-month change in industrial prices for Canada remains over 3 percentage points higher than the United Kingdom which is in third place. Canada's position can be explained by a combination of exchange rate movements, the relatively large role in the Canadian economy of non-ferrous metals and paper and allied products.

In July, consumer goods prices dropped for both the manufacturer and the consumer. The 12-month change in goods prices paid by consumers dropped from 2.6% in June to 2.2% in July. For manufacturers, the 12-month change in the prices received for Canadian consumer goods dropped from about 3% to under 2.5%. About half of what the consumer pays goes to manufacturers, the remainder is divided between retailers, wholesalers, indirect taxes, and transporters.

Domestically, despite lower interest rates, residential construction remains weak as does the demand for motor vehicles. Internationally, industrial production is weaker in the United States and Japan than earlier in the year, although stronger in Germany. Canadian industrial prices, excluding wood products, continue to be generally soft.

Selon les derniers chiffres disponibles, l'augmentation sur douze mois des prix industriels au Canada le classe au deuxième rang parmi les pays industrialisés membres du G-7. L'Italie est maintenant en tête, avec une variation de 9% sur douze mois en mai. Néanmoins, la variation sur douze mois des prix industriels au Canada continue de dépasser de trois points celle du Royaume-Uni, qui vient en troisième position. La place du Canada peut s'expliquer par les fluctuations du taux de change, le rôle relativement important dans l'économie nationale des métaux non ferreux ainsi que du papier et des produits connexes.

En juillet, le prix des biens de consommation baisse à la fois pour le fabricant et pour le consommateur. La variation sur douze mois du prix des biens payé par les consommateurs passe de 2,6% en juin à 2,2% en juillet. Dans le cas des fabricants, cette variation des prix pour les biens de consommation canadiens passe de 3% environ à moins de 2,5%. La moitié environ de ce que le consommateur paye va aux fabricants, le reste est partagé entre les détaillants, les grossistes, les impôts indirects et les transporteurs.

Au Canada, en dépit de la réduction des taux d'intérêt, la construction résidentielle reste faible, de même que la demande de véhicules automobiles. À l'étranger, la production industrielle aux États-Unis et au Japon s'est affaiblie depuis le début de l'année, mais elle est plus forte en Allemagne. Les prix industriels canadiens, sauf ceux des produits du bois, restent dans l'ensemble sans vigueur.

NOTE TO USERS

The Industrial Product Price Index (IPPI) reflects prices producers receive as goods leave their plants. It does not reflect what consumers pay. Unlike the Consumer Price Index (CPI), the IPPI excludes indirect taxes and the costs (transportation, wholesale, and retail costs) that occur from the time a good leaves a plant until the final user takes possession.

Canadian producers export many goods. They often quote their prices in foreign currencies, particularly for motor vehicles, pulp, paper, and wood products. A rise or fall in the value of the Canadian dollar against the U.S. dollar therefore affects the IPPI. A 1.0% change in the value of the Canadian dollar against the U.S. dollar has been estimated to change the IPPI by about 0.2%.

NOTES AUX UTILISATEURS

L'indice des prix des produits industriels (IPPI) retrace les prix que les producteurs reçoivent au moment où les produits franchissent les portes de l'usine. Il ne retrace pas ce que le consommateur paie. Contrairement à l'indice des prix à la consommation (IPC), l'IPPI exclut les impôts indirects et tous les coûts (coûts du transport et du commerce de gros et de détail) qui surviennent lorsque le produit part de l'usine jusqu'au moment où l'utilisateur final en prend possession.

Les producteurs canadiens exportent beaucoup de biens. Ils vont souvent indiquer leurs prix en devises étrangères, en particulier dans le cas des véhicules automobiles, des pâtes de bois, du papier et des produits du bois. Les fluctuations de la valeur du dollar canadien par rapport à la devise américaine se répercuteront par conséquent sur l'IPPI. Une variation de 1,0% de la valeur du dollar canadien par rapport au dollar américain devrait, selon les estimations, se traduire par une variation d'environ 0,2% de l'IPPI.

HIGHLIGHTS

Raw Materials Price Index

In July, a drop in the price of crude oil pulled raw material prices down 1.5%. The 12-month change in raw material prices fell to 4.2%, continuing the decline since January when the 12-month change was 18.4%. Lower crude oil prices were marginally offset by higher prices for vegetables, animals and animal products and non-ferrous metals. Excluding mineral fuels, the monthly change in raw material prices would have edged up 0.4%.

Crude oil prices declined more than 7% in July. Compared to April, prices were down almost 15%. The recent drop in crude oil prices appears to be caused by current crude oil surpluses that should extend into the near future. Potentially higher production from the North Sea, and possibly OPEC, compounded by the recently reduced stockpiling of gasoline inventories has pushed oil prices down.

Vegetable product prices have increased 35% since mid-1993. Grains, oilseeds, potatoes, rubber, coffee and cotton led the upward trend in prices. Over the last 12 months, higher prices for grains, raw tobacco, rubber and cotton were mainly responsible for the 14% increase in vegetable prices. Most grain prices rose in July due to tight world supplies and poor growing and harvesting conditions. Wheat prices increased 8% in July and were up almost 46% from July 1994. Cotton prices, rising since early 1994, edged down in July, and are expected to decline further due to expectations of a huge harvest.

Hog prices were up more than 11% in July and more than 24% since the beginning of the year. Demand and costs of production have overshadowed downward price expectations due to the large number of available animals. Meanwhile, cattle prices declined almost 5% in July, down 14% since January.

Wood prices that had been rising have leveled off since May. The price of wood since May has been maintained by demand for pulpwood. This demand may soften somewhat in the coming months as Southeast Asia appears to have lowered their demand for newsprint and North American newspapers are using newsprint more efficiently. The demand for lumber has shown some signs of recovery due to minor changes in housing starts. Residential construction in the United States and Canada, however, remains weak.

FAITS SAILLANTS

Indice des prix des matières brutes

En juillet, une baisse du prix du pétrole brut a entraîné une baisse de 1,5% du prix des matières brutes. La variation sur 12 mois du prix des matières brutes a diminué à 4,2%, continuant le déclin depuis janvier quand le changement annuel était à 18,4%. La baisse du prix du pétrole brut a été légèrement contrebalancée par la hausse des prix des substances végétales, des animaux et substances animales ainsi que des métaux non ferreux. Si l'on ne tient pas compte des combustibles minéraux, le prix des matières brutes aurait connu une augmentation mensuelle de 0,4% en juillet.

Le prix du pétrole brut a diminué de plus de 7% en juillet. Comparativement à avril, les prix se retrouvaient à un niveau inférieur de près de 15%. La baisse récente du prix du pétrole brut semble être due au fait qu'il y a un excédent de pétrole brut actuellement et que cette situation devrait se poursuivre au cours des prochains mois. L'augmentation possible de la production dans la mer du Nord et dans les pays membres de l'OPEP ainsi que la diminution récente des stocks d'essence ont fait baisser le prix du pétrole brut.

Le prix des substances végétales est à la hausse depuis le milieu de 1993, ayant augmenté de 35% depuis ce temps. Cette augmentation est principalement attribuable à la hausse des prix des céréales, des oléagineux, des pommes de terre, du caoutchouc, du café et du coton. Au cours des 12 derniers mois, la hausse des prix de 14% a été due surtout à l'augmentation des prix des céréales, du tabac en feuilles, du caoutchouc et du coton. Le prix de la plupart des céréales a augmenté en juillet, en raison des approvisionnements mondiaux peu élevés et des piètres conditions de croissance et de récolte. Le prix du blé s'est accru de 8% et a atteint un niveau près de 46% supérieur à celui enregistré en juillet 1994. Le prix du coton, qui augmentait depuis le début de 1994, a pour sa part légèrement diminué en juillet; cette baisse devrait d'ailleurs se poursuivre, car on s'attend à une récolte abondante.

Le prix des porcs a augmenté de plus de 11% en juillet et de plus de 24% depuis le début de l'année. La demande et les coûts de production ont éclipsé l'attente des prix à la baisse en raison du nombre élevé d'animaux. Par contre, le prix des bovins a diminué de près de 5% en juillet, pour passer à un niveau inférieur de 14% à celui enregistré au début de l'année.

Le prix du bois qui était à la hausse s'est stabilisé depuis le mois de mai. Depuis ce temps là, il s'est maintenu grâce à la demande de bois à pâte. Il est possible que cette demande s'amenuise quelque peu, car la demande de papier journal semble avoir diminué dans le Sud-Est asiatique et les journaux nord-américains rationalisent leur utilisation du papier journal. La demande de bois d'oeuvre a montré quelques signes de reprise par suite des légères variations qu'ont connues les mises en chantier, mais l'activité est toujours faible dans le secteur de la construction résidentielle aux États-Unis et au Canada.

Non-ferrous metal prices edged upwards in July. Nickel prices, however, jumped more than 10%. Global demand for stainless steel has led to the replenishment of nickel inventories. Copper prices fell almost 13% between January and May and recovered overall 12% in June and July. Future copper prices are uncertain as low inventories are balanced by uncertain demand for automobiles and a weak residential construction sector. Aluminum material prices dropped almost 18% since January. However, assuming demand remains constant and producing countries maintain their level of production, declining inventories should add to future upward price pressures. At this time though, there has been no public confirmation that the agreement (Memorandum of Understanding) amongst aluminum producing countries will go beyond 1995.

Le prix des métaux non ferreux s'est accru légèrement en juillet. Le prix du nickel a toutefois augmenté de plus de 10%, les stocks ayant remonté grâce à la demande d'acier inoxydable. Le prix du cuivre a diminué de 13% entre janvier et mai, pour ensuite augmenter globalement de 12% pour juin et juillet. On ne sait pas ce qu'il adviendra du prix du cuivre, car le niveau peu élevé des stocks est contrebalancé par une demande incertaine dans l'industrie de l'automobile et un faible niveau d'activité dans le secteur de la construction résidentielle. Globalement, le prix des matériaux d'aluminium sont en déclin près de 18% depuis janvier. Si la demande demeure la même et que le niveau de production se maintient, la baisse des stocks devrait contribuer à faire augmenter les prix. Cependant, à l'heure actuelle, il n'y a pas eu de confirmation publique que l'entente (Entente de principe) conclue entre les pays producteurs d'aluminium se poursuivra au-delà de 1995.

NOTE TO USERS

The Raw Materials Price Index (RMPI) reflects the prices paid by Canadian manufacturers for key raw materials. Many of these prices are set in a world market. Also, unlike the Industrial Product Price Index, the RMPI includes goods that are not produced in Canada.

NOTE AUX UTILISATEURS

L'indice des prix des matières brutes est représentatif du prix que les fabricants canadiens paient pour les principales matières brutes. Un grand nombre de ces prix sont fixés sur les marchés mondiaux. De plus, contrairement à l'indice des prix des produits industriels, l'IPMB inclut des biens qui ne sont pas produits au Canada.

Note: Indexes for the most recent six months shown are subject to revision.

Nota: Les indices figurant pour les six mois les plus récents sont sujets à révision.

(1) The bottom line in each series title block may contain, in order from left to right, the following: the CANSIM Databank code number (d nnnnnn), a numeric descriptor, a coverage measure, and a variability measure. The numeric descriptor is of the order ss-mm-nn-pppp-rr where
ss indicates the S-level commodity code (from 9 to 28)
mm indicates the M-level commodity code (from 14 to 43, 45 to 69)
nn indicates either a split of the M-level commodity, or 91, which indicates a special aggregation or 99, which indicates special details.
pppp indicates the PCG code (except for some special aggregations which include several PCGs).
rr indicates a split of a PCG.
The coverage measure for an elemental index is a symbol: E indicates a fully designed sample, S indicates an abbreviated sample, P indicates an indirect estimate. For a composite index the percentage of the coverage which is estimated from direct surveys (E + S) is given, occasionally these coverage measures are rounded to the nearest 5% to preserve confidentiality. The variability measure is given for some indexes to indicate the relative stability of the index estimate due to sampling. The most stable indexes are marked A, the least stable, D. For further information order Industrial Product Price Indexes 1981 = 100, Concepts and Methods (Catalogue 62-556).

(1) En lisant de gauche à droite, la ligne en-dessous de chaque titre des séries présente, en tout ou en partie, l'information suivante: le numéro de code "Databank" de CANSIM (D nnnnnn), un numéro d'identification numérique, une mesure du degré de couverture et une mesure de la variabilité. Le numéro d'identification numérique prend la forme générale ss-mm-nn-pppp-rr où:
ss indique le code du niveau S des produits (de 9 à 28)
mm indique le code du niveau M des produits (de 14 à 43, 45 à 69)
nn indique soit une composante du niveau M des produits, ou prend la valeur de 91 pour les agrégats spéciaux, ou de 99 pour les indices particuliers.
pppp indique le code GPP (sauf pour certains agrégats spéciaux qui comprennent plusieurs GPP)
rr indique une composante d'un GPP.
La mesure du degré de couverture pour les indices élémentaires est présentée à l'aide d'un symbole: E indique un échantillonnage exhaustif, S indique un échantillonage sommaire et P indique une estimation indirecte. Pour les indices composites, la donnée en pourcentage représente une estimation du degré de couverture par échantillonnage direct (E + S). Ces mesures du degré de couverture sont parfois arrondies au 5% le plus près afin d'assurer la confidentialité. La mesure de la variabilité, donnée pour un certain nombre d'indices, indique la stabilité relative de l'indice en tant qu'estimation basée sur un échantillon. Les indices les plus stables sont cotés A, les moins stables, D. Pour plus de renseignements, commandez le document de référence: Indices des prix des produits industriels 1981 = 100, concepts et méthodes (n° 62-556 au catalogue).

TABLE 3. Industrial Product Price Indexes, by Industry and Industry Groups(1)

Note: Indexes for the most recent six months shown are subject to revision.
Nota: Les indices figurant pour les six mois les plus récents sont sujets à révision.

(1) The aggregation of indexes by commodities or by industries should produce the same grand total. When these totals occasionally differ due to rounding, the All Commodities Index shall be regarded as authoritative, and the All Manufacturing Industries is adjusted to match.

(1) L'agrégation des indices par produits ou par industries devraient résulter en un même grand total. Lorsque ces totaux diffèrent occasionnellement en raison de l'arrondissement, l'indice total - tous les produits devra être considéré comme celui qui fait autorité, et l'indice total - toutes les industries manufacturières sera posé égal.

(2) The numeric code to the right of the CANSIM databank number on the last line of each series is the 1980 Standard Industrial Classification (SIC) code. An explanation of the percentage figures (coverage measure) shown to the right of the SIC can be found at the end of Table 2. These coverage measures are rounded to the nearest 5% to preserve confidentiality.

(2) Le code numérique à la droite du numéro Databank de CANSIM apparaissant à la ligne du bas de chaque série est le code de la Classification type des industries (CTI) de 1980. Une explication des données en pourcentage (mesure de degré de couverture) apparaissant à la droite du code CTI est disponible à la fin du tableau 2. Ces mesures de degré de couverture sont arrondies au 5% le plus près afin de préserver la confidentialité.

TABLE 4. Industrial Product Price Indexes, by Stage of Processing

TABLEAU 4. Indices des prix des produits industriels par étape de transformation

EXPLANATION OF METHODS USED AND ADDITIONAL SOURCES FOR INDUSTRIAL PRICE INDEXES

Industrial Product Price Indexes, 1986 = 100

The Industrial Product Price Indexes (IPPI) measure price changes for major commodities sold by Canadian manufacturers. Elemental indexes are calculated for 1314 Principal Commodity Group (PCG) outputs as defined in the 1986 Input/Output (I/O) table. Weights used to aggregate commodity indexes are taken from the output or "Make" matrix of the I/O system which provides an integrated set of commodity values for all manufacturing industries.

Directly surveyed commodities are supported by formal sampling procedures and a quality rating is presented for commodities and aggregations of commodities. Such indexes are derived from prices reported for the 15th of the month or the nearest prior business day for comparable transactions.

Selected indexes are published about four weeks after the reference month in the *Daily Bulletin* (Catalogue 11-001) following a pre-announced schedule of release dates. Simultaneously, all series are available from CANSIM or on request. Catalogue 62-011, *Industry Price Indexes,* is released about four weeks after the Daily Bulletin release. Each series is identified with a CANSIM D number and with a commodity (PCG) or industry (SIC) identifier. Each release of numbers is subject to revision for six months, i.e., when a July index is released, the index for the preceding January becomes final. Exceptions to this rule are announced.

Price Surveys

About 10,000 prices are collected monthly from about 3,500 producers for goods sold, which are valued at the boundary of the establishment, wherein the cost of taxes collected at that point and transportation provided by public carriers beyond that point are excluded. Prices are reported for finely specified transactions wherein both the good and terms of sale are identified. Such collections are instituted for important commodities. Expansions are made to the samples where price movement has a regional dimension or where there are important flows of goods to export markets.

Sampling for any directly surveyed elemental index is usually done by a formal probability sampling procedure, wherein important producers are "must take" respondents and a random selection is taken from the smaller producers. Such samples are redrawn on a regular cycle as dictated by changes in the market. A given elemental index is usually supported by 12 to 15 price quotes, although some are derived from as few as 8 quotes or as many as 30 quotes.

EXPLICATION DES MÉTHODES UTILISÉES ET SOURCES SUPPLÉMENTAIRES DES INDICES DES PRIX INDUSTRIELS

Indices des prix des produits industriels, 1986 = 100

Les indices des prix des produits industriels (IPPI) mesurent les variations des prix des principaux produits vendus par les fabricants canadiens. Les indices élémentaires sont calculés pour 1314 groupes principaux des produits (GPP) tels que définis dans les tableaux d'entrées-sorties de 1986. Les poids servant à agréger les indices des produits proviennent de la matrice des sorties ou de "production" des tableaux d'entrées-sorties. Cette matrice présente un ensemble intégré de valeurs pour les produits à l'intérieur de l'ensemble des industries manufacturières.

Les produits faisant directement l'objet d'un sondage sont basés sur des procédures d'échantillonnage formelles, et une cote de qualité est présentée pour les produits et les agrégats de produits. Ces indices sont calculés à partir des prix déclarés pour le 15 du mois, ou le jour ouvrable précédent le plus proche pour des transactions comparables.

Un certain nombre d'indices sont publiés environ quatre semaines après la fin du mois de référence dans le Quotidien (n° 11-001F au catalogue), selon un calendrier de publication préalablement établi. Simultanément, toutes les séries sont disponibles dans CANSIM ou sur demande. La publication n° 62-011 au catalogue, *Indices des prix de l'industrie,* paraît quatre semaines environ après le communiqué dans le *Quotidien.* Chaque série est identifiée par un numéro D de CANSIM et par un identificateur de produits (GPP) ou de branche d'activité (CTI). Les chiffres publiés pour les six derniers mois sont sujets à révision. Ainsi, lorsque l'indice de juillet est publié, l'indice pour le mois de janvier précédent devient final. Les exceptions à cette règle sont signalées.

Enquêtes des prix

Environ 10,000 prix sont recueillis chaque mois auprès d'environ 3,500 producteurs pour des biens vendus qui sont évalués à la limite de l'établissement, de sorte que les taxes prélevées à ce point et le coût du transport fourni par les transporteurs communs au-delà de ce point sont exclus. Les prix sont relevés pour des transactions à un niveau très détaillé, qui permet d'identifier le bien et les conditions de vente. De tels relevés sont institués pour les produits importants. Des élargissements sont apportés aux échantillons pour lesquels le mouvement des prix a une dimension régionale, ou pour lesquels il existe un important marché pour l'exportation.

L'échantillonnage pour tout indice élémentaire faisant directement l'objet d'un sondage se fait habituellement par une méthode d'échantillonnage probabiliste, selon laquelle les producteurs importants sont des répondants "obligatoires", tandis que l'on procède à une sélection aléatoire des producteurs moins importants. Ces échantillons sont reconstruits régulièrement, suivant l'évolution du marché. Un indice élémentaire donné repose habituellement sur 12 à 15 prix, bien que certains peuvent utiliser aussi peu que 8 prix, ou jusqu'à 30 prix.

About 700 of the 1314 PCGs in the manufacturing sector are accommodated by direct survey and these account for about 85% of the value of manufacturing output in 1986. The price movement for the remaining 600 PCGs is estimated indirectly from either directly priced PCGs or through borrowing price movement from other price series.

Environ 700 des 1314 GPP du secteur de la fabrication font l'objet d'une enquête directe, qui couvrent environ 85% de la valeur de la production manufacturière en 1986. Le mouvement des prix des 600 GPP restants est estimé indirectement à partir de GPP faisant directement l'objet d'un sondage, ou en empruntant le mouvement des prix d'autres séries de prix.

Weight Base

Commodity and industry weights are taken from the "Make" matrix of the 1986 Input/Output table which, in turn, is derived from 1986 values reported for the Census of Manufacturers and edited to conform to the 1980 Standard Industrial Classification. Within-commodity weights can change in December of each year to reflect major changes in production patterns.

Sources des poids

Les poids des produits et des branches d'activités proviennent de la matrice "production" du tableau d'entrées-sorties de 1986, laquelle à son tour est établie à partir des valeurs de 1986 déclarées pour le recensement des manufactures, et rectifiées afin d'être conforme à la Classification type des industries de 1980. Les poids internes des produits peuvent changer en décembre de chaque année afin d'appréhender les changements importants dans les schémas de la production.

Formula

Chained series of fixed weighted price indexes are calculated by a linking procedure whereby more recent varieties and changes to establishments are introduced systematically, as required, in December of each year. Weights from the commodity level through higher levels of aggregation are held constant.

The general formula used for the main aggregations describes the price movement of a specified group of commodities where w^i are the values of the output of each commodity:

Formule

Les séries en chaîne des indices de prix à pondération fixe sont calculées par une méthode de raccordement suivant laquelle les plus récentes variétés et les changements au niveau de l'univers des entreprises sont incorporés systématiquement, selon les besoins, en décembre de chaque année. Toutefois, les pondérations du niveau des produits jusqu'aux niveaux plus élevés d'agrégation sont maintenues constantes.

La formule générale servant au calcul des agrégations principales décrit les mouvements de prix d'un groupe donné de produits, dans laquelle w^i sont les valeurs de la production de chaque produit:

$$P_{t/o}^{(agg)} = \sum_i \frac{w^i}{\sum w^i} \cdot P_{t/o}^i$$

$P_{t/o}^{(agg)}$	denotes the composite price index movement between the base period o and time t for the defined aggregate;
w^i	is the transaction value of the element i in the base period;
$P_{t/o}^i$	is the price index for element i, meaning its price change from the base period to time t;
Σ_i	indicates summation over all elements i in the defined aggregate.

$P_{t/o}^{(agg)}$	dénote le mouvement de l'indice composite de prix entre la période de référence o et la période t pour l'agrégat défini;
w^i	est la valeur de transaction de l'élément i au cours de la période de référence;
$P_{t/o}^i$	est l'indice de prix de l'élément i, désignant sa variation de prix entre la période de référence et la période t;
Σ_i	signifie la sommation de tous les éléments i dans l'agrégat défini.

Historical Data

Historical series on the 1986 base for the Industry Price Indexes are available on CANSIM. The historical series are computed for the industry indexes classified under the 1980 Standard Industrial Classification (SIC) and for commodity indexes classified under the Principal Commodity Groups (PCG) classification. The historical series were obtained by linking together movements from the 1986-based Industrial Product Price Indexes (IPPI) series and the corresponding 1981-based Industrial Product Price Indexes (IPPI) series, using the year 1986 as the linking period. An explanatory note on the methods used to compute the historical series, as well as a set of concordance tables between both set of IPPI series are available to the public.

Reference Documents

62-558 Industry Price Indexes, 1986 = 100: Users' Guide, $40.00.

This publication describes briefly the economic content of the series and presents a short description of different aggregations produced. In the tables the weighting patterns for both commodities and commodity groupings are shown. Descriptions of the characteristics of the elemental indexes are provided. Comments on index use are also provided.

62-556 Industrial Product Price Indexes, 1981 = 100, Concepts and Methods, $25.00.

This publication describes the economic content of the series within the framework of the system of national accounts and describes how this affects price index methodology. Sampling and pricing methods are described, as are index calculation and aggregation procedures.

A glossary of terms is also provided.

For further details, please contact Prices Division, Statistics Canada, Ottawa, Ontario K1A 0T6, telephone 951-3350, facsimile (613)951-2848.

Données historiques

Les séries historiques sur la base 1986 pour les Indices des prix de l'industrie sont disponibles sur CANSIM. Les séries historiques sont calculées pour les indices des industries suivant la Classification type des industries (CTI) de 1980 et pour des indices des produits suivant la classification des Groupes principaux des produits (GPP). Les séries historiques furent obtenues en raccordant ensemble les mouvements des séries des indices des prix des produits industriels (IPPI) basées sur 1986 et des séries correspondantes des indices des prix des produits industriels (IPPI) basées sur 1981, l'année 1986 ayant servi de période de raccordement. Une note explicative sur les méthodes utilisées pour calculer les séries historiques de même qu'un ensemble de tableaux montrant les concordances entre les deux ensembles de séries IPPI sont disponibles au public.

Documents de référence

62-558 Indices des prix de l'industrie, 1986 = 100: Guide aux utilisateurs, 40,00 $.

Cette publication précise sommairement le contenu économique des séries dans un cadre général, de même qu'une brève description des différentes structures d'agrégation. Les tableaux contiennent les schémas de pondération à la fois pour les produits et les agrégats de produits. Y figurent également une description des caractéristiques des indices élémentaires. La publication contient des commentaires sur l'utilisation des indices.

62-556 Indices des prix des produits industriels, 1981 = 100, Concepts et méthodes, 25,00 $.

Cette publication précise le contenu économique des séries dans le cadre général du système des comptes nationaux, et son impact sur la méthodologie des indices de prix. Elle contient une description des méthodes d'échantillonnage et d'observation des prix, de même que des méthodes de calcul et d'agrégation des indices.

La publication contient également un glossaire.

Pour plus de renseignements, veuillez contacter la Division des prix, Statistique Canada, Ottawa, Ontario K1A 0T6, téléphone 951-3350, télécopieur (613)951-2848.

RAW MATERIALS PRICE INDEXES (1986 = 100)

The Raw Materials Price Indexes (RMPI) measure price changes for the purchase of raw materials by Canadian industry. The term "raw material" refers either to a commodity that is sold for the first time after being extracted from nature, or a substitutable recycled product (e.g. metal scrap). For example wheat is considered as a raw material, but wheat flour is not, iron ore is but not pig iron, coal but not electricity. Approximately eighty commodities are priced in the index, grouped into seven major components.

The index and the major group indexes, on a 1986 time base, are published monthly in the Daily Bulletin approximately four weeks after the end of the reference month. They are also available at that time on CANSIM in matrix 2009.

These indexes are a continuation of the previously published Raw Materials Price Indexes, 1981 = 100. The new, 1986 = 100 indexes can be linked with their equivalents in the 1981 = 100 series using the link factors which were released in the July 1990 issue and repeated in the December issue of this publication.

The index covers purchases of domestically produced and imported goods by Canadian industry, generally for further processing, and does not cover exports or flows of raw materials directly to final demand (principally foodstuffs). For example, potatoes bought by food processing manufacturers (for the manufacture of potato chips, or frozen french fries) are included in the index, but those bought by consumers directly are not.

As a purchasers' price index, prices should include all charges purchasers incur to bring a commodity to the establishment gate. Thus transportation charges, taxes net paid and custom duties are all included. So also are the effects of subsidies, if any are paid to the purchaser.

While prices are ideally collected from the purchaser, there are several cases where other well known prices are used instead: for example, marketing board prices for eggs and milk, and stockyard prices for some livestock. In a few cases, where data for unprocessed materials are not available, prices are taken for a similar commodity at the next stage of processing as occured for some non-ferrous metals. A detailed description of the characteristics of prices for any commodity is available from Prices Division on request.

INDICES DES PRIX DES MATIÈRES BRUTES (1986 = 100)

Les indices des prix des matières brutes (IPMB) mesurent les variations des prix d'achat des matières brutes par les industries canadiennes. L'expression "matières brutes" désigne soit un produit vendu pour la première fois après son extraction de la nature, soit un produit substitut recyclé (tel les déchets de métaux). Ainsi, le blé est considéré comme une matière brute, mais non la farine de blé, le minerai de fer mais non la fonte en gueuses, le charbon mais non l'électricité. Les prix d'environ quatre-vingt produits, regroupés en sept composantes principales, sont recueillis aux fins de l'indice.

L'indice d'ensemble et les indices des composantes principales, ayant comme période de référence 1986, sont publiés mensuellement dans le Quotidien de Statistique Canada, environ quatre semaines après la fin du mois de référence. Ces indices sont également disponibles dans la matrice 2009 de CANSIM.

Ces indices constituent la suite des Indices des prix des matières brutes, 1981 = 100, précédemment publiés. Les nouvelles séries basées 1986 = 100 peuvent être raccordées à leurs séries équivalentes basées 1981 = 100 en utilisant les facteurs de raccordement. Ces derniers sont publiés dans le numéro de juillet 1990, et répétés dans le numéro de décembre de la présente publication.

L'indice couvre les achats par les industries canadiennes de biens produits au Canada et de biens importés, en vue d'une transformation subséquente. L'indice ne couvre cependant pas les exportations, ni les matières brutes qui se rendent directement à la demande finale (principalement les denrées alimentaires). Par exemple, les pommes de terre achetées par les fabricants de produits alimentaires (pour la production de croustilles ou de pommes de terre congelées) sont pris en compte dans l'indice, alors que celles directement achetées par les consommateurs ne le sont pas.

Comme il s'agit d'un indice des prix d'achat, les prix devraient comprendre tous les frais supportés par l'acheteur pour faire parvenir le produit à la porte de l'établissement. Les frais de transport, les taxes nettes payées et les droits de douane, de même que les effets de toute subvention versée à l'acheteur, sont donc incorporés aux prix.

Bien qu'idéalement, les prix sont directement recueillis auprès des acheteurs, il existe en pratique un certain nombre de cas où des prix provenant d'autres sources bien connues sont utilisés: par exemple, les prix des offices de commercialisation des oeufs et du lait, les prix des parcs à bestiaux. Dans un certain nombre de cas où les données pour les matières non transformées ne sont pas disponibles, les prix sont prélevés pour un produit semblable à l'étape suivante de transformation. Tel est le cas notamment pour certains métaux non ferreux. La Division des prix fera parvenir sur demande une description détaillée des caractéristiques des prix d'un produit donné.

Prices collected each month are those in effect on the 15th of the month or the nearest prior business day. In a few cases, prices used are averages for the week which includes the 15th. Prices are reported directly to Statistics Canada or are taken from trade publications or from publications of other government departments.

Weights were derived from the 1986 Input/Output tables which provide values at purchasers prices of commodities purchased as intermediate inputs.

Indexes for aggregates of individual raw materials are calculated according to the following formula:

Les prix recueillis chaque mois sont ceux en vigueur le 15 du mois ou le jour ouvrable qui le précède immédiatement. Dans certains cas, les prix relevés représentent la moyenne des prix de la semaine englobant le 15 du mois. Les prix sont soit déclarés directement à Statistique Canada, soit tirés de revues spécialisées ou de publications d'autres organismes gouvernementaux.

Les pondérations furent dérivées des tableaux d'entrées-sorties de 1986, qui fournissent les valeurs aux prix d'achat des produits acquis à titre d'entrées intermédiaires.

Les indices pour les agrégats de matières brutes individuelles sont dégagés à l'aide de la formule suivante:

$$P_{t/o}^{(agg)} = \sum_i \frac{w^i}{\sum w^i} \cdot P_{t/o}^i$$

$P_{t/o}^{(agg)}$ denotes the composite price index movement between the base period o and time t for the defined aggregate;

w^i is the transaction value of the element i in 1986;

$P_{t/o}^i$ is the price index for element i, meaning its price change from the base period o to time t;

Σ_i indicates summation over all elements i in the defined aggregate.

$P_{t/o}^{(agg)}$ dénote le mouvement de l'indice composite de prix entre la période de référence o et la période courante t pour l'agrégat spécifié;

w^i est la valeur de transaction de l'élément i en 1986;

$P_{t/o}^i$ est l'indice de prix de l'élément i, c'est-à-dire son changement de prix de la période de référence o à la période courante t;

Σ_i indique la sommation sur tous les éléments i faisant partie de l'agrégat spécifié.

Within individual commodity indexes, the prices are weighted according to their market share in a recent year. In a few instances, where data are not available, the price quotations are equally weighted.

À l'intérieur des indices individuels des produits, les prix sont pondérés selon leurs parts du marché pour une année récente. Dans quelques cas où les données ne sont pas disponibles, les cotes de prix ont des pondérations équivalentes.

ELECTRIC POWER SELLING PRICE INDEXES (NON-RESIDENTIAL), 1986 = 100

Electric Power Selling Price Indexes are published on a regional and provincial basis for two broad industrial customer categories of sales; for bills less than 5000 KW and for sales of 5000 KW or more. Prices are reported by electric utilities for non-interruptible power contracts with manufacturing, service, and other Canadian industrial customers. Monthly prices are collected from all major generating and distributing utilities three times a year. The resulting indexes are released with other monthly Industry Price Indexes for April, August and December of each year. The indexes have 1986 as a time reference base and the weights used are 1986 company revenues from sales of electricity, as collected by Prices Division.

The formula used to calculate the Electric Power Selling Price Indexes is a fixed weighted index formulation, which is the same as that described for the Industrial Product Price Indexes, 1986 = 100, technical notes presented above. The indexes are available on CANSIM in matrix 2020. Indexes for the current year and the previous year are subject to revision.

These indexes are a continuation of the previously published Electricity Selling Price Indexes, 1981 = 100. The new, 1986 = 100 indexes can be linked with their equivalents in the 1981 = 100 series using the link factors which were released in the July 1990 issue and repeated in the December issue of this publication.

For further details, please contact Prices Division, Statistics Canada, Ottawa, Ontario K1A 0T6, telephone 951-3350, facsimile (613)951-2848.

INDICES DES PRIX DE VENTE DE L'ÉNERGIE ÉLECTRIQUE (NON RÉSIDENTIELLE), 1986 = 100

Les indices des prix de vente de l'énergie électrique sont publiés, par région et par province, pour deux grandes catégories de clients industriels, soit les factures de moins de 5000 kW et les factures de 5000 kW et plus. Les prix sont déclarés par les services publics d'électricité pour des contrats d'énergie non susceptible d'être interrompue, conclus avec des manufacturiers, des services et d'autres clients industriels canadiens. Les prix mensuels sont relevés trois fois par année auprès de tous les grands services de production et de distribution d'énergie. Les indices établis, accompagnant d'autres indices mensuels des prix de l'industrie, sont diffusés chaque année aux mois d'avril, d'août et de décembre. Les indices ont comme période de référence 1986, et les pondérations sont fondées sur les recettes au titre des ventes qu'ont touchées les entreprises en 1986, telles que recueillies par la Division des prix.

Le calcul des indices des prix de vente de l'énergie électrique se fait à l'aide d'une formule d'indice à pondération fixe, identique à celle décrite ci-dessus dans les notes techniques des Indices des prix des produits industriels, 1986 = 100. Les indices sont disponibles par l'entremise de CANSIM sur la matrice 2020. Les indices de la présente année et de l'année précédente sont sujets à révision.

Ces indices constituent la suite des indices des prix de vente de l'énergie électrique, 1981 = 100, précédemment publiés. Les nouvelles séries basées 1986 = 100 peuvent être raccordées à leurs séries équivalentes basées 1981 = 100 en utilisant les facteurs de raccordement. Ces derniers sont publiés dans le numéro de juillet 1990 et répétés dans le numéro de décembre de la présente publication.

Pour plus de renseignements, veuillez contacter la Division des prix, Statistique Canada, Ottawa, Ontario K1A 0T6, téléphone 951-3350, télécopieur (613)951-2848.

CONSULTING ENGINEERS' OUTPUT PRICE INDEXES (1992 = 100)

The consulting engineers' output price indexes (CEPI) measure the price changes of the services provided by consulting engineers. These services, which include advisory work, design work and supervision of its implementation, and project management, are provided for a variety of projects, and in different parts of the country. The data published in Tables 7 and 8 include indexes (column A in the tables) for 13 different fields of specialization, corresponding to those in the Survey of Consulting Engineers. For some fields of specialization indexes for different regions of the country are provided. An index for foreign projects is also given.

Indexes are published annually, approximately three months after the end of each calendar year. They are available at that time on CANSIM in matrices 2047, 2048 and 2049, or from Prices Division. Indexes for the latest year are subject to revision.

These indexes, dating from 1989, are the first to cover these activities. They are based on information from a sample of consulting engineering firms in Canada. The overall indexes are calculated by combining indexes for three separate measures : wage and salary rates, realized net multipliers (or fee-to-direct salary ratios),and output per unit of labour input (or labour productivity). Indexes are published for the changes in wage and salary rates, and in realized net multipliers, in columns B and C, respectively.

Respondents provide wage and salary movements, as they determine rates, usually annually. For each respondent this is the average of changes in the rate that would be paid to someone of certain abilities with a certain level of experience. It is not the change in average wages and salaries paid, because that would change with the mix of employees and experience. Respondents provide information on their realized net multipliers annually at the end of their financial year. Each respondent provides individual multipliers for each segment of activity for which the mark-up may differ. This may be as detailed as a specialization in one region, but the same multiplier may apply to more than one specialization or more than one region. In those cases the report is used as an observation in each of the areas covered. As the multipliers are realized figures, after the year is over, they reflect what was actually earned as a ratio of direct salaries, rather than what might have been intended. Productivity adjustments are calculated at a more aggregative level and applied evenly to all regions and specialities.

INDICES DE PRIX DES SORTIES DES SERVICES D'INGÉNIEURS-CONSEILS (1992 = 100)

Les indices de prix des sorties des services d'ingénieurs-conseils (IPIC) mesurent les variations de prix des services fournis par les ingénieurs-conseils. Ces services, qui comprennent des services de consultation, des travaux de conception et la surveillance de leur mise en oeuvre et des services de gestion de projets, sont offerts pour une variété d'activités et dans différentes régions du pays. Les données publiées aux tableaux 7 et 8 comprend les indices (colonne A dans les tableaux) de 13 différents domaines de spécialisation correspondant à ceux qui font l'objet de l'Enquête auprès des ingénieurs-conseils. Dans certains domaines de spécialisation, les indices sont établis pour différentes régions du pays. On trouve également un indice des projets réalisés à l'étranger.

Les indices sont publiés chaque année, environ trois mois après la fin de l'année civile. On peut alors les extraire de la base CANSIM dans les matrices 2047, 2048 et 2049 ou les obtenir auprès de la Division des prix. Les indices de la dernière année font l'objet d'une révision.

Ces indices, qui remontent à 1989, sont les premiers à couvrir de telles activités. Ils sont fondés sur des renseignements obtenus auprès d'un échantillon des entreprises d'ingénieurs-conseils du Canada. Les indices d'ensemble sont calculés en groupant les indices établis selon trois différentes mesures : les taux de salaires et de traitements, les multiplicateurs nets réels (ou les ratios des honoraires aux traitements directs) et la production par unité de main-d'oeuvre (ou productivité du travail). Les indices présentent, dans les colonnes B et C respectivement, les variations des salaires et des traitements, ainsi que des multiplicateurs nets réels.

Les répondants fournissent, chaque année habituellement, les données sur les mouvements des salaires et des traitements, car ces mouvements déterminent les taux. Pour chaque répondant, il s'agit de la variation moyenne du taux de rémunération qui serait versé à une personne possédant certaines compétences et une certaine expérience. Il ne s'agit pas de la variation des salaires et des traitements moyens versés, car ces derniers varient en fonction de la composition et de l'expérience des employés. Chaque année, à la fin de leur exercice, les répondants fournissent les données sur leurs multiplicateurs nets réels. Chaque répondant fournit ses multiplicateurs propres pour chaque segment d'activité pour lequel la majoration peut varier. Les renseignements fournis peuvent être aussi détaillés qu'une spécialisation dans une région donnée; cependant, on peut appliquer le même multiplicateur à plus d'une spécialisation ou d'une région. Dans ces cas, le rapport sert de rapport d'observation pour chacune des régions étudiées. Comme les multiplicateurs sont réels, ils représentent, à la fin de l'année, la rémunération réelle en ratio des traitements directs plutôt que la rémunération prévue. Les ajustements de la productivité sont calculés à un niveau plus agrégatif et appliqués équitablement à toutes les régions et spécialisations.

The finest market identified is for a field of specialization in a region. Six regions in Canada are identified: Atlantic provinces, Quebec, Ontario, Manitoba/Saskatchewan, Alberta, and British Columbia. Regional indexes are calculated for buildings, transportation, municipal services, and other environmental services. Canada indexes only are calculated for individual industrial specialities. However, the index for all industrial services differs from region to region because of the different mix of industrial projects.

The indexes at the finest level of detail are calculated as unweighted geometric averages of the returns from individual respondents. These indexes are aggregated to more general indexes using fixed weights. For combining regional indexes within a field of specialization the geographical distributions from the Survey of Capital Expenditures, 1989, 1990 and 1991 were used. For combining indexes for fields of specialization weights were taken from the Survey of Consulting Engineers for 1989 and 1991.

For further information: Please contact Prices Division, Statistics Canada, Ottawa, Ontario K1A 0T6. For data only please, contact the Information Unit in Prices Division at 613-951-3350, (fax: 613-951-2848), or any regional office, whose addresses and phone numbers are on the inside front cover of this book. For further information on concepts and methods, contact Bernard Lupien (613-951-9605).

L'indice le plus détaillé est celui du domaine de spécialisation dans une région donnée. Il existe six régions au Canada : les provinces de l'Atlantique, le Québec, l'Ontario, le Manitoba/ Saskatchewan, l'Alberta et la Colombie-Britannique. Les indices des régions sont calculés pour les bâtiments, les transports, les services municipaux et d'autres services environnementaux. Les indices pour le Canada seulement sont calculés pour chaque spécialisation industrielle. Cependant, l'indice de l'ensemble des services aux entreprises diffère d'une région à l'autre en raison de la variété des projets des entreprises.

Les indices les plus détaillés sont calculés en tant que moyennes géométriques non pondérées des chiffres fournis par les répondants. Ces indices sont groupés sous forme d'indices plus généraux à pondération fixe. Pour grouper les indices régionaux d'un même domaine de spécialisation, on se fonde sur la répartition géographique de l'Enquête sur les dépenses d'immobilisations de 1989, de 1990 et de 1991. Pour grouper les indices des domaines de spécialisation, on se sert des poids appliqués dans le cadre de l'Enquête auprès des ingénieurs-conseils de 1989 et de 1991.

Pour plus de renseignements, communiquer avec la Division des prix, Statistique Canada, Ottawa (Ontario) K1A 0T6. Pour obtenir des données seulement, communiquer avec l'Unité de l'information de la Division des prix au numéro 613-951-3350 (téléc. : 613-951-2848) ou avec les bureaux régionaux dont les coordonnées figurent au dos du plat supérieur de la présente publication. Pour plus de renseignements sur les concepts et les méthodes, communiquer avec Bernard Lupien (613-951-9605).

✔ Identify Emerging Trends

✔ Define New Markets

✔ Pinpoint Profit Opportunities

To safeguard your place in tomorrow's marketplace, you have to be able to anticipate trends today. To do that, you're going to need some insight into the purchasing trends in the Canadian marketplace.

With a complete profile of Canadian consumers, plus an indepth analysis of Canadian industries, the ***Market Research Handbook*** gives you the most thorough coverage of purchasing trends. This valued bestseller can lead you to new markets by giving you details on:

- how much money Canadians are earning and what they're spending on cars, rent, home entertainment and household appliances;
- the level of sales in retail chain and department stores;
- what goods are being traded between Canada, U.S., and other countries;
- census data such as: age/sex, schooling, households, unemployment, interprovincial and international migration

...and much, much more!

With over 600 pages, the ***Handbook*** includes more than 200 statistical tables that give you instant access to provincial and national market data. Featured are important economic indicators such as the **Gross Domestic Product**, **Labour Force Productivity**, **Private and Public Investment** and the **Consumer Price Index**.

Order your copy of the ***Market Research Handbook*** (Catalogue #63-2240XPB) today for only $110 in Canada plus $7.70 GST, US$132 in the United States, and US$154 in other countries.

CALL TOLL-FREE 1-800-267-6677 **OR FAX** (613)951-1584 and use your VISA or MasterCard. **OR MAIL** your order to: Statistics Canada, Marketing Division, Sales and Service, 120 Parkdale Avenue, Ottawa, Ontario, K1A 0T6, or contact the nearest Statistics Canada Regional Office listed in this publication.

✔ Dégagez les nouvelles tendances

✔ Définissez les nouveaux marchés

✔ Déterminez les possibilités de profit

Pour maintenir votre place sur le marché de demain, vous devez être en mesure de prévoir les tendances aujourd'hui. Pour ce faire, vous devrez comprendre les habitudes d'achat sur le marché canadien.

Renfermant un profil complet des consommateurs canadiens ainsi qu'une analyse approfondie des industries canadiennes, le ***Recueil statistique des études de marché*** brosse un tableau exhaustif des habitudes d'achat. Ce précieux best-seller peut vous faire découvrir de nouveaux marchés en vous fournissant les détails suivants :

- les revenus des Canadiens et leurs dépenses pour la voiture, le loyer, les appareils de divertissement et les appareils ménagers;
- le niveau des ventes dans les magasins de détail à succursales et les grands magasins;
- les biens échangés entre le Canada, les É.-U. et d'autres pays;
- les données du recensement telles que l'âge, le sexe, le niveau de scolarité, les ménages, le chômage, la migration interprovinciale et internationale

...et bien plus encore!

Le ***Recueil***, contenant plus de 600 pages et au delà de 200 tableaux statistiques, vous permettra d'accéder instantanément aux données provinciales et nationales sur le marché. Il traite d'indicateurs économiques importants tels que le **produit intérieur brut**, la **productivité de la population active**, les **investissements privés et publics** et l'**Indice des prix à la consommation.**

Procurez-vous votre exemplaire du ***Recueil statistique des études de marché*** (nº 63-2240XPB au catalogue) dès aujourd'hui pour seulement 110 $ au Canada plus 7,70 $ de TPS, 132 $ US aux États-Unis et 154 $ US dans les autres pays. Commandez votre exemplaire **PAR TÉLÉPHONE EN COMPOSANT SANS FRAIS** le 1-800-267-6677 **OU PAR TÉLÉCOPIEUR** au (613) 951-1584 et utilisez votre carte VISA ou MasterCard, **OU PAR LA POSTE** à l'adresse suivante : Statistique Canada, Division du marketing, Vente et service, 120, av. Parkdale, Ottawa (Ontario) K1A 0T6, ou communiquez avec le bureau régional de Statistique Canada le plus près dont la liste figure dans la présente publication.

MERCI DE VOTRE COMMANDE!

Statistique Canada Statistics Canada

Canada

Are you getting your information on the Canadian economy "first-hand"?

Chances are, you spend hours reading several newspapers and a handful of magazines trying to get the whole economic picture -- only to spend even more time weeding out fiction from fact! Wouldn't it be a great deal more convenient (and much more effective) to go straight to the source?

Join the thousands of successful Canadian decision-makers who turn to Statistic Canada's *Canadian Economic Observer* for their monthly briefing. Loaded with first-hand information, collectively published nowhere else, CEO is a quick, concise and panoramic overview of the Canadian economy. Its reliability and completeness are without equal.

A single source

Consultations with our many readers – financial analysts, planners, economists and business leaders – have contributed to CEO's present, widely-acclaimed, two-part format. The **Analysis Section** includes thought-provoking commentary on current economic conditions, issues, trends and developments. The **Statistical Summary** contains the complete range of hard numbers on critical economic indicators: markets, prices, trade, demographics, unemployment and more.

More practical, straightforward and user-friendly than ever before, the ***Canadian Economic Observer*** gives you more than 150 pages of in-depth information in one indispensable source.

Why purchase CEO?

As a subscriber, you'll be directly connected to Statistics Canada's economic analysts – names and phone numbers are listed with articles and features. You'll also receive a copy of CEO's annual **Historical Statistical Supplement** – at no additional cost.

So why wait for others to publish Statistics Canada's data second-hand when you can have it straight from the source? Order your subscription to the ***Canadian Economic Observer*** today.

The ***Canadian Economic Observer*** (catalogue no. 10-2300XPB) is $220 annually in Canada, US$260 in the United States and US$310 in other countries. Highlights of the ***Canadian Composite Leading Indicator*** (catalogue no. 11F0008XFE) are available by fax – the same day of release – for $70 annually in Canada and US$70 in the United States.

To order, write to: Statistics Canada, Marketing Division, Sales and Service, 120 Parkdale Avenue, Ottawa, Ontario, K1A 0T6 or contact the nearest Statistics Canada Reference Centre listed in this publication. If more convenient, fax your order to 1-613-951-1584 or call toll-free 1-800-267-6677 and use your VISA or MasterCard.

Recevez-vous directement vos informations sur l'économie canadienne?

Il est probable que vous passez des heures à lire plusieurs journaux et un paquet de revues pour essayer d'avoir une vue complète de la situation économique, et ensuite passer encore plus de temps à séparer le réel de ce qui ne l'est pas. Ne serait-il pas plus pratique (et beaucoup plus efficace) de remonter directement à la source?

Joignez-vous aux milliers de décideurs canadiens gagnants qui lisent *L'Observateur économique canadien* pour leur séance de rapport mensuelle. Rempli de renseignements disponibles nulle part ailleurs, L'OEC permet d'avoir une vue générale rapide et concise de l'économie canadienne. Il est inégalé par sa fiabilité et son exhaustivité.

Une seule source

Les consultations que nous avons eues avec nos nombreux lecteurs, des analystes financiers, des planificateurs, des économistes et des chefs d'entreprise, nous ont permis de présenter L'OEC dans son format actuel en deux parties, qui a été bien accueilli. La **section de l'analyse** contient des commentaires qui donnent à réfléchir sur la conjoncture économique, ses problèmes, ses tendances et ses développements. L'**aperçu statistique** contient l'ensemble complet des chiffres réels pour les indicateurs économiques essentiels : les marchés, les prix, le commerce, la démographie, le chômage, et bien d'autres encore.

Plus pratique, plus simple, plus facile à utiliser qu'auparavant, ***L'Observateur économique canadien*** vous offre plus de 150 pages de renseignements poussés sous une seule couverture.

Pourquoi acheter L'OEC?

En tant qu'abonné à L'OEC, vous êtes directement relié aux analystes économiques de Statistique Canada : des noms et des numéros de téléphone sont cités dans les articles et les rubriques. Vous recevrez également un exemplaire du **Supplément statistique historique** annuel à titre gracieux.

Pourquoi devez-vous donc attendre que d'autres publient les données de Statistique Canada qu'ils ont reprises alors que vous pouvez les obtenir directement à la source? Abonnez-vous à ***L'Observateur économique canadien*** dès aujourd'hui.

Le prix de l'abonnement annuel à ***L'Observateur économique canadien*** (nº 10-2300XPB au catalogue) est de 220 $ au Canada, de 260 $ US aux États-Unis et de 310 $ US dans les autres pays. Les faits saillants de l'***Indicateur composite avancé*** (nº 11F0008XFF au catalogue) sont offerts par télécopieur – le jour même de leur parution – pour 70 $ par année au Canada et 70 $ US aux États-Unis.

Pour commander, écrivez à : Statistique Canada, Division du marketing, Vente et service, 120, av. Parkdale, Ottawa (Ontario) K1A 0T6, ou adressez-vous au Centre de consultation de Statistique Canada le plus proche de chez vous et dont la liste figure dans cette publication. Si vous le préférez, vous pouvez envoyer votre commande par télécopieur au 1-613-951-1584, ou téléphoner sans frais au 1-800-267-6677 et utiliser votre carte VISA ou MasterCard.

CANADA A PORTRAIT

A CELEBRATION OF OUR GREAT NATION

UN PORTRAIT DU CANADA

POUR CÉLÉBRER LA GRANDEUR DE NOTRE PAYS

Canada challenges the imagination. Imagine a country where Newfoundlanders live closer to Africans than they do to fellow Canadians in British Columbia. Or a country with an island that has a glacier bigger than Ireland. Imagine a country with two million lakes, and the world's longest coastline – but that shares a border with only one nation.

Statistics Canada has created the 54th edition of ***Canada: A Portrait*** as a celebration of our great nation. Drawn from Statistics Canada's rich palette of national data, it paints a picture of where we are socially, economically, culturally and politically.

Over 60 unique and beautiful photographs combined with lively text, provide a close-up look at the Canada of today.

Experience this land's remarkable natural regions and diverse human landscape through six chapters entitled: ***This Land, The People, The Society, Arts and Leisure, The Economy,*** and ***Canada in the World.***

Eminent Canadians such as astronaut Roberta Bondar, former hockey star Jean Béliveau, and writer W.O. Mitchell have contributed their personal visions of Canada.

Canada: A Portrait is a beautiful illustration of the Canada of today.

Presented in a 30 cm X 23 cm (12 1/4" X 9") format, prestige hardcover, with over 200 pages, ***Canada: A Portrait*** (Catalogue No. 11-403E) is available in Canada for $38.00 plus GST, US $41.95 in the United States, and US $48.95 in other countries.

To order write **Statistics Canada, Publications Sales, Ottawa, Ontario, K1A 0T6** or contact the nearest Statistics Canada Regional Reference Centre listed in this publication. For faster ordering call toll-free **1-800-267-6677** and use your VISA and MasterCard or fax your order to **(613) 951-1584.**

Le Canada est un pays qui défie l'imagination. Imaginez un pays où les Terre-Neuviens vivent plus près des Africains que de leurs compatriotes de la Colombie-Britannique. Un pays où se trouve une île sur laquelle s'étend un glacier plus grand que l'Irlande. Imaginez un pays qui compte 2 millions de lacs et le plus long littoral du monde, et pourtant un seul voisin.

Statistique Canada a créé la 54e édition d'***Un portrait du Canada*** pour célébrer la grandeur de notre pays. C'est à partir du riche éventail de données nationales de Statistique Canada que l'on a brossé ce tableau de notre situation sociale, économique, culturelle et politique.

Plus de 60 magnifiques photos, mariées à un texte vivant, offrent une vision claire et détaillée de ce qu'est le Canada d'aujourd'hui.

Découvrez les splendides régions naturelles de ce pays, de même que son paysage humain des plus diversifiés, à travers six chapitres intitulés : ***Le territoire, La population, La société, Les arts et les loisirs, L'économie*** et ***Le Canada dans le monde.***

D'éminents Canadiens, tels Roberta Bondar, astronaute, Jean Béliveau, ancienne vedette de hockey, et W.O. Mitchell, écrivain, y font part de leur vision personnelle du Canada.

Un portrait du Canada... un magnifique ouvrage de collection qui décrit admirablement bien le Canada d'aujourd'hui.

Présenté dans un format de 30 cm sur 23 cm (12,25 po X 9 po), dans une couverture rigide de luxe et en plus de 200 pages, ***Un portrait du Canada*** (N° 11-403F au catalogue) coûte 38 $ plus TPS au Canada, 41,95 $ US aux États-Unis et 48,95 $ US dans les autres pays.

Pour commander, écrivez à **Statistique Canada, Vente des publications, Ottawa (Ontario), K1A 0T6** ou communiquez avec le Centre régional de consultation de Statistique Canada le plus proche. La liste figure dans la publication. Pour commander plus rapidement, composez sans frais le **1-800-267-6677** et utilisez votre carte VISA ou MasterCard ou télécopiez votre commande au **(613) 951-1584**.

Data in Many Forms . . .

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered. Data are available on CD, diskette, computer print-out, microfiche and microfilm, and magnetic tape. Maps and other geographic reference materials are available for some types of data. Direct online access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable database and retrieval system.

How to Obtain More Information

Inquiries about this publication and related statistics or services should be directed to:

Client Services Unit,
Prices Division,

Statistics Canada, Ottawa, K1A 0T6 (Telephone: 1-613-951-3350) or to the Statistics Canada reference centre in:

Halifax	(1-902-426-5331)	Regina	(1-306-780-5405)
Montréal	(1-514-283-5725)	Edmonton	(1-403-495-3027)

Standards of Service to the Public

To maintain quality service to the public, Statistics Canada follows established standards covering statistical products and services, delivery of statistical information, cost-recovered services and services to respondents. To obtain a copy of these service standards, please contact your nearest Statistics Canada Regional Reference Centre.

Des données sous plusieurs formes . . .

Statistique Canada diffuse les données sous formes diverses. Outre les publications, des totalisations habituelles et spéciales sont offertes. Les données sont disponibles sur disque compact, disquette, imprimé d'ordinateur, microfiche et microfilm, et bande magnétique. Des cartes et d'autres documents de référence géographiques sont disponibles pour certaines sortes de données. L'accès direct à des données agrégées est possible par le truchement de CANSIM, la base de données ordinolingue et le système d'extraction de Statistique Canada.

Comment obtenir d'autres renseignements

Toute demande de renseignements au sujet de cette publication ou de statistiques et services connexes doit être adressée à la:

Sous-section du service à la clientèle,
Division des prix,

Statistique Canada, Ottawa, K1A 0T6 (téléphone: 1-613-951-3350) ou au centre de consultation de Statistique Canada à:

Note of Appreciation

Canada owes the success of its statistical syste to a long-standing cooperation involving Statistics Canada, the citizens of Canada, its businesses, governments and other institutions. Accurate and timely statistical information could not be produced without their continued cooperation and goodwill.

Note de reconnaissance

Le succès du système statistique du Canada repose sur un partenariat bien établi entre Statistique Canada et la population, les entreprises, les administrations canadiennes et les autres organismes. Sans cette collaboration et cette bonne volonté, il serai impossible de produire des statistiques précises et actuelles.

Symbols

The following standard symbols are used in Statistics Canada publications:

.. figures not available.

... figures not appropriate or not applicable.

– nil or zero.

-- amount too small to be expressed.

p preliminary figures.

r revised figures.

x confidential to meet secrecy requirements of the Statistics Act.

NOTE ON CANSIM

CANSIM® (Canadian Socio-Economic Information Management System) is Statistics Canada's computerized data bank and its supporting software. Most of the data appearing in this publication, as well as many other data series are available from CANSIM via terminal, on computer printouts, or in machine readable form. Historical and more timely data, not included in this publication, are available from CANSIM.

For further information write to Marketing Division, Statistics Canada, Ottawa, K1A 0T6 or call (613) 951-8200.

® Registered Trade Mark of Statistics Canada.

Revision

Unless otherwise stated, price indexes in this publication are subject to revision for the most recent six months shown. Any revisions beyond these limits are so indicated.

The paper used in this publication meets the minimum requirements of American National Standard for Information Sciences – Permanence of Paper for Printed Library Materials, ANSI Z39.48 – 1984.

Signes conventionnels

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada:

HIGHLIGHTS

Industrial Product Price Index

Overall industrial prices remained stable for a third month in August following a period of weakening international trade and industrial production. August's stable prices also saw a further decline in the 12-month change in industrial prices which dropped to 7.1% from July's 8%. With the exception of March, the Industrial Product Price Index has continuously declined since January. This period of decline in the 12-month change in industrial prices has been the longest since 1991-1992.

Between January and March, both manufacturing shipments and exports declined noticeably, falling 2% and 5% respectively. Since then, both have tended to stagnate although exports did drop noticeablely again in July. Industrial prices have also shown little change since March, rising by less than one percent. This increase was mainly the result of rising prices for paper and allied products. These producers were the only ones to see an increase in capacity utilization in the second quarter.

On a monthly basis, the overall level of industrial prices remained unchanged. Price increases for paper and allied products and for primary metal products were offset by declines for gasoline and for wood products. Pulp and newsprint prices rose marginally, 0.6% and 0.4% respectively, as markets remained quite tight. Amongst primary metals, aluminum product prices ended five months of declining, bouncing up 1.9%. Analysts, however, strongly disagree about its prospects due to uncertainty of future inventory levels. Nickel product prices also increased, rising 2.2% as inventories declined. These increases were partly offset by a 1.6% decline in copper and copper alloy product prices which occurred despite a relatively low level of inventories. The gasoline and fuel oil price index continued downward in August, dropping 1.4%. Declines in spruce and pine prices east of the Rockies accounted for most of the 0.4% decrease in lumber and timber prices.

According to the most recent available figures, the 12-month increase in Canadian industrial prices remains the second highest amongst the members of the G7 group of industrialized nations. Italy is leading, at 9.2% for June. Canada is next, at 7.1% for August. The United Kingdom is third, at 4.4% for August. Canada's position can be explained by a combination of exchange rate movements, the relatively large role in the Canadian economy of non-ferrous metals and paper and allied products and relatively low annual rate of wage increases.

FAITS SAILLANTS

Indice des prix des produits industriels

Au niveau d'ensemble, les prix industriels sont demeurés stables pour un troisième mois en août, après une période de ralentissement du commerce international et de la production industrielle. La stabilité des prix en août s'est accompagnée d'un nouveau repli de la variation sur 12 mois des prix industriels, qui est passée de 8% en juillet à 7,1% en août. Avec l'exeption de mars, l'indice des prix des produits industriels diminue continuellement depuis janvier. Cette période de déclin de la variation sur 12 mois des prix industriels est le plus long depuis 1991-1992.

Entre janvier et mars, on a observé une diminution marquée des livraisons des industries manufacturières et des exportations, qui sont tombées de 2% et 5% respectivement. Depuis lors, ces deux indicateurs ont eu tendance à stagner, mais les exportations ont subi un net recul encore une fois en juillet. Les prix industriels ont également peu varié depuis mars, avançant de moins de 1%. Cette augmentation était essentiellement la conséquence de la montée des prix du papier et des produits connexes, dont les producteurs ont été les seuls à voir augmenter leur utilisation de capacité au deuxième trimestre.

D'un mois à l'autre, le niveau global des prix industriels est demeuré inchangé. Les augmentations du prix du papier et des produits connexes et des métaux de première transformation ont été neutralisées par des baisses du prix de l'essence et des produits du bois. Les prix de la pâte et du papier journal ont monté légèrement, soit de 0,6% et 0,4% respectivement, les marchés étant demeurés très serrés. Parmi les métaux de première transformation, le prix de l'aluminium a rebondi de 1,9%, après cinq mois de recul. Cependant, les analystes ne s'entendent pas du tout sur les perspectives de ce produit selon l'incercitude des futurs niveau de stock. Le prix des produits du nickel a aussi progressé, soit de 2,2%, à la faveur de la diminution des stocks. Ces augmentations ont été partiellement compensées par un recul de 1,6% du prix du cuivre et des alliages de cuivre, qui s'est produit malgré un niveau relativement faible des stocks. L'indice de prix de l'essence et du mazout continue à la baisse, ayant diminué de 1,4%. Les diminutions du prix de l'épinette et du pin à l'est des Rocheuses ont expliqué la majorité de la baisse de 0,4% du prix du bois de construction et du gros bois d'oeuvre.

Selon les chiffres les plus récents, l'augmentation sur 12 mois des prix industriels au Canada demeure la deuxième en importance parmi les membres du groupe G7 des pays industrialisés. L'Italie vient en tête, à 9,2% en juin. Le Canada vient au deuxième rang, à 7,1% en août. Le Royaume-Uni se classe troisième, avec une variation de 4,4% pour le mois d'août. La position du Canada peut s'expliquer par une combinaison de fluctuations du taux de change, par le rôle relativement important que jouent les métaux non ferreux et le papier et les produits connexes dans l'économie canadienne et par le taux annuel relativement faible d'augmentations salariales.

In August, consumer goods prices dropped for both the manufacturer and the consumer. As reported in the consumer price index release, the 12-month change in goods prices paid by consumers dropped from 2.2% in July to 1.6% in August. For manufacturers, the 12-month change in the prices received for Canadian consumer goods also dropped by a similar proportion, from a little under 3% to somewhat over 2%. About half of what the consumer pays goes to manufacturers, the remainder is divided between retailers, wholesalers, indirect taxes, and transporters.

Domestically, both residential construction and automotive sales have remained weak, although there are some indications of improvements in August. Internationally, industrial production has been declining in Japan. In Europe, it has been recovering only slowly towards its December 1994 level. In the United States, it has been tending to stagnate though there are some recent signs of improvement there. It is therefore not surprising that Canadian industrial prices have been sluggish.

En août, le prix des biens de consommation a chuté, tant pour le fabricant que pour le consommateur. Comme l'indiquait le communiqué sur l'indice des prix à la consommation, la variation des prix à la consommation pour les biens est tombée de 2,2% en juillet à 1,6% en août. Pour les fabricants, la variation sur 12 mois des prix touchés pour les biens de consommation canadiens a aussi baissé d'une proportion correspondante, passant d'un peu moins de 3% à un peu plus de 2%. La moitié environ de ce que le consommateur paie va aux fabricants, et le reste est partagé entre les détaillants, les grossistes, les taxes indirectes et les transporteurs.

Au Canada, la construction résidentielle et les ventes d'automobiles sont restées faibles, malgré certaines indications d'améliorations en août. À l'étranger, la production industrielle est en baisse au Japon. En Europe, elle n'a connu qu'une lente reprise vers son niveau de décembre 1994. Aux États-Unis, elle a eu tendance à stagner, malgré certains signes récents d'amélioration. La faiblesse des prix industriels au Canada n'a donc rien de surprenant.

NOTE TO USERS

The Industrial Product Price Index (IPPI) reflects prices producers receive as goods leave their plants. It does not reflect what consumers pay. Unlike the Consumer Price Index (CPI), the IPPI excludes indirect taxes and the costs (transportation, wholesale, and retail costs) that occur from the time a good leaves a plant until the final user takes possession.

Canadian producers export many goods. They often quote their prices in foreign currencies, particularly for motor vehicles, pulp, paper, and wood products. A rise or fall in the value of the Canadian dollar against the U.S. dollar therefore affects the IPPI. A 1.0% change in the value of the Canadian dollar against the U.S. dollar has been estimated to change the IPPI by about 0.2%.

NOTES AUX UTILISATEURS

L'indice des prix des produits industriels (IPPI) retrace les prix que les producteurs reçoivent au moment où les produits franchissent les portes de l'usine. Il ne retrace pas ce que le consommateur paie. Contrairement à l'indice des prix à la consommation (IPC), l'IPPI exclut les impôts indirects et tous les coûts (coûts du transport et du commerce de gros et de détail) qui surviennent lorsque le produit part de l'usine jusqu'au moment où l'utilisateur final en prend possession.

Les producteurs canadiens exportent beaucoup de biens. Ils vont souvent indiquer leurs prix en devises étrangères, en particulier dans le cas des véhicules automobiles, des pâtes de bois, du papier et des produits du bois. Les fluctuations de la valeur du dollar canadien par rapport à la devise américaine se répercuteront par conséquent sur l'IPPI. Une variation de 1,0% de la valeur du dollar canadien par rapport au dollar américain devrait, selon les estimations, se traduire par une variation d'environ 0,2% de l'IPPI.

HIGHLIGHTS

Raw Materials Price Index

Manufacturers paid slightly less for raw materials in August as lower prices for wood were greatly offset by higher crude oil prices.

Raw material prices edged down 0.3% on the strength of a 6% drop in wood prices. However, crude oil prices rose 4%, reversing a three-month period of decline, during which they fell almost 15%.

Renewed tensions in the Middle East contributed to the potential uncertainty of crude oil supplies, adding upward pressure to prices. World tensions that affect potential crude oil supplies have taken on additional importance as inventories of crude have been streamlined to levels of 16 years ago.

Excluding mineral fuels, raw material prices would have dropped 1.7% in August.

On an annual basis, raw material prices were still 4.3% higher in August than they were a year earlier. However, the rate of increase has been dropping continually since January when the change was +18.4%.

Wood prices weakened in July (-1%) and August (-6%) after increasing 12% over the first 6 months of 1995. Lower demand for lumber and high pulpwood inventories contributed to the drop. However, the fall season often brings about a rally in prices. In addition the housing market is improving, particularly in the United States.

Non-ferrous metal prices slipped slightly downwards in August. Lower copper prices (-2%) were almost offset by higher prices for aluminum materials (+2%) and nickel concentrates (+3%). Compared to 12 months ago, non-ferrous metal prices were up more than 17%.

Major contributors to the higher metal prices were: copper concentrates (+25%), aluminum materials (+21%), radioactive concentrates (+28%) and nickel concentrates (+48%). Copper prices are expected to remain strong until copper inventories reach levels that meet current demand. Nickel prices appear firm as global demand for stainless steel remains strong and inventories are declining.

FAITS SAILLANTS

Indice des prix des matières brutes

Les fabricants ont payé un peu moins cher leurs matières brutes en août, la diminution du prix du bois ayant été largement contrebalancée par l'augmentation du prix du pétrole brut.

Le prix des matières brutes s'est replié de 0,3% à la faveur d'une baisse de 6% du prix du bois. Cependant, le prix du pétrole brut a monté de 4%, renversant une période de recul de près de 15% en trois mois.

La reprise des tensions au Moyen-Orient a contribué à l'incertitude des approvisionnements en pétrole brut et accentué l'effet d'entraînement sur les prix. Les tensions mondiales qui se répercutent sur les approvisionnements éventuels en pétrole brut ont pris une nouvelle importance, conséquence de la rationalisation qui a ramené les stocks de brut à leurs niveaux d'il y a 16 ans.

Sans les combustibles minéraux, le prix des matières brutes aurait chuté de 1,7% en août.

En chiffres annuels, le prix des matières brutes restait à 4,3% plus haut en août qu'un an plus tôt. Cependant, le taux d'augmentation n'a pas cessé de ralentir depuis janvier, où la variation a été de +18,4%.

Le prix du bois s'est affaibli en juillet (-1%) et en août (-6%) après une avance de 12% pendant les 6 premiers mois de 1995. La diminution de la demande de bois de construction et le niveau élevé des stocks de bois à pâte ont contribué à cette baisse. Cependant, l'automne amène souvent une reprise des prix. Par ailleurs, le marché domiciliaire s'améliore, surtout aux États-Unis.

Le prix des métaux non ferreux a fléchi légèrement en août. La baisse du prix du cuivre (-2%) a été presque annulée par la hausse du prix des matériaux de l'aluminium (+2%) et des concentrés de nickel (+3%). Le prix des métaux non ferreux se situait à 17% plus haut qu'il y a 12 mois.

Les produits qui ont le plus contribué à l'augmentation du prix des métaux sont : les concentrés de cuivre (+ 25%), les matières d'aluminium (+21%), les concentrés radioactifs (+28%) et les concentrés de nickel (+48%). On prévoit que le prix du cuivre conservera sa vigueur jusqu'à ce que les stocks de cuivre atteignent des niveaux répondant à la demande actuelle. Le prix du nickel semble ferme, grâce à la vigueur soutenue de la demande mondiale d'acier inoxydable et à la diminution des stocks.

Ferrous material prices, led by higher prices for iron and steel scrap, edged up in August. Iron and steel scrap prices increased almost 5%, after being almost flat from March to July. Supplies of some grades of scrap appear tight and that could lead to greater competition among recycling plants.

Vegetable product prices fell 2% in August on the heels of lower prices for grains (-3%), oilseeds (-2%) and rubber (-11%). Wheat prices, which rose 24% from January to July, declined 6% in August. Higher wheat prices have reduced somewhat the overseas demand for wheat. However, the tight world wheat supply and strong global demand would tend to add further upward pressure to prices. Canola prices were down 14% compared to their 1995 peak in March. Forecasts for a good harvest may have dampened canola prices.

Animal and animal product prices rose 1.3% in August. Higher prices for fish, industrial unprocessed milk and hogs were partly offset by lower cattle prices. Hog prices continue to lead the way, rising 28% since April. Even with the current ample supply of animals, prices continue to strengthen apparently because of rising demand. Cattle prices have been on a downward trend, declining almost 15% since January. Farmers' resistance of carrying stock over the winter may further weaken cattle prices.

Il y a eu une légère avance du prix des matières ferreuses en août, sous l'effet de l'augmentation du prix des déchets de fer et d'acier. Le prix des déchets de fer et d'acier a monté de près de 5%, après n'avoir presque pas bougé de mars à juillet. Les approvisionnements de certaines catégories de déchets semblent serrés, ce qui pourrait amener une plus vive concurrence entre les usines de recyclage.

Le prix des matières végétales a chuté de 2% en août, dans le sillage d'une baisse du prix des céréales (-3%), des oléagineux (-2%) et du caoutchouc (-11%). Le prix du blé, qui a monté de 24% de janvier à juillet, a chuté de 6% en août. L'augmentation du prix du blé a quelque peu réduit la demande de blé à l'étranger. Cependant, le resserrement de l'offre mondiale de blé et la vigueur de la demande mondiale auront tendance à accentuer l'effet d'entraînement des prix. Le prix du canola a baissé de 14% par rapport au sommet de 1995 réalisé en mars. Les prévisions annonçant une bonne récolte ont pu tempérer les prix du canola.

Le prix des animaux et des substances animales a avancé de 1,3% en août. L'augmentation du prix du poisson, du lait de transformation non traité et des porcs a été partiellement épongée par une diminution du prix des bovins. Le prix du porc ouvre toujours la voie, avec une augmentation de 28% depuis avril. Malgré l'importance de l'offre actuelle d'animaux, les prix continuent de se raffermir, apparemment grâce à l'augmentation de la demande. Le prix des bovins est en baisse, ayant reculé de près de 15% depuis janvier. Les agriculteurs n'aiment pas avoir à reporter des stocks pour l'hiver, ce qui risque d'affaiblir encore davantage le prix des bovins.

NOTE TO USERS

The Raw Materials Price Index (RMPI) reflects the prices paid by Canadian manufacturers for key raw materials. Many of these prices are set in a world market. Also, unlike the Industrial Product Price Index, the RMPI includes goods that are not produced in Canada.

NOTE AUX UTILISATEURS

L'indice des prix des matières brutes est représentatif du prix que les fabricants canadiens paient pour les principales matières brutes. Un grand nombre de ces prix sont fixés sur les marchés mondiaux. De plus, contrairement à l'indice des prix des produits industriels, l'IPMB inclut des biens qui ne sont pas produits au Canada.

TABLE 1. Summary of Recent Price Movements

TABLEAU 1. Sommaire des récents mouvements des prix

		Indexes / Indices		Percentage change from / Variation en pourcentage		
		August 95 (1) / Août 95 (1)	July 95 / Juillet 95	July 95 / Juillet 95	May 95 / Mai 95	August 94 / Août 94
2	**All commodities – Total – Tous les produits**	**129.2**	**129.2**	**0.0**	**0.8**	**7.1**
	Meat, fish & dairy products – Viande, poisson & prod. laitier	121.0	121.4	-0.3	1.3	1.7
	Fruits, veg., feed, misc. food prod. – Fruits, lég., alim. anim. & divers	125.3	125.4	-0.1	0.8	2.0
	Beverages – Boissons	127.1	127.1	0.0	-0.1	0.9
	Tobacco & tobacco products – Tabac & produits du tabac	172.3	172.3	0.0	0.0	4.9
	Rubber, leather, plastic fab. prod. – Prod. en caout., en cuir, mat. pla.	128.3	128.2	0.1	0.4	8.4
	Textile products – Produits textiles	118.2	118.0	0.2	1.1	5.0
	Knitted products & clothing – Produits en tricot & vêtements	118.4	118.1	0.3	0.3	1.9
	Lumber, sawmill, other wood prod. – Sciages, prod. de scierie & divers	154.4	154.8	-0.3	2.0	-3.4
	Furniture & fixtures – Meubles & articles d'ameublement	125.1	125.1	0.0	0.2	2.6
	Paper & paper products – Papier & produits connexes	163.7	163.2	0.3	5.3	39.3
	Printing & publishing – Impression & édition	176.0	175.8	0.1	2.1	24.1
	Primary metal products – Produits métalliques primaires	136.1	135.7	0.3	1.6	13.1
	Metal fabricated products – Semi-produits métalliques	128.0	128.0	0.0	0.3	7.2
	Machinery & equipment – Machines & matériel	126.7	126.7	0.0	0.4	3.3
	Autos, trucks, other transp. eqp. – Voitures, camions & autres	119.1	119.1	0.0	0.0	1.8
	Elec. & communications prod. – Appareils élect. & de télécom.	117.9	117.8	0.1	0.2	2.5
	Non metallic mineral products – Produits minéraux non métallique	124.3	124.3	0.0	1.4	6.6
	Petroleum & coal products – Produits du pétrole & du charbon	95.7	96.6	-0.9	-4.4	-1.6
	Chemicals, chemical products – Produits chimiques	135.1	135.3	-0.1	-1.8	7.9
	Misc. manufactured products – Produits manufacturiers divers	123.2	123.2	0.0	0.2	3.8
4	**Intermediate goods – Produits semi-finis**	**133.4**	**133.4**	**0.0**	**1.1**	**10.5**
	First-stage intermediate goods – Produits semi-finis de première étape	149.2	148.9	0.2	2.5	22.2
	Second-stage intermediate goods – Produits semi-finis de deuxième étape	128.9	129.0	-0.1	0.7	7.1
	All finished goods – Tous les produits finis	**122.7**	**122.8**	**-0.1**	**0.0**	**2.0**
	Finished foods & feeds – Aliments de consommation et alim. pour anim.	123.7	123.8	-0.1	0.5	1.1
	Capital equipment – Matériel capitalisé	124.5	124.5	0.0	0.2	2.5
	All other finished goods – Tous autres produits finis	121.3	121.4	-0.1	-0.2	2.3
	All manufacturing industries(2) – Industries manufacturières(2):					
3	**Gross weighted (80 SIC)(2) – Pondération brute (80 CTI)(2)**	**129.2**	**129.2**	**0.0**	**0.8**	**7.1**
6	**Raw materials – Total – Ensemble des matières brutes**	**130.3**	**130.7**	**-0.3**	**-2.3**	**4.3**
	Raw materials – Total – Excl. mineral fuels – Ensemble des matières brutes, sauf combustibles minéraux	**142.1**	**144.6**	**-1.7**	**0.5**	**7.6**
	Vegetable products – Substances végétales	128.2	131.0	-2.1	2.2	8.7
	Animals & animal products – Animaux & substances animales	112.8	111.4	1.3	4.4	3.3
	Wood – Bois	219.3	233.1	-5.9	-6.4	7.1
	Ferrous material – Matières ferreuses	123.5	120.6	2.4	2.8	0.6
	Non-ferrous metals – Métaux non ferreux	145.4	145.7	-0.2	4.7	17.3
	Non metallic minerals – Minéraux non métalliques	106.0	105.8	0.2	0.3	5.1
	Mineral fuels – Combustibles minéraux	104.9	100.9	4.0	-9.8	-4.0

Note: Indexes for the most recent six months shown are subject to revision.
Nota: Les indices figurant pour les six mois les plus récents sont sujets à révision.

(1) These indexes are preliminary.
(1) Ces indices sont provisoires.

(2) The aggregation of indexes by commodities or by industries should produce the same grand total. When these totals occasionally differ due to rounding, the All Commodities Index shall be regarded as authoritative, and the All Manufacturing Industries is adjusted to match.
(2) L'agrégation des indices par produits ou par industries devrait résulter en un même grand total. Lorsque ces totaux diffèrent occasionnellement en raison de l'arrondissement, l'Indice total – Tous les produits devra être considéré comme celui qui fait autorité, et l'Indice total – Toutes les industries manufacturières sera posé égal.

TABLE 2. Industrial Product Price Indexes, by Commodity and Commodity Aggregations

TABLEAU 2. Indices des prix des produits industriels, par produits et agrégations de produits

Note: Indexes for the most recent six months shown are subject to revision.
Nota: Les indices figurant pour les six mois les plus récents sont sujets à révision.

(1) The bottom line in each series title block may contain, in order from left to right, the following: the CANSIM Databank code number (d nnnnnn), a numeric descriptor, a coverage measure, and a variability measure. The numeric descriptor is of the order ss-mm-nn-pppp-rr where
ss indicates the S-level commodity code (from 9 to 28)
mm indicates the M-level commodity code (from 14 to 43, 45 to 69)
nn indicates either a split of the M-level commodity, or 91, which indicates a special aggregation or 99, which indicates special details.
pppp indicates the PCG code (except for some special aggregations which include several PCGs).
rr indicates a split of a PCG.
The coverage measure for an elemental index is a symbol: E indicates a fully designed sample, S indicates an abbreviated sample, P indicates an indirect estimate. For a composite index the percentage of the coverage which is estimated from direct surveys (E + S) is given, occasionally these coverage measures are rounded to the nearest 5% to preserve confidentiality. The variability measure is given for some indexes to indicate the relative stability of the index estimate due to sampling. The most stable indexes are marked A, the least stable, D. For further information order Industrial Product Price Indexes 1981 = 100, Concepts and Methods (Catalogue 62-556).

(1) En lisant de gauche à droite, la ligne en-dessous de chaque titre des séries présente, en tout ou en partie, l'information suivante: le numéro de code "Databank" de CANSIM (D nnnnnn), un numéro d'identification numérique, une mesure du degré de couverture et une mesure de la variabilité. Le numéro d'identification numérique prend la forme générale ss-mm-nn-pppp-rr où:
ss indique le code du niveau S des produits (de 9 à 28)
mm indique le code du niveau M des produits (de 14 à 43, 45 à 69)
nn indique soit une composante du niveau M des produits, ou prend la valeur de 91 pour les agrégats spéciaux, ou de 99 pour les indices particuliers.
pppp indique le code GPP (sauf pour certains agrégats spéciaux qui comprennent plusieurs GPP)
rr indique une composante d'un GPP.
La mesure du degré de couverture pour les indices élémentaires est présentée à l'aide d'un symbole: E indique un échantillonnage exhaustif, S indique un échantillonage sommaire et P indique une estimation indirecte. Pour les indices composites, la donnée en pourcentage représente une estimation du degré de couverture par échantillonnage direct (E + S). Ces mesures du degré de couverture sont parfois arrondies au 5% le plus près afin d'assurer la confidentialité. La mesure de la variabilité, donnée pour un certain nombre d'indices, indique la stabilité relative de l'indice en tant qu'estimation basée sur un échantillon. Les indices les plus stables sont cotés A, les moins stables, D. Pour plus de renseignements, commandez le document de référence: Indices des prix des produits industriels 1981 = 100, concepts et méthodes (n° 62-556 au catalogue).

TABLE 3. Industrial Product Price Indexes, by Industry and Industry Groups(1)

TABLEAU 3. Indices des prix des produits industriels, par industries et groupes d'industries(1)

1986 = 100

Note: Indexes for the most recent six months shown are subject to revision.

Nota: Les indices figurant pour les six mois les plus récents sont sujets à révision.

(1) The aggregation of indexes by commodities or by industries should produce the same grand total. When these totals occasionally differ due to rounding, the All Commodities Index shall be regarded as authoritative, and the All Manufacturing Industries is adjusted to match.

(1) L'agrégation des indices par produits ou par industries devraient résulter en un même grand total. Lorsque ces totaux diffèrent occasionnellement en raison de l'arrondissement, l'indice total - tous les produits devra être considéré comme celui qui fait autorité, et l'indice total - toutes les industries manufacturières sera posé égal.

(2) The numeric code to the right of the CANSIM databank number on the last line of each series is the 1980 Standard Industrial Classification (SIC) code. An explanation of the percentage figures (coverage measure) shown to the right of the SIC can be found at the end of Table 2. These coverage measures are rounded to the nearest 5% to preserve confidentiality.

(2) Le code numérique à la droite du numéro Databank de CANSIM apparaissant à la ligne du bas de chaque série est le code de la Classification type des industries (CTI) de 1980. Une explication des données en pourcentage (mesure de degré de couverture) apparaissant à la droite du code CTI est disponible à la fin du tableau 2. Ces mesures de degré de couverture sont arrondies au 5% le plus près afin de préserver la confidentialité.

Nota: Les indices de 1989-93 ont été révisé et les indices de 1994 sont provisoires.

EXPLANATION OF METHODS USED AND ADDITIONAL SOURCES FOR INDUSTRIAL PRICE INDEXES

Industrial Product Price Indexes, 1986 = 100

The Industrial Product Price Indexes (IPPI) measure price changes for major commodities sold by Canadian manufacturers. Elemental indexes are calculated for 1314 Principal Commodity Group (PCG) outputs as defined in the 1986 Input/Output (I/O) table. Weights used to aggregate commodity indexes are taken from the output or "Make" matrix of the I/O system which provides an integrated set of commodity values for all manufacturing industries.

Directly surveyed commodities are supported by formal sampling procedures and a quality rating is presented for commodities and aggregations of commodities. Such indexes are derived from prices reported for the 15th of the month or the nearest prior business day for comparable transactions.

Selected indexes are published about four weeks after the reference month in the *Daily Bulletin* (Catalogue 11-001) following a pre-announced schedule of release dates. Simultaneously, all series are available from CANSIM or on request. Catalogue 62-011, *Industry Price Indexes,* is released about four weeks after the Daily Bulletin release. Each series is identified with a CANSIM D number and with a commodity (PCG) or industry (SIC) identifier. Each release of numbers is subject to revision for six months, i.e., when a July index is released, the index for the preceding January becomes final. Exceptions to this rule are announced.

Price Surveys

About 10,000 prices are collected monthly from about 3,500 producers for goods sold, which are valued at the boundary of the establishment, wherein the cost of taxes collected at that point and transportation provided by public carriers beyond that point are excluded. Prices are reported for finely specified transactions wherein both the good and terms of sale are identified. Such collections are instituted for important commodities. Expansions are made to the samples where price movement has a regional dimension or where there are important flows of goods to export markets.

Sampling for any directly surveyed elemental index is usually done by a formal probability sampling procedure, wherein important producers are "must take" respondents and a random selection is taken from the smaller producers. Such samples are redrawn on a regular cycle as dictated by changes in the market. A given elemental index is usually supported by 12 to 15 price quotes, although some are derived from as few as 8 quotes or as many as 30 quotes.

EXPLICATION DES MÉTHODES UTILISÉES ET SOURCES SUPPLÉMENTAIRES DES INDICES DES PRIX INDUSTRIELS

Indices des prix des produits industriels, 1986 = 100

Les indices des prix des produits industriels (IPPI) mesurent les variations des prix des principaux produits vendus par les fabricants canadiens. Les indices élémentaires sont calculés pour 1314 groupes principaux des produits (GPP) tels que définis dans les tableaux d'entrées-sorties de 1986. Les poids servant à agréger les indices des produits proviennent de la matrice des sorties ou de "production" des tableaux d'entrées-sorties. Cette matrice présente un ensemble intégré de valeurs pour les produits à l'intérieur de l'ensemble des industries manufacturières.

Les produits faisant directement l'objet d'un sondage sont basés sur des procédures d'échantillonnage formelles, et une cote de qualité est présentée pour les produits et les agrégats de produits. Ces indices sont calculés à partir des prix déclarés pour le 15 du mois, ou le jour ouvrable précédent le plus proche pour des transactions comparables.

Un certain nombre d'indices sont publiés environ quatre semaines après la fin du mois de référence dans le Quotidien (n° 11-001F au catalogue), selon un calendrier de publication préalablement établi. Simultanément, toutes les séries sont disponibles dans CANSIM ou sur demande. La publication n° 62-011 au catalogue, *Indices des prix de l'industrie,* paraît quatre semaines environ après le communiqué dans le *Quotidien.* Chaque série est identifiée par un numéro D de CANSIM et par un identificateur de produits (GPP) ou de branche d'activité (CTI). Les chiffres publiés pour les six derniers mois sont sujets à révision. Ainsi, lorsque l'indice de juillet est publié, l'indice pour le mois de janvier précédent devient final. Les exceptions à cette règle sont signalées.

Enquêtes des prix

Environ 10,000 prix sont recueillis chaque mois auprès d'environ 3,500 producteurs pour des biens vendus qui sont évalués à la limite de l'établissement, de sorte que les taxes prélevées à ce point et le coût du transport fourni par les transporteurs communs au-delà de ce point sont exclus. Les prix sont relevés pour des transactions à un niveau très détaillé, qui permet d'identifier le bien et les conditions de vente. De tels relevés sont institués pour les produits importants. Des élargissements sont apportés aux échantillons pour lesquels le mouvement des prix a une dimension régionale, ou pour lesquels il existe un important marché pour l'exportation.

L'échantillonnage pour tout indice élémentaire faisant directement l'objet d'un sondage se fait habituellement par une méthode d'échantillonnage probabiliste, selon laquelle les producteurs importants sont des répondants "obligatoires", tandis que l'on procède à une sélection aléatoire des producteurs moins importants. Ces échantillons sont reconstruits régulièrement, suivant l'évolution du marché. Un indice élémentaire donné repose habituellement sur 12 à 15 prix, bien que certains peuvent utiliser aussi peu que 8 prix, ou jusqu'à 30 prix.

About 700 of the 1314 PCGs in the manufacturing sector are accommodated by direct survey and these account for about 85% of the value of manufacturing output in 1986. The price movement for the remaining 600 PCGs is estimated indirectly from either directly priced PCGs or through borrowing price movement from other price series.

Environ 700 des 1314 GPP du secteur de la fabrication font l'objet d'une enquête directe, qui couvrent environ 85% de la valeur de la production manufacturière en 1986. Le mouvement des prix des 600 GPP restants est estimé indirectement à partir de GPP faisant directement l'objet d'un sondage, ou en empruntant le mouvement des prix d'autres séries de prix.

Weight Base

Commodity and industry weights are taken from the "Make" matrix of the 1986 Input/Output table which, in turn, is derived from 1986 values reported for the Census of Manufacturers and edited to conform to the 1980 Standard Industrial Classification. Within-commodity weights can change in December of each year to reflect major changes in production patterns.

Sources des poids

Les poids des produits et des branches d'activités proviennent de la matrice "production" du tableau d'entrées-sorties de 1986, laquelle à son tour est établie à partir des valeurs de 1986 déclarées pour le recensement des manufactures, et rectifiées afin d'être conforme à la Classification type des industries de 1980. Les poids internes des produits peuvent changer en décembre de chaque année afin d'appréhender les changements importants dans les schémas de la production.

Formula

Chained series of fixed weighted price indexes are calculated by a linking procedure whereby more recent varieties and changes to establishments are introduced systematically, as required, in December of each year. Weights from the commodity level through higher levels of aggregation are held constant.

The general formula used for the main aggregations describes the price movement of a specified group of commodities where w^i are the values of the output of each commodity:

Formule

Les séries en chaîne des indices de prix à pondération fixe sont calculées par une méthode de raccordement suivant laquelle les plus récentes variétés et les changements au niveau de l'univers des entreprises sont incorporés systématiquement, selon les besoins, en décembre de chaque année. Toutefois, les pondérations du niveau des produits jusqu'aux niveaux plus élevés d'agrégation sont maintenues constantes.

La formule générale servant au calcul des agrégations principales décrit les mouvements de prix d'un groupe donné de produits, dans laquelle w^i sont les valeurs de la production de chaque produit:

$$P_{t/o}^{(agg)} = \sum_i \frac{w^i}{\sum w^i} \cdot P_{t/o}^i$$

$P_{t/o}^{(agg)}$	denotes the composite price index movement between the base period o and time t for the defined aggregate;
w^i	is the transaction value of the element i in the base period;
$P_{t/o}^i$	is the price index for element i, meaning its price change from the base period to time t;
Σ_i	indicates summation over all elements i in the defined aggregate.

$P_{t/o}^{(agg)}$	dénote le mouvement de l'indice composite de prix entre la période de référence o et la période t pour l'agrégat défini;
w^i	est la valeur de transaction de l'élément i au cours de la période de référence;
$P_{t/o}^i$	est l'indice de prix de l'élément i, désignant sa variation de prix entre la période de référence et la période t;
Σ_i	signifie la sommation de tous les éléments i dans l'agrégat défini.

Historical Data

Historical series on the 1986 base for the Industry Price Indexes are available on CANSIM. The historical series are computed for the industry indexes classified under the 1980 Standard Industrial Classification (SIC) and for commodity indexes classified under the Principal Commodity Groups (PCG) classification. The historical series were obtained by linking together movements from the 1986-based Industrial Product Price Indexes (IPPI) series and the corresponding 1981-based Industrial Product Price Indexes (IPPI) series, using the year 1986 as the linking period. An explanatory note on the methods used to compute the historical series, as well as a set of concordance tables between both set of IPPI series are available to the public.

Reference Documents

62-558 Industry Price Indexes, 1986 = 100: Users' Guide, $40.00.

This publication describes briefly the economic content of the series and presents a short description of different aggregations produced. In the tables the weighting patterns for both commodities and commodity groupings are shown. Descriptions of the characteristics of the elemental indexes are provided. Comments on index use are also provided.

62-556 Industrial Product Price Indexes, 1981 = 100, Concepts and Methods, $25.00.

This publication describes the economic content of the series within the framework of the system of national accounts and describes how this affects price index methodology. Sampling and pricing methods are described, as are index calculation and aggregation procedures.

A glossary of terms is also provided.

For further details, please contact Prices Division, Statistics Canada, Ottawa, Ontario K1A 0T6, telephone 951-3350, facsimile (613)951-2848.

Données historiques

Les séries historiques sur la base 1986 pour les Indices des prix de l'industrie sont disponibles sur CANSIM. Les séries historiques sont calculées pour les indices des industries suivant la Classification type des industries (CTI) de 1980 et pour des indices des produits suivant la classification des Groupes principaux des produits (GPP). Les séries historiques furent obtenues en raccordant ensemble les mouvements des séries des indices des prix des produits industriels (IPPI) basées sur 1986 et des séries correspondantes des indices des prix des produits industriels (IPPI) basées sur 1981, l'année 1986 ayant servi de période de raccordement. Une note explicative sur les méthodes utilisées pour calculer les séries historiques de même qu'un ensemble de tableaux montrant les concordances entre les deux ensembles de séries IPPI sont disponibles au public.

Documents de référence

62-558 Indices des prix de l'industrie, 1986 = 100: Guide aux utilisateurs, 40,00 $.

Cette publication précise sommairement le contenu économique des séries dans un cadre général, de même qu'une brève description des différentes structures d'agrégation. Les tableaux contiennent les schémas de pondération à la fois pour les produits et les agrégats de produits. Y figurent également une description des caractéristiques des indices élémentaires. La publication contient des commentaires sur l'utilisation des indices.

62-556 Indices des prix des produits industriels, 1981 = 100, Concepts et méthodes, 25,00 $.

Cette publication précise le contenu économique des séries dans le cadre général du système des comptes nationaux, et son impact sur la méthodologie des indices de prix. Elle contient une description des méthodes d'échantillonnage et d'observation des prix, de même que des méthodes de calcul et d'agrégation des indices.

La publication contient également un glossaire.

Pour plus de renseignements, veuillez contacter la Division des prix, Statistique Canada, Ottawa, Ontario K1A 0T6, téléphone 951-3350, télécopieur (613)951-2848.

RAW MATERIALS PRICE INDEXES (1986 = 100)

The Raw Materials Price Indexes (RMPI) measure price changes for the purchase of raw materials by Canadian industry. The term "raw material" refers either to a commodity that is sold for the first time after being extracted from nature, or a substitutable recycled product (e.g. metal scrap). For example wheat is considered as a raw material, but wheat flour is not, iron ore is but not pig iron, coal but not electricity. Approximately eighty commodities are priced in the index, grouped into seven major components.

The index and the major group indexes, on a 1986 time base, are published monthly in the Daily Bulletin approximately four weeks after the end of the reference month. They are also available at that time on CANSIM in matrix 2009.

These indexes are a continuation of the previously published Raw Materials Price Indexes, 1981 = 100. The new, 1986 = 100 indexes can be linked with their equivalents in the 1981 = 100 series using the link factors which were released in the July 1990 issue and repeated in the December issue of this publication.

The index covers purchases of domestically produced and imported goods by Canadian industry, generally for further processing, and does not cover exports or flows of raw materials directly to final demand (principally foodstuffs). For example, potatoes bought by food processing manufacturers (for the manufacture of potato chips, or frozen french fries) are included in the index, but those bought by consumers directly are not.

As a purchasers' price index, prices should include all charges purchasers incur to bring a commodity to the establishment gate. Thus transportation charges, taxes net paid and custom duties are all included. So also are the effects of subsidies, if any are paid to the purchaser.

While prices are ideally collected from the purchaser, there are several cases where other well known prices are used instead: for example, marketing board prices for eggs and milk, and stockyard prices for some livestock. In a few cases, where data for unprocessed materials are not available, prices are taken for a similar commodity at the next stage of processing as occured for some non-ferrous metals. A detailed description of the characteristics of prices for any commodity is available from Prices Division on request.

INDICES DES PRIX DES MATIÈRES BRUTES (1986 = 100)

Les indices des prix des matières brutes (IPMB) mesurent les variations des prix d'achat des matières brutes par les industries canadiennes. L'expression "matières brutes" désigne soit un produit vendu pour la première fois après son extraction de la nature, soit un produit substitut recyclé (tel les déchets de métaux). Ainsi, le blé est considéré comme une matière brute, mais non la farine de blé, le minerai de fer mais non la fonte en gueuses, le charbon mais non l'électricité. Les prix d'environ quatre-vingt produits, regroupés en sept composantes principales, sont recueillis aux fins de l'indice.

L'indice d'ensemble et les indices des composantes principales, ayant comme période de référence 1986, sont publiés mensuellement dans le Quotidien de Statistique Canada, environ quatre semaines après la fin du mois de référence. Ces indices sont également disponibles dans la matrice 2009 de CANSIM.

Ces indices constituent la suite des Indices des prix des matières brutes, 1981 = 100, précédemment publiés. Les nouvelles séries basées 1986 = 100 peuvent être raccordées à leurs séries équivalentes basées 1981 = 100 en utilisant les facteurs de raccordement. Ces derniers sont publiés dans le numéro de juillet 1990, et répétés dans le numéro de décembre de la présente publication.

L'indice couvre les achats par les industries canadiennes de biens produits au Canada et de biens importés, en vue d'une transformation subséquente. L'indice ne couvre cependant pas les exportations, ni les matières brutes qui se rendent directement à la demande finale (principalement les denrées alimentaires). Par exemple, les pommes de terre achetées par les fabricants de produits alimentaires (pour la production de croustilles ou de pommes de terre congelées) sont pris en compte dans l'indice, alors que celles directement achetées par les consommateurs ne le sont pas.

Comme il s'agit d'un indice des prix d'achat, les prix devraient comprendre tous les frais supportés par l'acheteur pour faire parvenir le produit à la porte de l'établissement. Les frais de transport, les taxes nettes payées et les droits de douane, de même que les effets de toute subvention versée à l'acheteur, sont donc incorporés aux prix.

Bien qu'idéalement, les prix sont directement recueillis auprès des acheteurs, il existe en pratique un certain nombre de cas où des prix provenant d'autres sources bien connues sont utilisés: par exemple, les prix des offices de commercialisation des oeufs et du lait, les prix des parcs à bestiaux. Dans un certain nombre de cas où les données pour les matières non transformées ne sont pas disponibles, les prix sont prélevés pour un produit semblable à l'étape suivante de transformation. Tel est le cas notamment pour certains métaux non ferreux. La Division des prix fera parvenir sur demande une description détaillée des caractéristiques des prix d'un produit donné.

Prices collected each month are those in effect on the 15th of the month or the nearest prior business day. In a few cases, prices used are averages for the week which includes the 15th. Prices are reported directly to Statistics Canada or are taken from trade publications or from publications of other government departments.

Weights were derived from the 1986 Input/Output tables which provide values at purchasers prices of commodities purchased as intermediate inputs.

Indexes for aggregates of individual raw materials are calculated according to the following formula:

Les prix recueillis chaque mois sont ceux en vigueur le 15 du mois ou le jour ouvrable qui le précède immédiatement. Dans certains cas, les prix relevés représentent la moyenne des prix de la semaine englobant le 15 du mois. Les prix sont soit déclarés directement à Statistique Canada, soit tirés de revues spécialisées ou de publications d'autres organismes gouvernementaux.

Les pondérations furent dérivées des tableaux d'entrées-sorties de 1986, qui fournissent les valeurs aux prix d'achat des produits acquis à titre d'entrées intermédiaires.

Les indices pour les agrégats de matières brutes individuelles sont dégagés à l'aide de la formule suivante:

$$P_{t/o}^{(agg)} = \sum_i \frac{w^i}{\sum w^i} \cdot P_{t/o}^i$$

$P_{t/o}^{(agg)}$ denotes the composite price index movement between the base period o and time t for the defined aggregate;

w^i is the transaction value of the element i in 1986;

$P_{t/o}^i$ is the price index for element i, meaning its price change from the base period o to time t;

Σ_i indicates summation over all elements i in the defined aggregate.

$P_{t/o}^{(agg)}$ dénote le mouvement de l'indice composite de prix entre la période de référence o et la période courante t pour l'agrégat spécifié;

w^i est la valeur de transaction de l'élément i en 1986;

$P_{t/o}^i$ est l'indice de prix de l'élément i, c'est-à-dire son changement de prix de la période de référence o à la période courante t;

Σ_i indique la sommation sur tous les éléments i faisant partie de l'agrégat spécifié.

Within individual commodity indexes, the prices are weighted according to their market share in a recent year. In a few instances, where data are not available, the price quotations are equally weighted.

À l'intérieur des indices individuels des produits, les prix sont pondérés selon leurs parts du marché pour une année récente. Dans quelques cas où les données ne sont pas disponibles, les cotes de prix ont des pondérations équivalentes.

ELECTRIC POWER SELLING PRICE INDEXES (NON-RESIDENTIAL), 1986 = 100

Electric Power Selling Price Indexes are published on a regional and provincial basis for two broad industrial customer categories of sales; for bills less than 5000 KW and for sales of 5000 KW or more. Prices are reported by electric utilities for non-interruptible power contracts with manufacturing, service, and other Canadian industrial customers. Monthly prices are collected from all major generating and distributing utilities three times a year. The resulting indexes are released with other monthly Industry Price Indexes for April, August and December of each year. The indexes have 1986 as a time reference base and the weights used are 1986 company revenues from sales of electricity, as collected by Prices Division.

The formula used to calculate the Electric Power Selling Price Indexes is a fixed weighted index formulation, which is the same as that described for the Industrial Product Price Indexes, 1986 = 100, technical notes presented above. The indexes are available on CANSIM in matrix 2020. Indexes for the current year and the previous year are subject to revision.

These indexes are a continuation of the previously published Electricity Selling Price Indexes, 1981 = 100. The new, 1986 = 100 indexes can be linked with their equivalents in the 1981 = 100 series using the link factors which were released in the July 1990 issue and repeated in the December issue of this publication.

For further details, please contact Prices Division, Statistics Canada, Ottawa, Ontario K1A 0T6, telephone 951-3350, facsimile (613)951-2848.

INDICES DES PRIX DE VENTE DE L'ÉNERGIE ÉLECTRIQUE (NON RÉSIDENTIELLE), 1986 = 100

Les indices des prix de vente de l'énergie électrique sont publiés, par région et par province, pour deux grandes catégories de clients industriels, soit les factures de moins de 5000 kW et les factures de 5000 kW et plus. Les prix sont déclarés par les services publics d'électricité pour des contrats d'énergie non susceptible d'être interrompue, conclus avec des manufacturiers, des services et d'autres clients industriels canadiens. Les prix mensuels sont relevés trois fois par année auprès de tous les grands services de production et de distribution d'énergie. Les indices établis, accompagnant d'autres indices mensuels des prix de l'industrie, sont diffusés chaque année aux mois d'avril, d'août et de décembre. Les indices ont comme période de référence 1986, et les pondérations sont fondées sur les recettes au titre des ventes qu'ont touchées les entreprises en 1986, telles que recueillies par la Division des prix.

Le calcul des indices des prix de vente de l'énergie électrique se fait à l'aide d'une formule d'indice à pondération fixe, identique à celle décrite ci-dessus dans les notes techniques des Indices des prix des produits industriels, 1986 = 100. Les indices sont disponibles par l'entremise de CANSIM sur la matrice 2020. Les indices de la présente année et de l'année précédente sont sujets à révision.

Ces indices constituent la suite des indices des prix de vente de l'énergie électrique, 1981 = 100, précédemment publiés. Les nouvelles séries basées 1986 = 100 peuvent être raccordées à leurs séries équivalentes basées 1981 = 100 en utilisant les facteurs de raccordement. Ces derniers sont publiés dans le numéro de juillet 1990 et répétés dans le numéro de décembre de la présente publication.

Pour plus de renseignements, veuillez contacter la Division des prix, Statistique Canada, Ottawa, Ontario K1A 0T6, téléphone 951-3350, télécopieur (613)951-2848.

CONSULTING ENGINEERS' OUTPUT PRICE INDEXES (1992 = 100)

The consulting engineers' output price indexes (CEPI) measure the price changes of the services provided by consulting engineers. These services, which include advisory work, design work and supervision of its implementation, and project management, are provided for a variety of projects, and in different parts of the country. The data published in Tables 7 and 8 include indexes (column A in the tables) for 13 different fields of specialization, corresponding to those in the Survey of Consulting Engineers. For some fields of specialization indexes for different regions of the country are provided. An index for foreign projects is also given.

Indexes are published annually, approximately three months after the end of each calendar year. They are available at that time on CANSIM in matrices 2047, 2048 and 2049, or from Prices Division. Indexes for the latest year are subject to revision.

These indexes, dating from 1989, are the first to cover these activities. They are based on information from a sample of consulting engineering firms in Canada. The overall indexes are calculated by combining indexes for three separate measures : wage and salary rates, realized net multipliers (or fee-to-direct salary ratios),and output per unit of labour input (or labour productivity). Indexes are published for the changes in wage and salary rates, and in realized net multipliers, in columns B and C, respectively.

Respondents provide wage and salary movements, as they determine rates, usually annually. For each respondent this is the average of changes in the rate that would be paid to someone of certain abilities with a certain level of experience. It is not the change in average wages and salaries paid, because that would change with the mix of employees and experience. Respondents provide information on their realized net multipliers annually at the end of their financial year. Each respondent provides individual multipliers for each segment of activity for which the mark-up may differ. This may be as detailed as a specialization in one region, but the same multiplier may apply to more than one specialization or more than one region. In those cases the report is used as an observation in each of the areas covered. As the multipliers are realized figures, after the year is over, they reflect what was actually earned as a ratio of direct salaries, rather than what might have been intended. Productivity adjustments are calculated at a more aggregative level and applied evenly to all regions and specialities.

INDICES DE PRIX DES SORTIES DES SERVICES D'INGÉNIEURS-CONSEILS (1992 = 100)

Les indices de prix des sorties des services d'ingénieurs-conseils (IPIC) mesurent les variations de prix des services fournis par les ingénieurs-conseils. Ces services, qui comprennent des services de consultation, des travaux de conception et la surveillance de leur mise en oeuvre et des services de gestion de projets, sont offerts pour une variété d'activités et dans différentes régions du pays. Les données publiées aux tableaux 7 et 8 comprend les indices (colonne A dans les tableaux) de 13 différents domaines de spécialisation correspondant à ceux qui font l'objet de l'Enquête auprès des ingénieurs-conseils. Dans certains domaines de spécialisation, les indices sont établis pour différentes régions du pays. On trouve également un indice des projets réalisés à l'étranger.

Les indices sont publiés chaque année, environ trois mois après la fin de l'année civile. On peut alors les extraire de la base CANSIM dans les matrices 2047, 2048 et 2049 ou les obtenir auprès de la Division des prix. Les indices de la dernière année font l'objet d'une révision.

Ces indices, qui remontent à 1989, sont les premiers à couvrir de telles activités. Ils sont fondés sur des renseignements obtenus auprès d'un échantillon des entreprises d'ingénieurs-conseils du Canada. Les indices d'ensemble sont calculés en groupant les indices établis selon trois différentes mesures : les taux de salaires et de traitements, les multiplicateurs nets réels (ou les ratios des honoraires aux traitements directs) et la production par unité de main-d'oeuvre (ou productivité du travail). Les indices présentent, dans les colonnes B et C respectivement, les variations des salaires et des traitements, ainsi que des multiplicateurs nets réels.

Les répondants fournissent, chaque année habituellement, les données sur les mouvements des salaires et des traitements, car ces mouvements déterminent les taux. Pour chaque répondant, il s'agit de la variation moyenne du taux de rémunération qui serait versé à une personne possédant certaines compétences et une certaine expérience. Il ne s'agit pas de la variation des salaires et des traitements moyens versés, car ces derniers varient en fonction de la composition et de l'expérience des employés. Chaque année, à la fin de leur exercice, les répondants fournissent les données sur leurs multiplicateurs nets réels. Chaque répondant fournit ses multiplicateurs propres pour chaque segment d'activité pour lequel la majoration peut varier. Les renseignements fournis peuvent être aussi détaillés qu'une spécialisation dans une région donnée; cependant, on peut appliquer le même multiplicateur à plus d'une spécialisation ou d'une région. Dans ces cas, le rapport sert de rapport d'observation pour chacune des régions étudiées. Comme les multiplicateurs sont réels, ils représentent, à la fin de l'année, la rémunération réelle en ratio des traitements directs plutôt que la rémunération prévue. Les ajustements de la productivité sont calculés à un niveau plus agrégatif et appliqués équitablement à toutes les régions et spécialisations.

The finest market identified is for a field of specialization in a region. Six regions in Canada are identified: Atlantic provinces, Quebec, Ontario, Manitoba/Saskatchewan, Alberta, and British Columbia. Regional indexes are calculated for buildings, transportation, municipal services, and other environmental services. Canada indexes only are calculated for individual industrial specialities. However, the index for all industrial services differs from region to region because of the different mix of industrial projects.

The indexes at the finest level of detail are calculated as unweighted geometric averages of the returns from individual respondents. These indexes are aggregated to more general indexes using fixed weights. For combining regional indexes within a field of specialization the geographical distributions from the Survey of Capital Expenditures, 1989, 1990 and 1991 were used. For combining indexes for fields of specialization weights were taken from the Survey of Consulting Engineers for 1989 and 1991.

For further information: Please contact Prices Division, Statistics Canada, Ottawa, Ontario K1A 0T6. For data only please, contact the Information Unit in Prices Division at 613-951-3350, (fax: 613-951-2848), or any regional office, whose addresses and phone numbers are on the inside front cover of this book. For further information on concepts and methods, contact Bernard Lupien (613-951-9605).

L'indice le plus détaillé est celui du domaine de spécialisation dans une région donnée. Il existe six régions au Canada : les provinces de l'Atlantique, le Québec, l'Ontario, le Manitoba/ Saskatchewan, l'Alberta et la Colombie-Britannique. Les indices des régions sont calculés pour les bâtiments, les transports, les services municipaux et d'autres services environnementaux. Les indices pour le Canada seulement sont calculés pour chaque spécialisation industrielle. Cependant, l'indice de l'ensemble des services aux entreprises diffère d'une région à l'autre en raison de la variété des projets des entreprises.

Les indices les plus détaillés sont calculés en tant que moyennes géométriques non pondérées des chiffres fournis par les répondants. Ces indices sont groupés sous forme d'indices plus généraux à pondération fixe. Pour grouper les indices régionaux d'un même domaine de spécialisation, on se fonde sur la répartition géographique de l'Enquête sur les dépenses d'immobilisations de 1989, de 1990 et de 1991. Pour grouper les indices des domaines de spécialisation, on se sert des poids appliqués dans le cadre de l'Enquête auprès des ingénieurs-conseils de 1989 et de 1991.

✔ Identify Emerging Trends

✔ Define New Markets

✔ Pinpoint Profit Opportunities

To safeguard your place in tomorrow's marketplace, you have to be able to anticipate trends today. To do that, you're going to need some insight into the purchasing trends in the Canadian marketplace.

With a complete profile of Canadian consumers, plus an indepth analysis of Canadian industries, the ***Market Research Handbook*** gives you the most thorough coverage of purchasing trends. This valued bestseller can lead you to new markets by giving you details on:

- how much money Canadians are earning and what they're spending on cars, rent, home entertainment and household appliances;
- the level of sales in retail chain and department stores;
- what goods are being traded between Canada, U.S., and other countries;
- census data such as: age/sex, schooling, households, unemployment, interprovincial and international migration

...and much, much more!

With over 600 pages, the ***Handbook*** includes more than 200 statistical tables that give you instant access to provincial and national market data. Featured are important economic indicators such as the **Gross Domestic Product**, **Labour Force Productivity**, **Private and Public Investment** and the **Consumer Price Index**.

Order your copy of the ***Market Research Handbook*** (Catalogue #63-2240XPB) today for only $110 in Canada plus $7.70 GST, US$132 in the United States, and US$154 in other countries.

CALL TOLL-FREE 1-800-267-6677 **OR FAX** (613)951-1584 and use your VISA or MasterCard. **OR MAIL** your order to: Statistics Canada, Marketing Division, Sales and Service, 120 Parkdale Avenue, Ottawa, Ontario, K1A 0T6, or contact the nearest Statistics Canada Regional Office listed in this publication.

✔ Dégagez les nouvelles tendances

✔ Définissez les nouveaux marchés

✔ Déterminez les possibilités de profit

Pour maintenir votre place sur le marché de demain, vous devez être en mesure de prévoir les tendances aujourd'hui. Pour ce faire, vous devrez comprendre les habitudes d'achat sur le marché canadien.

Renfermant un profil complet des consommateurs canadiens ainsi qu'une analyse approfondie des industries canadiennes, le ***Recueil statistique des études de marché*** brosse un tableau exhaustif des habitudes d'achat. Ce précieux best-seller peut vous faire découvrir de nouveaux marchés en vous fournissant les détails suivants :

- les revenus des Canadiens et leurs dépenses pour la voiture, le loyer, les appareils de divertissement et les appareils ménagers;
- le niveau des ventes dans les magasins de détail à succursales et les grands magasins;
- les biens échangés entre le Canada, les É.-U. et d'autres pays;
- les données du recensement telles que l'âge, le sexe, le niveau de scolarité, les ménages, le chômage, la migration interprovinciale et internationale

...et bien plus encore!

Le ***Recueil***, contenant plus de 600 pages et au delà de 200 tableaux statistiques, vous permettra d'accéder instantanément aux données provinciales et nationales sur le marché. Il traite d'indicateurs économiques importants tels que le **produit intérieur brut**, la **productivité de la population active**, les **investissements privés et publics** et l'**Indice des prix à la consommation**.

Procurez-vous votre exemplaire du ***Recueil statistique des études de marché*** (n° 63-2240XPB au catalogue) dès aujourd'hui pour seulement 110 $ au Canada plus 7,70 $ de TPS, 132 $ US aux États-Unis et 154 $ US dans les autres pays. Commandez votre exemplaire **PAR TÉLÉPHONE EN COMPOSANT SANS FRAIS** le 1-800-267-6677 **OU PAR TÉLÉCOPIEUR** au (613) 951-1584 et utilisez votre carte VISA ou MasterCard, **OU PAR LA POSTE** à l'adresse suivante : Statistique Canada, Division du marketing, Vente et service, 120, av. Parkdale, Ottawa (Ontario) K1A 0T6, ou communiquez avec le bureau régional de Statistique Canada le plus près dont la liste figure dans la présente publication.

MERCI DE VOTRE COMMANDE!

Statistique Canada Statistics Canada

Canada

Don't let the changing world take you by surprise!

An aging population. Lone-parent families. A diverse labour force. Do you know how today's social changes will affect your future ... your organization ... and your family?

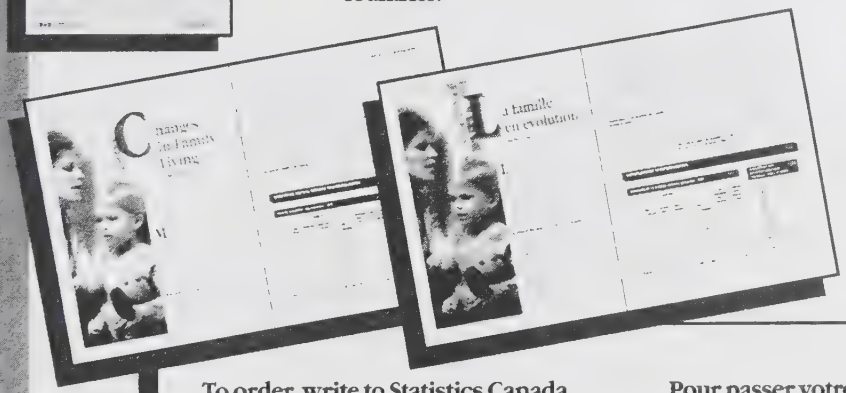

Keep pace with the dramatic shifts in Canada's evolving social fabric with Statistic Canada's best-selling quarterly, ***Canadian Social Trends***. With vast and varied reports on major changes in key social issues and trends, this periodical incorporates findings from over 50 national surveys.

Written by some of Canada's leading-edge social analysts, ***Canadian Social Trends*** combines painstaking research with dynamic prose on topics like **ethnic diversity, low-income families, time-crunch stress, violent crime** and much more — all in a colourful, easy-to-read, magazine format.

A lasting record of changing times!

Join the thousands of business and policy analysts, social-science professionals, and academics who trust ***Canadian Social Trends*** to demystify the causes and consequences of change in Canadian society. Don't miss a single issue — subscribe today.

Canadian Social Trends (catalogue number 11-0080XPE) is $34 annually in Canada, US$41 in the United States and US$48 in other countries.

Ne soyez pas dépassé par les événements!

Le vieillissement de la population. Les familles monoparentales. La diversification de la population active. Savez-vous comment les changements sociaux d'aujourd'hui vont se répercuter sur votre avenir, votre organisation, votre famille?

Suivez l'évolution spectaculaire de la société canadienne grâce à ***Tendances sociales canadiennes***, une publication trimestrielle de Statistique Canada. Avec des articles vastes et variés sur les principaux changements caractérisant les questions et les tendances sociales principales, cette publication intègre les résultats de plus de 50 enquêtes nationales.

Certains des analystes sociaux les plus reconnus du Canada rédigent des articles dans ***Tendances sociales canadiennes***. Ils présentent les résultats de recherches minutieuses dans un style attrayant pour des sujets tels que **la diversité ethnique, les familles à faible revenu, le stress dû au manque de temps, le crime** et bien d'autres encore dans une revue haute en couleur et de lecture aisée.

Un dossier permanent d'une époque en évolution!

Des milliers d'analystes des entreprises et des politiques, de professionnels des sciences sociales et d'universitaires lisent ***Tendances sociales canadiennes*** pour identifier les causes et les conséquences de l'évolution de la société canadienne. Ne manquez pas un numéro, abonnez-vous dès aujourd'hui.

L'abonnement annuel à ***Tendances sociales canadiennes*** (nº 11-0080XPF au catalogue) coûte 34 $ au Canada, 41 $ US aux États-Unis et 48 $ US dans les autres pays.

If more convenient, fax your order to 1-613-951-1584 or call toll-free 1-800-267-6677 and use your VISA or MasterCard.

Pour passer votre commande, écrivez à Statistique Canada, Division du marketing, Vente et service, 120, av. Parkdale, Ottawa (Ontario) K1A 0T6, ou adressez-vous au centre de services-conseils de Statistique Canada le plus proche de chez vous et dont la liste figure dans cette publication.

Vous pouvez aussi envoyer votre commande par télécopieur, au 1-613-951-1584, ou téléphoner sans frais au 1-800-267-6677 et donner votre numéro de carte VISA ou MasterCard.

Are you getting your information on the Canadian economy "first-hand"?

Chances are, you spend hours reading several newspapers and a handful of magazines trying to get the whole economic picture – only to spend even more time weeding out fiction from fact! Wouldn't it be a great deal more convenient (and much more effective) to go straight to the source?

Join the thousands of successful Canadian decision-makers who turn to Statistic Canada's *Canadian Economic Observer* for their monthly briefing. Loaded with first-hand information, collectively published nowhere else, CEO is a quick, concise and panoramic overview of the Canadian economy. Its reliability and completeness are without equal.

A single source

Consultations with our many readers – financial analysts, planners, economists and business leaders – have contributed to CEO's present, widely-acclaimed, two-part format. The **Analysis Section** includes thought-provoking commentary on current economic conditions, issues, trends and developments. The **Statistical Summary** contains the complete range of hard numbers on critical economic indicators: markets, prices, trade, demographics, unemployment and more.

More practical, straightforward and user-friendly than ever before, the ***Canadian Economic Observer*** gives you more than 150 pages of in-depth information in one indispensable source.

Why purchase CEO?

As a subscriber, you'll be directly connected to Statistics Canada's economic analysts – names and phone numbers are listed with articles and features. You'll also receive a copy of CEO's annual **Historical Statistical Supplement** – at no additional cost.

So why wait for others to publish Statistics Canada's data second-hand when you can have it straight from the source? Order your subscription to the ***Canadian Economic Observer*** today.

The ***Canadian Economic Observer*** (catalogue no. 10-2300XPB) is $220 annually in Canada, US$260 in the United States and US$310 in other countries. Highlights of the ***Canadian Composite Leading Indicator*** (catalogue no. 11F0008XFE) are available by fax – the same day of release – for $70 annually in Canada and US$70 in the United States.

To order, write to: Statistics Canada, Marketing Division, Sales and Service, 120 Parkdale Avenue, Ottawa, Ontario, K1A 0T6 or contact the nearest Statistics Canada Reference Centre listed in this publication. If more convenient, fax your order to 1-613-951-1584 or call toll-free 1-800-267-6677 and use your VISA or MasterCard.

Recevez-vous directement vos informations sur l'économie canadienne?

Il est probable que vous passez des heures à lire plusieurs journaux et un paquet de revues pour essayer d'avoir une vue complète de la situation économique, et ensuite passer encore plus de temps à séparer le réel de ce qui ne l'est pas. Ne serait-il pas plus pratique (et beaucoup plus efficace) de remonter directement à la source?

Joignez-vous aux milliers de décideurs canadiens gagnants qui lisent *L'Observateur économique canadien* pour leur séance de rapport mensuelle. Rempli de renseignements disponibles nulle part ailleurs, L'OEC permet d'avoir une vue générale rapide et concise de l'économie canadienne. Il est inégalé par sa fiabilité et son exhaustivité.

Une seule source

Les consultations que nous avons eues avec nos nombreux lecteurs, des analystes financiers, des planificateurs, des économistes et des chefs d'entreprise, nous ont permis de présenter L'OEC dans son format actuel en deux parties, qui a été bien accueilli. La **section de l'analyse** contient des commentaires qui donnent à réfléchir sur la conjoncture économique, ses problèmes, ses tendances et ses développements. L'**aperçu statistique** contient l'ensemble complet des chiffres réels pour les indicateurs économiques essentiels : les marchés, les prix, le commerce, la démographie, le chômage, et bien d'autres encore.

Plus pratique, plus simple, plus facile à utiliser qu'auparavant, ***L'Observateur économique canadien*** vous offre plus de 150 pages de renseignements poussés sous une seule couverture.

Pourquoi acheter L'OEC?

En tant qu'abonné à L'OEC, vous êtes directement relié aux analystes économiques de Statistique Canada : des noms et des numéros de téléphone sont cités dans les articles et les rubriques. Vous recevrez également un exemplaire du **Supplément statistique historique** annuel à titre gracieux.

Pourquoi devez-vous donc attendre que d'autres publient les données de Statistique Canada qu'ils ont reprises alors que vous pouvez les obtenir directement à la source? Abonnez-vous à ***L'Observateur économique canadien*** dès aujourd'hui.

Le prix de l'abonnement annuel à ***L'Observateur économique canadien*** (n° 10-2300XPB au catalogue) est de 220 $ au Canada, de 260 $ US aux États-Unis et de 310 $ US dans les autres pays. Les faits saillants de l'***Indicateur composite avancé*** (n° 11F0008XFF au catalogue) sont offerts par télécopieur – le jour même de leur parution – pour 70 $ par année au Canada et 70 $ US aux États-Unis.

Pour commander, écrivez à : Statistique Canada, Division du marketing, Vente et service, 120, av. Parkdale, Ottawa (Ontario) K1A 0T6, ou adressez-vous au Centre de consultation de Statistique Canada le plus proche de chez vous et dont la liste figure dans cette publication. Si vous le préférez, vous pouvez envoyer votre commande par télécopieur au 1-613-951-1584, ou téléphoner sans frais au 1-800-267-6677 et utiliser votre carte VISA ou MasterCard.
